

**Funding Opportunities Monthly Edition
April 2024 Due Dates**

Introduction

This funding opportunity packet contains information on funding opportunities with deadlines in April 2024. The opportunities are organized in the following order:

1. [National Institutes of Health \(NIH\)](#)
2. [National Science Foundation \(NSF\)](#)
3. [Other Federal](#)
4. [Non Federal](#)

Deadline Dates (ALL)	02-Mar-2024 [Optional][LOI/Pre-App], 01-Apr-2024 , 01-Sep-2024 [Optional][LOI/Pre-App], 01-Oct-2024
Synopsis	The purpose of this Notice of Funding Opportunity (NOFO) is to encourage revision applications from currently funded NCI P50 specialized centers proposing to expand upon original research question(s) from specific projects or otherwise accelerate progress for the parent study by incorporating a new technical approach or instrument developed through support from the NCI Innovative Molecular Analysis Technologies (IMAT) program. Awards from this NOFO are meant to incentivize independent validation and accelerate the suitability of these emerging technologies for appropriate research communities. As a component of the NCI IMAT program, this NOFO aims to promote interdisciplinary collaboration in the development of innovative tools and methods that enable cancer research and accelerate scientific discovery.

new technical approach or instrument developed through support from the NCI Innovative Molecular Analysis Technologies (IMAT) program into a pilot cancer research project. As a component of the NCI IMAT program, this NOFO is meant to promote interdisciplinary collaboration in the development of innovative tools and methods as well as incentivize independent validation and accelerate the suitability of these emerging technologies to enable cancer research and accelerate scientific discovery.

113746	Notice of Special Interest (NOSI): Utilization of Cohorts and Prospective Study Designs for Liquid Biopsy Assay Validation for Early Detection of Cancers	National Cancer Institute/NIH/DHHS	NOT-CA-23-004	05-Feb-2024	Not Specified

Deadline Dates (ALL)	13-Feb-2024 , 01-Mar-2024 , 05-Apr-2024 , 07-May-2024 , 05-Jun-2024 , 11-Jun-2024 , 12-Jun-2024 , 01-Jul-2024 , 05-Sep-2024 , 07-Sep-2024 , 01-Oct-2024 , 05-Oct-2024 , 10-Oct-2024 , 11-Oct-2024 , 05-Jan-2025 , 07-Jan-2025 , 05-Feb-2025 , 13-Feb-2025 , 01-Mar-2025 , 05-Apr-2025 , 07-May-2025 , 05-Jun-2025 , 12-Jun-2025 , 01-Jul-2025
Synopsis	The purpose of this Notice of Special Interest (NOSI) is to encourage research studies leveraging partnerships between biomarker technology developers with assays for early cancer detection, and population-based researchers, including cohort and biorepository researchers. Proposals that facilitate early cancer biomarker assay development, verification, qualification, and validation utilizing statistically powered retrospective cohorts and/or through prospective studies in the appropriate populations with a sound study design are responsive to this NOSI.

122672	RFA-CA-24-008 -- Innovative Molecular and Cellular Analysis Technologies for Basic and Clinical Cancer Research (R61 Clinical Trial Not Allowed)	National Cancer Institute/NIH/DHHS	RFA-CA-24-008	02-Mar-2024 [Optional][LOI/Pre-App]	450,000 USD

NIH Funding Opportunities

SPIN ID	Program Title	Sponsor Name	Sponsor Number	Deadline Date	Funding Amount
	Deadline Dates (ALL)	02-Mar-2024 [Optional][LOI/Pre-App], 01-Apr-2024 , 01-Sep-2024 [Optional][LOI/Pre-App], 01-Oct-2024			
	Synopsis	<p>This Notice of Funding Opportunity (NOFO) solicits grant applications proposing exploratory research projects focused on the early-stage development of highly innovative technologies offering novel molecular or cellular analysis capabilities for basic, clinical, or epidemiological cancer research. The emphasis of this NOFO is on supporting the development of novel capabilities involving a high degree of technical innovation for targeting, probing, or assessing molecular and cellular features of cancer biology. Well-suited applications must offer the potential to accelerate and/or enhance research in the areas of cancer biology, early detection and screening, clinical diagnosis, treatment, control, epidemiology, and/or address issues associated with cancer health disparities. Technologies proposed for development may be intended to have widespread applicability but must be focused on improving molecular and/or cellular characterizations of cancer biology. Projects proposing the application of existing technologies where the novelty resides in the biological or clinical target/question being pursued are not responsive to this solicitation and will not be reviewed. This funding opportunity is part of a broader NCI-sponsored Innovative Molecular Analysis Technologies (IMAT) Program.</p>			
122678	RFA-CA-24-010 -- Innovative Biospecimen Science Technologies for Basic and Clinical Cancer Research (R61 Clinical Trial Not Allowed)	National Cancer Institute/NIH/DHHS	RFA-CA-24-010	02-Mar-2024 [Optional][LOI/Pre-App]	450,000 USD
	Contact Name	Kelly Crotty, Ph.D.

	Deadline Dates (ALL)	02-Mar-2024 [Optional][LOI/Pre-App], 01-Apr-2024 , 01-Sep-2024 [Optional][LOI/Pre-App], 01-Oct-2024			
	Synopsis	<p>This Notice of Funding Opportunity (NOFO) solicits grant applications proposing exploratory research projects focused on the early-stage development of highly innovative technologies that improve the quality of the samples used for cancer research or clinical care. This includes new capabilities to address issues related to pre-analytical degradation of targeted analytes during the collection, processing, handling, and/or storage of cancer-relevant biospecimens. The overall goal is to support the development of highly innovative technologies capable of maximizing or otherwise interrogating the quality and utility of biological samples used for downstream analyses. This NOFO will support the development of tools, devices, instrumentation, and associated methods to preserve or protect sample integrity, or establish verification criteria for quality assessment/quality control and handling under diverse conditions. These technologies are expected to accelerate and/or enhance research in cancer biology, early detection and screening, clinical diagnosis, treatment, or epidemiology, or address issues associated with cancer health disparities, by reducing pre-analytical variations that affect biospecimen sample quality.</p>

	<p>Program URL Link to program URL</p> <p>Deadline Dates (ALL) 05-Apr-2024 , 05-Sep-2024</p> <p>Synopsis The Small Business Innovation Research (SBIR) and Small Business Technology Transfer (STTR) programs at the National Cancer Institute (NCI) are issuing this Notice of Special Interest (NOSI) to encourage SBIR/STTR grant applications from small business concerns (SBCs) in response to SBIR/STTR Omnibus Solicitations proposing commercially-directed research for the development of cancer prevention, diagnosis, or treatment technologies to improve cancer outcomes in low- and middle-income countries (LMICs), and low-resource settings in the US. Specifically, the NCI through this NOSI encourages grant applications from SBCs to develop or adapt, apply, and validate existing or emerging technologies into user-friendly products for cancer prevention, diagnosis, or treatment in low-resource settings. These technologies should be practical and affordable in low-resource settings, including remote or underserved populations within or outside the US. The technologies may include but are not limited to tools for vaccine dissemination/delivery, imaging, in vitro diagnosis, or treatment of pre-cancerous (pre-neoplastic) or cancerous lesions that are preventable or treatable within low-resource settings. Strong emphasis is placed on technologies that directly provide or immediately lead to prevention, diagnosis, or treatment options available in the local health system. This funding opportunity is part of a broader NCI-sponsored AffordableCancer Technologies (ACTs) Program. Note: LMIC is defined according to the World Bank Country and Lending Groups and is inclusive of low- and middle-income countries, not including upper-middle income countries, for the purposes of this NOSI.</p>				
117409	<p>Notice of Special Interest (NOSI): Development of Innovative Informatics and Data Science Technologies, Tools, and Methods for Vision Research</p>	National Eye Institute/NIH/DHHS	NOT-EY-23-005	16-Feb-2024	Not Specified

	Sponsor Website				
	Program URL	Link to program URL			
	Deadline Dates (ALL)	15-Feb-2024 , 26-Mar-2024 [Optional][LOI/Pre-App], 25-Apr-2024			
	Synopsis	<p>The purpose of the NHLBI Outstanding Investigator Award (OIA) is to promote scientific productivity and innovation by providing long-term support and increased flexibility to experienced Program Directors/Principal Investigators (PD/Pis) who are currently PD/Pis on at least two NHLBI R01-equivalent awards and whose outstanding record of research demonstrates their ability to make major contributions to heart, lung, blood and sleep (HLBS) research. The OIA is intended to support a research program, rather than a research project, by providing the primary and most likely sole source of NHLBI funding on individual grant awards. The OIA will support the research program of NHLBI-funded investigators for up to seven years. The OIA will provide investigators increased freedom to conduct research that breaks new ground or extends previous discoveries in new directions. It will also allow PD/Pis to take greater risks and to pursue research that requires a longer timeframe.</p> <p>Research supported by the OIA must be within the scope of the NHLBI mission. It is anticipated that the OIA will: Provide a stable funding environment, thereby improving productivity and facilitating nimble, ambitious, creative research; Accelerate scientific innovation by enabling flexibility in pursuing new research directions as they arise, since PD/Pis will not be bound to specific aims proposed in advance of the studies; Reduce the time researchers spend writing grant applications and managing multiple grant awards, thereby allowing more time to be devoted to conducting research; Facilitate PD/Pis' commitment to research through increased stability of funding; and Enable PD/Pis to devote more time and energy to mentoring students and junior scientists and providing scientific service.</p>			
108576	RFA-HL-23-012 -- Catalyze: Product Definition for Small Molecules and Biologics - Preliminary Product/Lead Series Identification (R33 - Clinical Trial Not Allowed)	National Heart, Lung, and Blood Institute/NIH/DHHS	RFA-HL-23-012	21-Feb-2024	700,000 USD

The Coordinating Center will expand and support an infrastructure for enhancing and advancing efforts supported by NHGRI's Genome Technology Program. The Center's activities will include facilitating opportunities for new research collaborations to advance technology development and dissemination. The Center will also develop outreach strategies and resources to engage the broader biomedical research community and provide an Opportunity Funds Program to support innovative small-scale work. This NOFO requires a Plan for Enhancing Diverse Perspectives (PEDP), which will be assessed as part of the scientific and technical peer review evaluation. Applications that fail to include a PEDP will be considered incomplete and will be withdrawn. Applicants are strongly encouraged to read the NOFO instructions carefully and view the available PEDP guidance material.</p>

	Deadline Dates (ALL)	04-Apr-2024 , 06-Aug-2024 , 06-Dec-2024 , 09-Apr-2025 , 06-Aug-2025 , 05-Dec-2025			
	Synopsis	<p>This Funding Opportunity Announcement (FOA) solicits applications that propose to conduct time-sensitive ancillary studies related to the NIAMS mission in conjunction with privately or publicly funded, active, ongoing clinical projects (parent projects). The parent project can be an interventional clinical trial, or a clinical study such as an observational study, or a disease-specific repository that will be actively collecting patient samples or clinical data. The parent project(s) should provide a cohort of well-characterized patients, infrastructure, data, and biological samples for the ancillary study.</p> <p>Applications submitted in response to this FOA will undergo an accelerated review and award process. The objective of this FOA is to provide a flexible mechanism to leverage currently funded resources and maximize the return on existing investments in parent projects. Successful ancillary studies will enhance the scientific content and value of the parent projects, improve the research community’s understanding of a disease or organ system in the NIAMS portfolio, and thus may identify novel targets for diagnosis, treatment, and prevention of disease.</p>

Deadline Dates (ALL) | 03-Apr-2024 , 03-Oct-2024 , 03-Apr-2025 , 03-Oct-2025 , 03-Apr-2026

Synopsis | The NICHD has a state-of-the-art Chemical Synthesis and Optimization Facility for advancing both non-hormonal contraceptive and reproductive health related product development. This facility has the capabilities and capacity for preclinical services including Investigational Device Exemption (IDE) or Investigational New Drug (IND)-enabling studies (e.g., protein generation, X-ray crystallography, high throughput screening, structure activity relationships, hit-to-lead generation, drug metabolism). The long-term objective is to enable a preclinical candidate for IND/IDE study(ies) that offers a safe therapeutic option in the field of contraception, and/or reproductive health related indications (pending contractor availability and available funding).

106247	Notice of Special Interest (NOSI): Advancing Imaging, Device Production, and Clinical Capabilities in Digital Dentistry (R41/R42, R43/R44 Clinical Trial Not Allowed)	National Institute of Dental and Craniofacial Research/NIH/DHHS	NOT-DE-21-012	05-Apr-2024	Not Specified

Synopsis | Digital dentistry uses advanced materials and powerful manufacturing technologies aided by 3D imaging and processing software algorithms to produce dental devices and perform complex dental procedures. This NOSI encourages innovation, optimization and customization of core technologies in digital dentistry that improve efficiency of oral healthcare delivery, effectiveness of clinical decision-making and outcomes of treatments associated with dental, oral and craniofacial (DOC) tissues. Among the areas of interest of this NOSI, are development of digital imaging and image processing capabilities for dental radiology, and the integration of 3-dimensional additive manufacturing with imaging tools. This NOSI also supports efforts to develop, integrate, adapt, optimize, and validate new and existing dental materials designed for additive manufacturing approaches in the repair, replacement and restoration of DOC tissues.

Projects should reflect new and novel scientific directions that are distinct from concepts and approaches being pursued in the investigator's research program or elsewhere. Projects must be consistent with the scientific priorities outlined by the NIH Office of AIDS Research (OAR). These priorities have been described most recently in NOT-OD-20-018.</p>				
106968	Notice of Special Interest (NOSI): NIDDK T32 Medical Student Research Training Administrative Supplement	National Institute of Diabetes and Digestive and Kidney Diseases/NIH/DHHS	NOT-DK-21-015	18-Apr-2024	Not Specified
	<p>Contact Name Christine Densmore, M.S.</p> <p>Contact Telephone 301-402-8714</p> <p>Contact Email densmorec@niddk.nih.gov</p> <p>Sponsor Website </p> <p>Program URL Link to program URL</p> <p>Deadline Dates (ALL) 18-Apr-2024</p> <p>Synopsis The Medical Student Research Training (MSRT) program provides mentored support for medical students interested in taking a year off from their medical school studies to work in an academic research lab. Support will be provided through an administrative supplement to an active NIDDK institutional training grant (T32 or TL1) in the an area of research within the NIDDK mission. A list of currently funded T32 program locations with the Principal Investigator contact information is available on the NIDDK website. Providing the opportunity for students to interrupt their medical school studies for up to 12 months to pursue a research project should help them solidify their decisions to pursue a research career, focus their research interests, and provide a background for future training and career development programs once they have completed their medical training.</p>

	Deadline Dates (ALL)	02-Apr-2024 , 01-Aug-2024 , 03-Dec-2024 , 01-Apr-2025			
	Synopsis	<p>The purpose of the Kidney, Urology or Hematology (KUH) Predoctoral to Postdoctoral Transition Award (F99/K00) is to recruit truly exceptional graduate students, who are currently not involved in Kidney, Urology or Hematology (K, U or H) research, and provide them a stable transition into a postdoctoral research experience focused on K, U, or H research. Strong candidates will bring novel approaches and diverse perspectives from fields including, but not limited to, engineering, statistics, data science, imaging, biochemistry, neuroscience and genetics. Graduate students who are already involved in K, U, or H research are not eligible for this F99/K00 award and are instead encouraged to apply for the Ruth L. Kirschstein National Research Service Award (NRSA) Individual Predoctoral Fellowship (Parent F31, PA-21-051). Prospective applicants are strongly encouraged to contact the NIDDK Program Official early in the process to discuss eligibility and program goals. This Funding Opportunity Announcement (FOA) does not allow applicants to propose to lead an independent clinical trial, but does allow applicants to propose research experience in a clinical trial led by a sponsor or co-sponsor.</p>

Centers provide critical research infrastructure, shared facilities, services and/or resources, to groups of investigators conducting environmental health sciences research. An EHS CC enables researchers to conduct their independently-funded individual and/or collaborative research projects more efficiently and/or more effectively. The overall goal of an EHS CC is to identify and capitalize on emerging issues that advance improving the understanding of the relationships among environmental exposures, human biology, and disease. The EHS CC supports community engagement and translational research as key approaches to improving public health.

Synopsis	This Notice of Funding Opportunity (NOFO) is intended to support novel environmental health research in which an unpredictable event or policy change provides a limited window of opportunity to collect human biological samples or environmental exposure data. The primary motivation of the NOFO is to understand the consequences of natural and human-made disasters, emerging environmental public health threats, and policy changes in the U.S. and abroad. A distinguishing feature of an appropriate study is the need for rapid review and funding, substantially shorter than the typical NIH grant review/award cycle, for the research question to be addressed and swiftly implemented. The shortened timeframe will be achieved by more frequent application due dates and expediting peer review, council concurrence and award issuance. The entire cycle, from submission to award, is expected to be within 4-6 months.

	Deadline Dates (ALL)	05-Apr-2024 , 05-Sep-2024 , 05-Jan-2025 , 05-Apr-2025 , 05-Sep-2025 , 05-Jan-2026 , 05-Apr-2026 , 05-Sep-2026			
	Synopsis	<p>The purpose of this notice of funding opportunity (NOFO) is to provide a vehicle for Small Business Concerns (SBCs) submitting Small Business Innovation Research (SBIR) grant applications for investigator-initiated exploratory clinical trials to the National Institute of Neurological Disorders and Stroke (NINDS). The projects must focus on products related to the mission and goals of the NINDS and may evaluate drugs, biologics, devices, or diagnostics, as well as surgical, behavioral or rehabilitation therapies. Plan for Enhancing Diverse Perspectives The NIH recognizes that diverse teams working together and capitalizing on innovative ideas and distinct perspectives outperform homogeneous teams. There are many benefits that flow from a diverse scientific workforce, including: fostering scientific innovation, enhancing global competitiveness, contributing to robust learning environments, improving the quality of the research, advancing the likelihood that underserved populations participate in, and benefit from research, and enhancing public trust. To support the best science, the NIH encourages inclusivity in research. Examples of structures that promote diverse perspectives include but are not limited to: Transdisciplinary research projects and collaborations among neuroscientists and researchers from fields such as computational biology, physics, engineering, mathematics, computer and data sciences, as well as bioethics. Engagement from different types of institutions and organizations (e.g., research-intensive, undergraduate-focused, minority-serving, community-based). Individual applications and partnerships that enhance geographic and regional heterogeneity. Investigators and teams composed of researchers at different career stages. Participation of individuals from diverse backgrounds, including groups traditionally underrepresented in the biomedical, behavioral, and clinical research workforce (see NOT-OD-20-031), such as underrepresented racial and ethnic groups, those with disabilities, those from disadvantaged backgrounds, and women. Opportunities to enhance the research environment to benefit early- and mid-career investigators. This NOFO requires a Plan for Enhancing Diverse Perspectives (PEDP), which will be assessed as part of the scientific and technical peer review evaluation. Applications that fail to include a PEDP will be considered incomplete and will be withdrawn. Applicants are strongly encouraged to read the NOFO instructions carefully and view the available PEDP guidance material.</p>

etiology dementias (MED) that are of interest and that are in scope are cognitive impairment and dementia cases positive for 1) canonical Alzheimer’s pathology biomarkers (for example, amyloid deposition assessed using positron emission tomography and/or low cerebrospinal fluid amyloid beta 42 combined with elevated phosphorylated tau; and 2) with evidence of vascular contributions based on imaging (for example, white matter disease and/or subclinical infarction). Bayesian approaches with response adaptive randomization to examine specific subgroups are encouraged. Successful applications will be powered to determine efficacy in diverse populations representative of the distribution of the disease in the United States by sex, race/ethnicity, and geographic distribution. Applications must include elements of patient and community engagement that are incorporated into all stages of program development and at all levels of the organizational structure.

108301	RFA-NS-22-034 -- HEAL Initiative: Discovery and Validation of Novel Targets for Safe and Effective Pain Treatment (R01 Clinical Trial Not Allowed)	National Institute of Neurological Disorders and Stroke/NIH/DHHS	RFA-NS-22-034	09-Apr-2024	Not Specified

Deadline Dates (ALL)	09-Apr-2024 , 04-Jun-2024 , 07-Aug-2024 , 02-Oct-2024 , 06-Dec-2024

Synopsis The purpose of this Funding Opportunity Announcement (FOA) is to promote the discovery and validation of novel therapeutic targets to facilitate the development of pain therapeutics. Specifically, the focus of this FOA is on the basic science discovery of targets in the peripheral nervous system, central nervous system, immune system or other tissues in the body that can be used to develop treatments that have minimal side effects and little to no abuse/addiction liability. Research supported by this FOA must include rigorous validation studies to demonstrate the robustness of the target as a pain treatment target. This will lower the risk of adopting the target in translational projects to develop small molecules, biologics, natural substances, or devices that interact with this target for new pain treatments. Translational research to develop new medical devices is not the focus of this FOA. Basic science studies of pain and related systems in the body are responsive to this FOA and are encouraged in the context of novel pain therapeutic target discovery. This FOA is not specific for any one or group of pain conditions. Projects to identify novel targets for acute pain, chronic pain, migraine, other headache disorders, osteoarthritis, diabetic neuropathy, chemotherapy-induced neuropathy, sickle-cell pain, post stroke pain, orofacial pain, etc. will be considered. Projects to identify novel targets for a combination of chronic overlapping pain conditions or for specific pathological conditions will be considered. Projects that seek to identify novel targets in specific

translation of basic biological discoveries into clinical applications that improve health. It encourages high quality science demonstrating the potential to result in understanding an important disease process or lead to new therapeutic interventions, diagnostics, or prevention strategies within the research interests and priorities of the participating NIH Institutes/Centers (ICs). Specifically, the program seeks to broaden and strengthen patient-centric translational research collaborations between basic and clinical researchers both within and outside NIH to accelerate and enhance translational science by promoting partnerships between NIH intramural investigators (e.g., those conducting research within the labs and clinics of the NIH) and extramural investigators (e.g., those conducting research in labs outside the NIH), and by providing support for extramural investigators to take advantage of the unique research opportunities available at the NIH Clinical Center by conducting clinical research projects in collaboration with NIH intramural investigators. In order to be eligible for this program, the application must include at least one intramural scientist as a co-Program Director/Principal Investigator (co-PD/PI), and at least some of the clinical research must be conducted at the NIH Clinical Center. Through this collaboration, external researchers may gain access to the NIH Clinical Center and leverage the diverse Clinical Center resources, expertise, and infrastructure available to test promising laboratory-and animal-based discoveries with potential for advancing disease diagnosis, treatment and prevention. The special environment of the Clinical Center can support studies that may not be readily supported elsewhere. This may include collaborations that propose targeted increases in new patients enrolled in protocols at the Clinical Center. For this initiative, patients must be seen at the NIH Clinical Center. Projects that take only minimal advantage of Clinical Center resources, such as projects only utilizing banked samples or data, will not be considered for funding.

114967	HEAL Commercialization Readiness Pilot (CRP) Program: Embedded Entrepreneurs for Small Businesses in Pain Management (SB1 Clinical Trial Not Allowed)	National Institutes of Health/DHHS	PAR-23-069	05-Apr-2024	200,000 USD

		aid in commercialization through private third-party funding or partnership with industry. Clinical trials are not accepted under this FOA.			
122315	Blueprint Neurotherapeutics Network (BPN): Small Molecule Drug Discovery and Development of Disorders of the Nervous System (UG3/UH3 Clinical Trial Optional)	National Institutes of Health/DHHS	PAR-24-043	09-Feb-2024	Not Specified
	<p>Contact Name Charles Cywin, PhD</p> <p>Contact Telephone 301-496-1779</p> <p>Contact Email charles.cywin@nih.gov</p> <p>Sponsor Website </p> <p>Program URL Link to program URL</p> <p>Deadline Dates (ALL) 09-Feb-2024 , 18-Apr-2024 , 15-Jul-2024 , 18-Aug-2024 , 15-Jan-2025 , 18-Apr-2025 , 15-Jul-2025 , 18-Aug-2025 , 15-Jan-2026 , 17-Apr-2026 , 15-Jul-2026 , 18-Aug-2026</p> <p>Synopsis The Blueprint Neurotherapeutics Network (BPN) invites applications from neuroscience investigators seeking support to advance their small molecule drug discovery and development projects into the clinic. Participants in the BPN are responsible for conducting all studies that involve disease- or target-specific assays, models, and other research tools and receive funding for all activities to be conducted in their own laboratories. In addition, applicants will collaborate with NIH-funded consultants and can augment their project with NIH contract research organizations (CROs) that specialize in medicinal chemistry, pharmacokinetics, toxicology, formulations development, chemical synthesis including under Good Manufacturing Practices (GMP), and Phase I clinical testing. Projects can enter either at the Discovery or the Development stage. In the Discovery phase the goal is to characterize and optimize promising hit compounds using medicinal chemistry to establish structure activity relationships (SAR) and structure property relationships (SPR) including in vitro and in vivo properties such as metabolism, selectivity, toxicity, etc. As projects enter or advance to the Development stage the goal is to advance a single development candidate through Investigational New Drug (IND)-enabling toxicology studies and phase I clinical testing. Projects can enter the program at the Development stage and progress in a shorter period to IND enabling toxicology studies and phase I clinical testing. BPN recipient Institutions retain their assignment of intellectual property (IP) rights and gain assignment of IP rights from the BPN contractors and consultants (and thereby control the patent prosecution and licensing negotiations) for drug candidates developed in this program.</p>

Deadline Dates (ALL)	16-Mar-2024 [Optional][LOI/Pre-App], 16-Apr-2024
Synopsis	The purpose of this notice of funding opportunity (NOFO) announcement is to support the development and maintenance of a Resource Center for Cannabis and Cannabinoid Research through a cooperative agreement funding mechanism (U24). Such a Center will address challenges and barriers to conducting research on cannabis and its constituents as well as to enable researchers to successfully generate more rigorous scientific evidence across a variety of research domains in both basic and clinical research. The Center is expected to be a focal point for researchers entering the cannabis research space and to support the development and establishment of research tools and studies that will improve upon and eventually change the landscape of cannabis research. Overall, the Center will facilitate research advances through synergistic interactions among experts in relevant commercial, basic science, clinical, and regulatory areas both within the Center itself and in collaboration with the extramural community.

Synopsis	This Notice of Funding Opportunity (NOFO), issued by the National Institutes of Health (NIH) invites eligible United States small businesses to submit Small Business Technology Transfer (STTR) grant applications. United States small businesses that have the research capabilities and technological expertise to contribute to the R&D mission(s) of the NIH awarding components identified in this NOFO are encouraged to submit STTR grant applications in response to identified topics (see PHS 2023-2 SBIR/STTR Program Descriptions and Research Topics for NIH, CDC, and FDA). This Parent Notice of Funding Opportunity does not accept clinical trials.

	Synopsis	The National Eye Institute (NEI) is issuing this Notice of Special Interest (NOSI) to encourage novel research that incorporates newly identified factors into new or existing models of visual system regeneration. These factors were identified by a consortium of research teams as part of the Audacious Goal Initiative (AGI) and are being shared broadly with the research community. Applicants beyond the original consortium are strongly encouraged to apply.

	Synopsis	The NIH INvestigation of Co-occurring conditions across the Lifespan to Understand Down syndromE (INCLUDE) Project seeks to improve health and quality-of-life for individuals with Down syndrome (DS). This Notice of Special Interest (NOSI) announces NIH support for the professional development of trainees aiming to establish a career in DS-related research. By providing these scientists with training, resources, and mentorship, the NIH intends to support the career development of junior investigators in DS who will lead future research to improve the understanding of the biology of DS and support

	Synopsis	<p>The purpose of this Notice of Special Interest (NOSI) is to announce that the National Institute of Allergy and Infectious Diseases (NIAID), the National Institute of Arthritis and Musculoskeletal and Skin Diseases (NIAMS), the National Institute of Mental Health (NIMH), and the National Institute of Neurological Disorders and Stroke (NINDS), encourage applications to advance research activities relevant to the five strategic priorities identified in the recently released NIH Strategic Plan for Tickborne Disease Research: Improve fundamental knowledge of Tickborne Diseases (TBDs) to understand the host, vector, and pathogen factors that drive TBD pathogenesis and transmission. Elucidate the host immune mechanisms in response to and exploited by TBD pathogens. Advance research to improve the diagnosis of TBDs using both host- and pathogen-targeted approaches, including research for rapid diagnostics and multiplex platform approaches that detect multiple tickborne pathogens. Accelerate research to improve TBD prevention by supporting science to design, develop, and evaluate vaccines, vector control strategies, and other prevention approaches. Promote research to improve treatment for all forms of TBDs, including studies to develop effective therapies to treat symptoms that persist after TBD treatment, therapies for non-infectious TBDs, and new antimicrobials. Support tools and resources to advance research in understanding, preventing, diagnosing, and treating TBDs, including repositories, genomic resources, animal models, and preclinical services to aid the development and assessment of diagnostic, vaccine, and therapeutic candidates.</p>

Synopsis	<p>The purpose of this Ruth L. Kirschstein National Research Service Award (NRSA) Individual Predoctoral Fellowship to Promote Diversity in Health-Related Research award is to enhance the diversity of the health-related research workforce by supporting the research training of predoctoral students from diverse backgrounds, including those from groups that are underrepresented in the biomedical, behavioral, or clinical research workforce. Through this award program, promising predoctoral students will obtain individualized, mentored research training from outstanding faculty sponsors while conducting well-defined research projects in scientific health-related fields relevant to the missions of the participating NIH Institutes and Centers. The proposed mentored research training is expected to clearly enhance the individual's potential to develop into a productive, independent research scientist. This Notice of Funding Opportunity (NOFO) does not allow applicants to propose to lead an independent clinical trial, but does allow applicants to propose research experience in a clinical trial led by a sponsor or co-sponsor.</p>

SPIN ID	Program Title	Sponsor Name	Sponsor Number	Deadline Date	Funding Amount
	<p>Practices (GMP), and Phase I clinical testing. Projects can enter either at the Discovery or the Development stage. In the Discovery phase the goal is to characterize and optimize promising hit compounds using medicinal chemistry to establish structure activity relationships (SAR) and structure property relationships (SPR) including in vitro and in vivo properties such as metabolism, selectivity, toxicity, etc. As projects enter or advance to the Development stage the goal is to advance a single development candidate through Investigational New Drug (IND)-enabling toxicology studies and phase I clinical testing. Projects can enter the program at the Development stage and progress in a shorter period to IND enabling toxicology studies and phase I clinical testing. BPN recipient Institutions retain their assignment of intellectual property (IP) rights and gain assignment of IP rights from the BPN contractors and consultants (and thereby control the patent prosecution and licensing negotiations) for drug candidates developed in this program.</p>				
122740	RFA-DK-23-021 -- Cardiovascular Repository – Type 1 Diabetes (CARE-T1D) Consortium (U01 Clinical Trial Not Allowed).	National Institutes of Health/DHHS	RFA-DK-23-021	11-Mar-2024 [Optional][LOI/Pre-App]	1,800,000 USD

	Program URL	Link to program URL			
	Deadline Dates (ALL)	11-Mar-2024 [Optional][LOI/Pre-App], 11-Apr-2024			
	Synopsis	<p>Cardiovascular complications are the leading cause of death for individuals with type 1 diabetes (T1D) and significantly shorten their lives. Cardiovascular disease (CVD) progression in people with T1D differs from that observed in people with type 2 diabetes (T2D) and residual increased risk of CVD remains after treatment of standard risk factors, such as hyperglycemia, hypertension, and hyperlipidemia. The NIH Cardiovascular Repository for T1D (CaRe-T1D) was initiated with the goal of establishing a biorepository of human CV tissue and a scientific consortium to advance and support discovery and mechanistic research that increase the understanding of CVD in T1D. The first phase launched the biorepository and now in the second phase investigative teams will be added to form a consortium with the biorepository serving as the Coordinating Center (CC). CaRe-T1D is currently collecting hearts, kidneys, carotid and peripheral arteries, and blood from organ donors with T1D, T2D and without diabetes. The goal of this NOFO is to attract investigative teams with complementary interests and expertise who will leverage these resources through individual and collaborative studies to advance our knowledge of the pathogenesis of CVD in T1D.</p>

Synopsis	NIH invites applications for the Intramural General Research Loan Repayment Program for NIH investigators or fellows who are offered employment by the NIH in subspecialty and residency training programs accredited by the Accreditation Council for Graduate Medical Education (ACMGE). The NIH Loan Repayment Programs (LRPs) are a set of programs established by Congress and designed to recruit and retain highly qualified health professionals into biomedical or biobehavioral research careers. The General Research LRP for ACGME Fellows is a non-competitive program, so there are no evaluation criteria.

119904	SBIR/STTR Commercialization Readiness Pilot (CRP) Program Technical Assistance and Late Stage Development (SB1, Clinical Trial Not Allowed)	National Institutes of Health/DHHS	PAR-23-219	05-Apr-2024	Not Specified

	Synopsis	<p>This Notice of Special Interest (NOSI) is to inform potential applicants of NIAID's interest in the development and optimization of next generation methodologies for HIV-1 drug resistance (DR) mutation detection and reporting. This is needed to improve the guidance available to treatment and prevention programs for both individuals and populations. Research responsive to this NOSI could include the development of: (i) highly sensitive mutation detection technologies that can be integrated into multiplex assay systems capable of simultaneous assessment of large numbers of potential mutations (ii) point of care (POC) DR assays, or (iii) strategies for rapid acquisition, curation and analysis of these HIV DR data and timely dissemination to healthcare providers and public health decision makers. Strategies applicable to low and middle income countries as defined by the World Bank are especially encouraged.</p>

	Synopsis	<p>This Funding Opportunity Announcement (FOA) establishes an accelerated review/award process to support time-sensitive research to evaluate a new policy or program that is likely to influence obesity related behaviors (e.g., dietary intake, physical activity, sedentary behavior, and/or sleep) and/or weight outcomes in an effort to prevent or reduce obesity. This FOA is intended to support research where opportunities for empirical study are, by their very nature, only available through expedited review and funding. All applications submitted to this FOA must demonstrate that the evaluation of an obesity-related policy or program offers an uncommon and scientifically-compelling research opportunity that will only be available if the research is initiated with minimum delay. For these reasons, applications submitted to this time-sensitive FOA are not</p>

Synopsis	Through this 'I-Corps™ at NIH' program Funding Opportunity Announcement (FOA), the National Institutes of Health and Center for Disease Control and Prevention (CDC) provide administrative supplement awards to active SBIR (NIH and CDC) and STTR Phase I (NIH only) recipients. The I-Corps at NIH program is focused on educating researchers and technologists on how to translate technologies from the lab into the marketplace. I-Corps enables and accelerates the transformation of invention to impact patients. The program provides three-member project teams with access to instruction and mentoring to accelerate the translation of technologies currently being developed with NIH and CDC SBIR and STTR funding. The participants conduct evidence-based research to identify where the company's technology can have greatest impact on unmet clinical needs. It is anticipated that outcomes for the I-Corps teams participating in this program will include significantly refined commercialization plans and well-informed pivots in their overall commercialization strategies. Prospective applicants are strongly encouraged to contact relevant Scientific/Research staff listed in Section VII for more information about the program before applying.

123484	FCO -- AMENDMENT -- Platform Accelerating Rural Access to Distributed & InteGrated Medical care (PARADIGM)	National Institutes of Health/DHHS	ARPA-H-SOL-24-02	26-Apr-2024	Not Specified

---------	---------------	--------------	----------------	---------------	----------------

responses will be disregarded. ARPA-H will not comment or provide feedback on questions related to proposed technical approaches. Sixty million Americans live in rural areas with limited access to essential health services. This population is more likely to die from five leading causes —heart disease, cancer, trauma, lung disease, and stroke—than urban Americans. These geographic health disparities are likely to grow as approximately one third of rural hospitals are at risk of closing. When hospitals close, patients cannot access advanced imaging, laboratory testing, and specialty medical services. Platform Accelerating Rural Access to Distributed & Integrated Medical care (PARADIGM) will deliver hospital-level care via a multi-purpose Care Delivery Platform (CDP) that is as convenient as telehealth. The CDP will pioneer new developments in point-of-care diagnostics, ensure seamless data exchange between medical devices and electronic health records (EHRs), and offer real-time guidance for medical tasks. The CDP is designed for large-scale deployment by healthcare systems, particularly in rural and resource-limited settings. Achieving this goal will involve multiple parallel work streams including the development of a miniaturized self-shielded CT scanner that achieves >80% reduction in size, weight, and power from standard scanners; software that connects remote medical devices with EHRs; and intelligent task guidance systems to provide real-time, interactive decision support for healthcare workers to perform functions beyond their usual training. These innovations will be integrated into a rugged electric vehicle (EV) platform to create a seamless and efficient environment for advanced and customized care delivery. Health systems will deploy CDPs across the country to evaluate CDP-based care in a broad range of use cases for clinical effectiveness and financial sustainability. ARPA-H intends to host a PARADIGM Proposers' Day in Phoenix, AZ during the week of February 12, 2024. Attendance at the Proposers' Day is not required to propose to the final Program Solicitation. Additional details, including registration information, will be provided as it becomes available.

113221	Notice of Special Interest (NOSI): Administrative Supplements for Validation Studies of Analytical Methods for Dietary Supplement Constituents (Admin Supp - Clinical Trial Not Allowed)	Office of Dietary Supplements/NIH/DHHS	NOT-OD-22-202	15-Apr-2024	Not Specified

Deadline Dates (ALL)	01-Apr-2024 [Optional][LOI/Pre-App], 15-Apr-2024
Synopsis	<p>This Notice of Funding Opportunity (NOFO), issued by the Office of the Director (OD), National Institutes of Health (NIH), invites applications from entities/institutions in Institutional Development Award (IDeA)-eligible states to participate as the Data Coordinating and Operations Center (DCOC) in the Environmental influences on Child Health Outcomes IDeA States Pediatric Clinical Trials Network (ECHO ISPCTN). This RFA runs in parallel with companion RFA (Clinical Sites RFA-OD-24-008) that will solicit applications for ECHO ISPCTN Clinical Sites. The ECHO ISPCTN DCOC and Clinical Sites together will form the ECHO ISPCTN. The ECHO ISPCTN is the intervention component of the ECHO Program and supports its overall mission to enhance the health of children for generations to come. The DCOC award budget will fund approximately five multicenter pediatric clinical trials with each trial related to prevention or treatment of one or more of ECHO’s five outcome areas of interest: pre-, peri-, and postnatal outcomes; upper and lower airways; obesity; neurodevelopment; and positive health. Overall, the five trials should address at least two of the five areas. The DCOC will support the ECHO ISPCTN Clinical Sites to Develop, conduct, and disseminate findings from multicenter clinical trials research, assuring the participation of children living in rural or underserved communities in IDeA states Build pediatric clinical trial research capacity in IDeA states funded by the ECHO ISPCTN Engage interested parties such as community members, nonprofit organizations, and professional societies to enhance ECHO ISPCTN clinical trial impact, transferability, rigor, and feasibility Through the rigorous use of appropriate scientific methodology and by recruiting and retaining the numbers of participants that justify multicenter trials, the ECHO ISPCTN aims to provide valid and generalizable answers to intervention research questions relevant to the health of children from rural or underserved backgrounds. The ECHO ISPCTN awardees will be primarily responsible for initiating and conducting clinical trials, although they may collaborate with other NIH research networks or subject matter experts outside the network. This NOFO requires a Plan for Enhancing Diverse Perspectives (PEDP), which will be assessed as part of the scientific and technical peer review evaluation. Applications that fail to include a PEDP will be considered incomplete and will be withdrawn. Applicants are strongly encouraged to read the NOFO instructions carefully and view the available PEDP guidance material.</p>

114947	Biodiversity on a Changing Planet	National Science Foundation	23-542	21-Mar-2024	Not Specified
	<p>Contact Name: Matthew D. Carling</p> <p>Contact Telephone: 703-292-2134</p> <p>Contact Email: biodiversity@nsf.gov</p> <p>Sponsor Website: Link to sponsor website</p> <p>Program URL: Link to program URL</p> <p>Deadline Dates (ALL): 21-Mar-2024</p> <p>Synopsis: The BoCP program is a cross directorate and international program led by NSF that invites submission of interdisciplinary proposals addressing grand challenges in biodiversity science within the context of unprecedented environmental change, including climate change. Successful BoCP proposals will test novel hypotheses about functional biodiversity and its connections to shifting biodiversity dynamics on a changing planet, with an emphasis on integrative research into the complex intersections among climatic, geological, paleontological, and biological processes. Integrative research is likely to combine multiple perspectives--including organismal, species, ecological, evolutionary, phylogenetic, geological, and/or paleontological approaches-- at various scales. Proposals that seek to improve predictive capability about functional biodiversity across temporal and spatial scales by considering the linkages between past, present, and future biological, climatic, and geological processes are also encouraged. While this focus complements several core programs at NSF, it differs by requiring an integrative approach to understanding functional biodiversity as it relates to shifting biodiversity dynamics under changing environmental conditions. The program supports both US-only collaborative proposals and proposals with international partnerships with the National Natural Science Foundation of China (NSFC), the São Paulo Research Foundation (FAPESP) of Brazil, and the National Research Foundation (NRF) of South Africa. International collaborative proposals are to be submitted jointly, with the US PIs submitting to NSF and the collaborating Chinese, Brazilian, or South African PIs submitting to their appropriate national funding agencies.</p>

	<p>Program URL Link to program URL</p> <p>Deadline Dates (ALL) 01-Mar-2024</p> <p>Synopsis The MCA program offers an opportunity for scientists and engineers at the mid-career stage to substantively enhance and advance their research program and career trajectory. Mid-career scientists are at a critical career transition stage where they need to advance their research programs to ensure long-term productivity and creativity but are often constrained by service, teaching, or other activities that limit the amount of time devoted to research. MCA support is expected to help lift these constraints to reduce workload inequities and enable a more diverse scientific workforce (more women, persons with disabilities, and individuals from groups that have been underrepresented) at high academic ranks.</p>

	Synopsis	To address ecological questions that cannot be resolved with short-term observations or experiments, NSF established the Long-Term Ecological Research Program (LTER) in 1980. Two components differentiate LTER research from projects supported by other NSF programs: 1) the research is located at specific sites chosen to represent major ecosystem types or natural biomes, and 2) it emphasizes the study of ecological phenomena over long periods of time based on data collected in			

National Science Foundation (NSF) Funding Opportunities

SPIN ID	Program Title	Sponsor Name	Sponsor Number	Deadline Date	Funding Amount														
	<p>five core areas. Ongoing research at LTER sites is expected to contribute to the development and testing of fundamental ecological theories and significantly advance understanding of the long-term dynamics of populations, communities, and ecosystems. It often integrates multiple disciplines and, through cross-site interactions, may examine patterns or processes over broad spatial scales. Recognizing that the value of long-term data extends beyond use at any individual site, NSF requires that data collected by all LTER sites be made publicly accessible in compliance with NSF data requirements. NSF currently supports 27 LTER sites and a network office. The program is on-going and proposals for new LTER sites are periodically invited when a need is identified to balance the LTER portfolio or when funding opportunities arise to support new LTERs. These opportunities are announced through separate solicitations. This solicitation governs submission of renewal proposals for active LTER site awards, not new sites.</p>

Deadline Dates (ALL)	12-Mar-2024
Synopsis	<p>Strengthening American Infrastructure (SAI) is an NSF program seeking to stimulate human-centered fundamental and potentially transformative research aimed at strengthening America’s infrastructure. Effective infrastructure provides a strong foundation for socioeconomic vitality and broad improvement in quality of life. Strong, reliable and effective infrastructure spurs private-sector innovation, grows the economy, creates jobs, makes public-sector service provision more efficient, strengthens communities, promotes equal opportunity, protects the natural environment, enhances national security and fuels American leadership. Achieving these objectives requires the integration of expertise from across all science and engineering disciplines. SAI focuses on how fundamental knowledge about human reasoning and decision-making, governance, and social and cultural processes enables the building and maintenance of effective infrastructure that improves lives and society and builds on advances in technology and engineering. Successful projects will represent a convergence of expertise in one or more social, behavioral or economic sciences, deeply integrated with other disciplines to support substantial and potentially pathbreaking fundamental research applied to strengthening a specific focal infrastructure.</p>

	<p>Moore's Law, underpinned by new materials, processes, devices, and architectures. The developments in these underpinning areas have often progressed independent of the application area, which has delayed their incorporation into the next-generation technologies. Closing that gap between the essential components in the technology chain is now required to ensure further progress. The materials, devices, and systems need to be co-designed, that is, they need to be designed with simultaneous consideration of elements of the technology chain. The benefits of a co-design approach as a principal methodology to advance semiconductor technology have been widely recognized in a variety of government and industry studies. This holistic, co-design approach can more rapidly create high-performance, robust, secure, compact, energy-efficient, and cost-effective solutions. The technological drivers include the need to: dramatically reduce the energy consumption of computation and communication technologies; reduce the impact of device and system manufacturing on the environment; increase performance speed and capacity; and develop new computing systems. The goal of this solicitation is to cultivate a broad coalition of researchers and educators from across science and engineering communities that utilizes a holistic, co-design approach to fundamental research and workforce education and training, to enable rapid progress in new semiconductor technologies. The future of semiconductor manufacturing will require the design and deployment of diverse new technologies in materials, chemical and materials processes, devices, and architectures through the development of application-driven systems. Partnerships between industry and academic institutions are essential to spur innovation and technology transfer, to inform the research needs, and to train the future workforce.</p>

Synopsis	<p>The NSF Expanding Capacity in Quantum Information Science and Engineering (ExpandQISE) program aims to increase research capacity and broaden participation in Quantum Information Science and Engineering (QISE) and related disciplines through the creation of a diversified investment portfolio in research and education that will lead to scientific, engineering and technological breakthroughs, while securing a talent pipeline in a field where workforce needs of industry, government and academia continue to outgrow the available talent. The ExpandQISE program helps build and maintain a close connection between new efforts and existing impactful work in research, research training, education, outreach, and broadening</p>

participation done at the existing QISE Centers such as, for example but not limited to NSF QLCI Institutes, DOE National Research Centers, NSF Quantum Foundries, or leading QISE research Institutions, while creating and nurturing necessary critical mass at Institutions not yet fully involved in QISE. In keeping with the NSF goal of increasing the participation of all members of society in the scientific enterprise, institutions from EPSCoR jurisdictions, and institutions at which more than 50% of enrolled students come from groups that are currently under-represented in the sciences, e.g. minority-serving institutions (MSIs), are especially encouraged to apply.

	Synopsis	<p>The Substance Abuse and Mental Health Services Administration (SAMHSA), Center for Substance Abuse Treatment (CSAT), is accepting applications for the fiscal year (FY) 2024 Grants to Expand Substance Use Disorder Treatment Capacity in Adult and Family Treatment Drug Courts program. The purpose of this program is to expand substance use disorder (SUD) treatment and recovery support services in existing drug courts. The program recognizes the need for treatment instead of incarceration for individuals with SUDs. Recipients are expected to provide prevention, harm reduction, treatment, and recovery services for individuals with SUD involved with the courts. With this program, SAMHSA aims to improve abstinence from substance use, housing stability, employment status, social connectedness, health/behavioral/social consequences, and reduce criminal justice involvement.</p>

Synopsis

Proposals are being accepted against the following topic: HORIZON-JU-IHI-2023-04-01-two-stage - Expanding translational knowledge in minipigs: a path to reduce and replace nonhuman primates in non-clinical safety assessment The overall objective of this topic is to characterise the minipig for use in R&D of new therapeutics and innovative medical technologies. The knowledge generated in this proposal may facilitate innovative health solutions and improve disease understanding and human predictions. The goal is to advance biomedical R&D by generating background scientific data to evaluate if the minipigs could be a viable and feasible alternative to NHPs in key therapeutic areas, with a special focus on translatability from minipigs to humans. This topic is part of the Innovative Health Initiative 4th call for proposals. The Innovative Health Initiative Joint Undertaking (IHI JU) is a partnership between the European Union and industry associations representing the sectors involved in healthcare, namely COCIR (medical imaging, radiotherapy, health ICT and electromedical industries); EFPIA, including Vaccines Europe (pharmaceutical industry and vaccine industry); EuropaBio (biotechnology industry); and MedTech Europe (medical

	Synopsis	Proposals are being accepted against the following topic: HORIZON-JU-IHI-2024-06-01-two-stage -- Support healthcare system resilience through a focus on persistency in the treatment of chronic diseases This topic is part of the Innovative Health Initiative 6th call for proposals. The main outcome of this research collaboration is to better understand why significant advances in technology in recent years have not contributed to widespread improvements in healthcare systems, which still struggle to keep more than 50 % of people on chronic disease treatment for longer than 12 months. The goal is to develop and pilot innovative and multi-stakeholder approaches leveraging social innovation activities and scalable technology to improve the health outcomes of people living with chronic diseases by supporting treatment persistency with a particular focus on diabetes, obesity, and cardiovascular disease. Persistency is part of drug adherence and is defined as the length of time between starting treatment and

	<p>the last dose which immediately precedes discontinuation of medication. Although novel treatments are becoming more available with major improvements in convenience and efficacy, poor persistency to treatment is still a major challenge in the healthcare system. Insights from pilots under this topic will be shared with relevant stakeholders of the healthcare ecosystem to improve outcomes for people living with chronic diseases. The pilots should include cardiometabolic diseases, such as diabetes, obesity, and cardiovascular disease. Other chronic diseases may be considered in this collaboration if they contribute to the overall understanding of barriers and opportunities. Moreover, it is not the goal to develop new technologies and/or pharmaceutical drugs during the course of the project, but rather to address how insights and new approaches can be applied in clinical practice and implemented in guidelines and recommendations.</p> <p>Applicant Types</p> <p>Funding Limit 11,300,000.00 maximum</p> <p>Limited Submission No</p>

The awardee will be asked to write a review article on teaching experiences for publication in the SIMB News. The Waksman Outstanding Teaching Award is presented to a recipient every year at the SIMB annual meeting. The nominee must be an active, full time professor at a recognized institution of higher education for a minimum of 10 years or attainment of emeritus status. They must be actively involved in research in their respective teaching field while carrying a teaching load. The nominee should be involved in or have made contributions to research that lead to advances in their area of industrial or applied microbiology or biotechnology.
