

### Dani Inglesby, MD

Resident (PGY3), Plastic Surgery-Integrated  
The Mount Sinai Hospital

**Service to their peers:** "She is one of the most caring and collegial residents that I have ever worked with. When she consulted us, she took the time to explain what she really needed, asked for our help, and was so calm and friendly on a complicated case. She was a joy to work with. But beyond our working relationship, she is one of the kindest residents I have ever worked with. She deeply cares about her peers and will do anything for the team." "I have yet to find another resident who continuously goes above and beyond like Dani. She consistently puts patients' needs first even under challenging circumstances. Though she is truly dedicated to becoming a great surgeon and improving her skills, she continues to be an amazing colleague to her co-residents and those of other specialties." "She routinely goes the extra mile for patients, whether it is trying to connect them with services or checking in them after discharge. She has truly been the face of plastic surgery at Elmhurst these past two months and has done it with poise and positivity."

### Alex Choy MD

Fellow (PGY5), Cardiovascular Disease  
The Mount Sinai Hospital/Elmhurst Hospital Center

**Service to their peers; Educational efforts or scholarly performance:** "He has been a crucial asset to our fellowship family. He comes to work every day motivated to learn the intricacy of cardiology but also to educate his peers. Most of all, he is a kind physician to his patients and is an exemplary colleague and friend." "He frequently comes in even when he is not on call to ensure the first-year fellows are properly educated on acute electrophysiologic procedures overnight, showing his dedication to not only the patients but also to the education of his colleagues. His enthusiasm for teaching has been evident throughout his fellowship. He is always willing to take extra time to explain concepts or procedures to the fellows, residents, and medical students. His patient and thoughtful approach has helped many of us develop our own skills and knowledge in cardiology, "

## Resident and Fellow Peer Nominees for March

### Cara Borelli, DO

MSMW Addiction Medicine

### Huazen Chen, MD

MSH/EHC Cardiovascular Disease

### Sravya Chilukuri, MD

MSSN Surgery

### Marc Henry Estriplet, MD, MPH

MSH Internal Medicine

### Alexander Goel, MD

MSH Otolaryngology

### Keerthana Haridas, MBBS

MSMW Internal Medicine

### Sari Johnston, DDS, MSc

MSBI Oral and Maxillofacial Surgery

### Kathryn Kelly, DO

MSBI Psychiatry

### Susan Kim, MD

MSH Neonatal-Perinatal Medicine

### Raksha Kulkarni, MBBS
