

Funding Opportunities Continuous Submissions

Last updated: 6/25/2023

This funding opportunity packet contains information on funding opportunities with open deadlines. It also contains information about the National Institutes of Health (NIH) parent announcements. The opportunities are organized in the following order:

1. National Institutes of Health (NIH)
2. National Science Foundation (NSF)
3. Other Federal
4. Non Federal

Use the bookmarks to navigate to each section.

Parent Announcements (For Unsolicited or Investigator-Initiated Applications)

Parent announcements are broad funding opportunity announcements allowing applicants to submit investigator-initiated applications for specific [activity codes](#). They are open for up to 3 years and use [standard due dates](#).

Not all NIH Institutes and Centers participate on all parent announcements. Before submitting your application, make sure the NIH Institute or Center that might be interested in your research is listed as a participating organization in the announcement.

The following Parent Announcements are available (sorted by Activity Code):

[[Research \(R\)](#) | [Research Training \(T\)](#) | [Career Development \(K\)](#) | [Fellowships \(F\)](#) | [Admin Supplements](#) | [Post-award Administrative Action](#)]

Synopsis Through this Notice of Special Interest (NOSI), NCCIH supports cutting-edge Small Business Innovation Research (SBIR) and Small Business Technology Transfer (STTR) grant applications from small business concerns that will develop and/or validate devices or electronic systems that can: 1) monitor biologically or behaviorally based processes applicable to MBIs or 2) be used in optimizing the practice or increasing the efficacy of MBIs. The applications should: 1) lead to the development of new technologies, 2) adapt existing innovative technologies, devices, and/or electronic systems, 3) repurpose existing devices and electronic systems, or 4) conduct testing of single or combined components of an integrated, long-term, automated, wearable stimulation device or electronic system to monitor or enhance the mechanistic processes or functional outcomes of MBIs. For the purposes of this NOSI, MBIs are nonpharmacologic approaches that include mind/brain focused interventions (e.g., meditation, mindfulness, hypnosis, art/music) or combined mind and body treatment (e.g., acupuncture, massage, spinal manipulation/mobilization) or meditative movement practices (e.g., yoga, tai chi, qi gong).

102542	Notice of Special Interest (NOSI): Translation of BRAIN Initiative Technologies to the Marketplace	National Center for Complementary and Integrative Health/NIH/DHHS	NOT-MH-21-125	Continuous Submission	Not Specified

Synopsis	This Notice of Special Interest (NOSI) encourages the translation of the Brain Research through Advancing Innovative Neurotechnologies® (BRAIN) Initiative-supported technologies from academic and other non-small business research sectors to the marketplace. Small Business Concerns (SBCs) are encouraged to submit Small Business Innovation Research (SBIR) and Small Business Technology Transfer (STTR) grant applications that propose to further develop, optimize, validate and scale such technologies for commercial dissemination. Additionally, SBIR and STTR applications supporting the development and commercialization of novel technologies that fit within the mission of the BRAIN Initiative are encouraged.		
080492	The Physician Scientist Development Program (PSDP)	National Human Genome Research Institute/NIH/DHHS	Continuous Not Submission Specified

Program URL	Link to program URL		
Deadline Dates (ALL)			
Synopsis	The Physician Scientist Development Program (PSDP) is a mentored, pre-tenure track junior faculty position. The program lasts for three to five years during which time the incumbent designs and implements an integrated, translational research program. The key elements of support for the program are that it is prospectively and stably funded, that defined mentorship is provided, and that the program takes advantage of the research environment of the intramural National Institutes of Health (NIH), the National Human Genome Research Institute (NHGRI) and the NIH Clinical Center.

Synopsis	The Center for Inherited Disease Research (CIDR) high-throughput genotyping, sequencing and supporting statistical genetics services are designed to aid the identification of genes or genetic modifications that contribute to human health and disease or to enhance existing collections of well-phenotyped specimens by the addition of genotype or next-generation sequence data. The laboratory specializes in genomic services that cannot be efficiently carried out in individual investigator laboratories. CIDR provides the most up-to-date platforms, services and statistical genetic support. This is an NIH-wide initiative that is managed by NHGRI. Information about current services offered can be accessed via: http://www.cidr.jhmi.edu .

Program URL	Link to program URL
Deadline Dates (ALL)	
Synopsis	Data science is an important cross-cutting research approach in the NIDA Strategic Plan and increasing the capacity of experts in data science for biomedical research of addiction is critical. The purpose of this Notice is to highlight NIDA's high-priority interest in receiving applications that will support training and career development in Big Data and Computational Science (i.e., Data Science) within the overall field of addiction research. Grants supported under this Notice can be from individuals at formative career stages or from established investigators proposing training programs that will support early career scientists. Individuals from diverse backgrounds, including those from groups historically underrepresented in the STEM fields, who wish to pursue further studies or careers in Big Data and Computational Science as it relates to addiction research are highly encouraged to apply.

095569	Notice of Special Interest (NOSI): Research on Co-morbid Substance Use, Substance Use Disorders, and Other Psychiatric Disorders	National Institute on Drug Abuse/NIH/DHHS	NOT-DA-20-004	Continuous Not Submission Specified

Program URL	Link to program URL
Deadline Dates (ALL)	
Synopsis	The purpose of this Notice is to encourage the submission of research project grant applications that address co-morbid substance use and/or substance use disorders, and other psychiatric disorders. Research in response to this NOSI may include etiologic investigations to inform prevention intervention, intervention

development and testing, and research to address service delivery strategies to address co-morbid conditions. The intent is to encourage a broad portfolio of research, that enhances understanding of risk, etiology, prevention, treatment and service delivery related to co-occurring conditions.

114482	Notice of Special Interest (NOSI): Administrative Supplement for Rapid Translation of Substance Use and Addiction Epidemiology and Prevention Intervention Research	National Institute on Drug Abuse/NIH/DHHS	NOT-DA-24-003	07-Jan-2026	Not Specified
	<p>Contact Name Alexa Romberg, PhD</p> <p>Contact Telephone 301-435-0264</p> <p>Contact Email alexa.romberg@nih.gov</p> <p>Sponsor Website </p> <p>Program URL Link to program URL</p> <p>Deadline Dates (ALL) 07-Jan-2026</p> <p>Synopsis This Notice of Special Interest (NOSI) invites requests for administrative supplements to existing NIH grants and cooperative agreements that will translate findings between epidemiology and prevention intervention research related to substance use and addiction. Successful and rapid translation requires active partnership between epidemiology and prevention science, creating cross-disciplinary teams with diverse scientific perspectives. Oftentimes, this translation can take many years or never occur. Epidemiology projects may be designed with the intention of informing prevention, but without specific aims or collaborations in place to move forward with translation. Similarly, prevention intervention studies may generate new hypotheses about substance use development or etiology, but these hypotheses may remain untested without collaboration between the prevention team and epidemiological researchers.</p>

Synopsis

The National Institutes of Health (NIH) and the Center for Disease Control and Prevention hereby notify Program Director(s)/Principal Investigator(s) (PD(s)/PI(s)) holding specific types of research grants (activity codes listed above) that funds are available for administrative supplements to enhance the diversity of the research workforce by recruiting and supporting students, postdoctorates, and eligible investigators from underrepresented backgrounds, including those from groups that have been shown to be nationally underrepresented in health-related research. This supplement opportunity is also available to PD(s)/PI(s) of research grants who are or become disabled and need additional support to accommodate their disability in order to continue to work on the research project. Administrative supplements must support work within the scope of the original project. This Funding Opportunity Announcement (FOA) is designed specifically for applicants proposing research that does not involve leading an independent clinical trial, a clinical trial feasibility study, or an ancillary clinical trial. Applicants to this FOA are permitted to propose research experience in a clinical trial led by a mentor or co-mentor.

 Deadline Dates (ALL)

Synopsis

The purpose of this Notice of Special Interest (NOSI) is to announce that the National Center for Complementary and Integrative Health (NCCIH), the National Cancer Institute (NCI), the National Institute of Aging (NIA), the National Institute of Allergy and Infectious Diseases (NIAID), the National Institute of Biomedical Imaging and Bioengineering (NIBIB), the Eunice Kennedy Shriver National Institute of Child Health and Human Development (NICHD), the National Institute of General Medical Sciences (NIGMS), and the National Human Genome Research Institute (NHGRI) are encouraging new applications to advance research activities relevant to synthetic biology. The annual Synthetic Biology Consortium Meeting is organized to facilitate the sharing of tools and resources for synthetic biology research. Participants use this group as a forum to collaborate and receive feedback on current topics and future directions in synthetic biology. The PD(s)/PI(s) and other appropriate project staff associated with awards through this NOSI are strongly encouraged to attend the annual NIH Synthetic Biology Consortium Meeting, either in-person or through a virtual conferencing service. Furthermore, at least one trainee is encouraged to attend the annual meeting. If necessary, requests will be considered to support in-person attendance for the PD(s)/PI(s) and the appropriate project staff to participate in this annual meeting. To inquire about travel support to the annual NIH Synthetic Biology Consortium meeting, please contact the appropriate scientific/research contact listed in NOT-EB-20-017.

Synopsis	The National Institutes of Health (NIH) hereby notify Small Business Concerns (SBCs) holding Small Business Innovation Research (SBIR) and Small Business Technology Transfer (STTR) grants that funds are available for administrative supplements to enhance the diversity of the research and entrepreneurial workforce by recruiting and supporting students, postdoctorates, and eligible investigators from diverse backgrounds, including those from groups that have been shown to be underrepresented in health-related research or in the SBIR and STTR programs. This supplement opportunity is also available to PD(s)/PI(s) of research grants who are or become disabled and need additional support to accommodate their disability in order to continue to work on the research project. Administrative supplements must support work within the scope of the original project. This Funding Opportunity Announcement (FOA) is designed specifically for applicants proposing research that does not involve leading an independent clinical trial, a clinical trial feasibility study, or an ancillary study to a clinical trial. Applicants to this FOA are permitted to propose research experience in a clinical trial led by a mentor or co-mentor.

Program URL	Link to program URL
Deadline Dates (ALL)	
Synopsis	This funding opportunity announcement (FOA) establishes an accelerated review/award process to support research to understand health outcomes related to an unexpected and/or time-sensitive event (e.g., emergent environmental threat; pandemic; change in local, state, or national policy; natural disaster). Applications in response to this FOA must demonstrate that the research proposed is time-sensitive and must be initiated with minimum delay due to a limited window of opportunity to collect baseline data, answer key research questions, and/or prospectively evaluate a new policy or program. This FOA is intended to support opportunities in which empirical study could only be available through expedited review and funding, necessitating a substantially shorter process than the typical NIH grant review/award cycle. The time from submission to award is expected to occur within 4-5 months. However, administrative requirements and other unforeseen circumstances may delay issuance dates beyond that timeline.

Synopsis

NSF EPSCoR welcomes proposals for workshops in areas of science and engineering that advance the program's major goals and promise to engage a broad community of investigators or practitioners, while including the intentional involvement of the EPSCoR community. NSF EPSCoR workshops aim to bring communities of thought together to discuss recent research or education findings, explore topics in emerging areas of science and engineering, foster innovative collaborations, expose researchers or trainees to new research and education tools or techniques, or respond to NSF EPSCoR calls for workshops on specific topics.

Sponsor Website	
Program URL	Link to program URL
Deadline Dates (ALL)	
Synopsis	<p>Building on NSF's history of investments in data and computational sciences and USDA/NIFA's history of investments in agricultural science, NSF and USDA/NIFA wish to notify the community of our intention to jointly fund convergent research that combines methods in agricultural, biological, and computer and information science and engineering to address pressing challenges and opportunities in digital agriculture. This Dear Colleague Letter (DCL) is aligned with NSF's Harnessing the Data Revolution Big Idea, and aims to build capacity across disciplinary boundaries, in preparation for larger scale investments at the intersection of computational, agricultural, and biological sciences. Motivated by the increasing volumes of data, faster computation, and algorithmic advances, there is an opportunity to apply transformative, data-driven research methods to the agriculture sector that are responsive to and will yield meaningful insights for farmers, other stakeholders, and society at large. Of interest for this DCL are applications focused on economically important plants, animals, and their environments—in particular food, fuel, feed, and health—and where research outcomes in a particular application area may be transferable to, or informative for, other agricultural application areas. Relevant stakeholders can be integrated into the proposed research activities, including as partners in the project, if appropriate for the project.</p>

097665	Dear Colleague Letter: Sentinel Cells for Surveillance and Response to Emergent Infectious Diseases (Sentinels)	National Science Foundation	NSF 20-105	Continuous Submission Specified

Deadline Dates (ALL)

aggarza@nsf.gov

[Link to program URL](#)

Synopsis

With this Dear Colleague Letter (DCL), the sponsor highlights the interest of existing programs in the Directorate for Biological Sciences (BIO) and the Directorate for Engineering (ENG) in interdisciplinary research for the development of novel biological platforms that are capable of sensing and responding to emerging infectious agents. The mechanism of sensing should be adaptable and or evolvable such that the sentinel cells, or other appropriate biotechnology solutions, are robust to a range of emergent threats, and/or can easily be reprogrammed and deployed once a new threat is identified. The platform's response should be one or more of the following: alert the user, destroy the threat, protect the host, initiate an immune response or other strategies that would ensure mitigation of the threat. Sentinel cells and organisms that detect and respond to infectious agents with expanding footprints in a host population or expanding host ranges are of particular interest, as the early detection of these infectious agents might have value in preventing future pandemics. In addition, fundamental science and technology that would lead to the development of the envisioned sentinel cells and organisms are also of interest. Investigators are encouraged not to be limited in their approach, but to think broadly about innovations leveraging biology and engineering to advance adaptable detection of emerging biological threats.

Program URL	Link to program URL
Deadline Dates (ALL)	
Synopsis	<p>This Dear Colleague Letter (DCL) encourages the science and engineering communities to develop forward-thinking research that will demonstrably aid in the Nation's goal of reaching net-zero greenhouse gas (GHG) emissions and developing approaches for adapting to the change that is already occurring. CAS: Innovative Solutions to Climate Change is a call to action that encourages the submission of certain types of proposals to appropriate existing NSF core programs to lay the foundation for disciplinary and interdisciplinary research and to answer fundamental questions related to novel approaches and solutions to climate change. NSF's Small Business Innovation Research (SBIR) and Small Business Technology Transfer (STTR) Programs are also interested in supporting entrepreneurial efforts on these topic areas. As outlined in more detail below, research ideas focused on short- and long-term sustainable solutions are sought as are conference (workshop) proposals that identify specific gaps in existing research approaches. The project description should clearly articulate climate relevance and contribute to new approaches regarding innovative solutions that address climate change mitigation and adaptation.</p>

Synopsis	<p>The emergence and spread of the new respiratory Corona virus Disease 2019 (COVID-19), which was declared a Public Health Emergency in the United States on January 31, 2020, has catalyzed significant activity by Federal, state, and local governments; the healthcare community; residents across the United States; and people around the world. The National Biodefense Strategy is the nation's plan for ensuring that the country is prepared for, responding to, and recovering from health incidents such as these. As a partner in the Strategy, the Department of Energy (DOE) contributes science and technology to support these efforts. This is not the first emerging infectious disease event that the world will face, nor will it be the last. DOE is soliciting ideas about how DOE and the National Labs might contribute resources to help address COVID-19 through science and technology efforts and collaborations.</p>

Synopsis	A primary emphasis of the USSOCOM Biomedical, Human Performance, and Canine Research Program is to identify and develop techniques, knowledge products, and materiel (medical devices, drugs, and biologics) for early intervention in life-threatening injuries, prolonged field care (PFC), human performance optimization, and canine medicine/performance. Special Operations Forces (SOF) medical personnel place a premium on medical equipment that is small, lightweight, ruggedized, modular, multi-use, and designed for operation in extreme environments. The equipment must be easy to use, require minimum maintenance, and have low power consumption. Drugs and biologics should not require refrigeration or other special handling. All materiel and related techniques must be simple and effective, and easily modified for commercialization. Research projects may apply existing scientific and technical knowledge for which concept and/or patient care efficacy have already been demonstrated to meet SOF requirements.

	Synopsis	<p>The U.S. Agency for International Development (the Agency), Office of Population and Reproductive Health (PRH) is pleased to announce the Promoting Results and Outcomes through Policy and Economic Levers (PROPEL) Annual Program Statement (APS). This APS contributes to the Agency's health development priorities, which correspond to the goals of: preventing maternal and child deaths, controlling the HIV/AIDS epidemic, and combating infectious disease. The purpose of this APS is to improve the enabling environment for equitable and sustainable health services, supplies and delivery systems through: policy development and implementation; adequate, predictable, and sustainable financing; enhanced government stewardship, transparency, and accountability; and an engaged and informed civil society prepared to advocate for improved systems and outcomes. This APS has a specific emphasis on voluntary, rights-based family planning and reproductive health (FP/RH), and FP/RH integration with maternal and child health (MCH), and HIV/AIDS. It will encourage work across health elements, systems, and development sectors, with specific efforts in increasing FP/RH demand, facilitating FP uptake, and advancing other FP/RH-related outcomes.</p>

	Synopsis	Funding will be available for projects in the field of non-commercial clinical research that are thoroughly described in terms of objectives and methods. Commercial organisations may not have a direct commercial interest in the results. Projects must involve human patients or healthy subjects and the aim must be to generate new scientific knowledge and insights that improve clinical practice and patient treatment. Applicants must be able to show that they have conducted suitable preparatory work related to the proposed studies. Project proposals must be evaluated as representing top-notch clinical research by international standards and will undergo an international peer review.

	Sponsor Website	Link to sponsor website		
	Program URL	Link to program URL		
	Deadline Dates (ALL)			
	Synopsis	BHF awards professorships to individuals with outstanding cardiovascular research achievements and leadership qualities. Applications, which require an initial outline proposal, should be made by the Head of the School or Faculty where the professor will take up the appointment. Due to the significant reduction in the BHF's income, the research budget for the current financial year has been restricted to around half of last year's. Competition for grants will therefore be higher, though we still wish to fund the best applications of whatever type. Criteria for success remain unchanged; including novelty, importance, quality of study design, feasibility, and value for money.

	Synopsis	The Best Brains Exchange is a one-day, in-camera meeting for decision makers and researchers with expertise on a topic deemed high priority by the Ministry. Specifically, it is a forum to highlight existing and relevant research evidence on the topic (and where the gaps in evidence lie), to bring together both decision maker and researcher expertise on the issue, and to candidly discuss the applicability of the research for the province. The Best Brains Exchange is an informal forum for		

interaction, exchange and mutual learning between researchers and decision makers in order to support and facilitate the sharing and use of information on a high priority topic.

Contact Email	jyoung@crohnscolitisfoundation.org		
Sponsor Website	Link to sponsor website		
Program URL	Link to program URL		
Deadline Dates (ALL)			
Synopsis	IBD Plexus® was founded by the Foundation to advance science, accelerate progress towards precision medicine and improve the care of patients living with IBD. The first-of-its kind, national-scale, cloud-based platform integrates clinical, patient-reported, genetic and other molecular data from diverse research study cohorts, real world clinical care settings and patients' experiences. IBD Plexus provides researchers with access to research-ready datasets to more rapidly perform activities that promise to speed treatment development, optimize existing therapies through development of		

biomarkers and diagnostics, and improve health outcomes. IBD Plexus unites clinicians, scientists, educators, industry partners, and patients to answer questions that are critically important to advance the field of IBD research. The multi-component IBD Plexus includes a biobank, pediatric and adult patient clinical data, patient-reported data, biosamples, central reference labs to generate molecular data (genetic, transcriptomic, microbiomic, etc.), as well as an analytical platform to house, organize, aggregate, and provide data for research. The novel technological platform supports the mining of data for insights into IBD causes, mechanisms, biomarkers and potential new treatments. The "exchange" model functions under the guiding principle that researchers who take advantage of the resources will also contribute back the raw data (not the analyses) they derive from patient biosamples. As more stakeholders, including patients, clinicians, and researchers, contribute data, the IBD Plexus platform will evolve into an even more powerful database for future scientific research benefitting the entire IBD community

Contact Name	
Contact Telephone	+44 (0)1506 639613
Contact Email	admin@espid.org
Sponsor Website	Link to sponsor website
Program URL	Link to program URL
Deadline Dates (ALL)	
Synopsis	The Collaborative Research Meeting Award supports research meetings, which aid the initiation or development of interdisciplinary research projects and networks in PID. The workshops should be directed at researchers at all levels of qualification from doctoral students to established scientists. The core of the applicants should be ESPID scientists of good standing, yet reaching out to scientists with other specializations (e.g. epidemiologists, microbiologists, immunologists) is encouraged. The Collaborative Research Meeting Award is available for already established and funded networks, but it is focused on those at an early stage of development, or where wider collaboration across Europe and beyond is being sought. In order to assure sufficient interest in the research topic, which is essential for forming fruitful international collaborations, the application should be signed by researchers from at least three countries.

	Synopsis	The IBRA Research & Education Committee, in close collaboration with the IBRA Board of Directors, is concerned principally in evaluating, for financial support, research projects dealing with bone biology and the improvement or development of internal fixation devices for maxillofacials surgery and the surgery of upper and lower limbs. IBRA International Bone Research Association will consider for support only small grant proposals dealing exclusively with improvement and development of medical devices for internal fixation in the aforementioned clinical areas. Funding by the IBRA		

Association is open to everyone, not just members. Submitted project proposals are evaluated by the Research & Education Committee.

	Synopsis	The US-Ireland Research and Development Partnership is a unique initiative involving funding agencies across three jurisdictions: United States of America, Republic of Ireland & Northern Ireland. The overall goal of the Partnership is to increase the level of collaborative R&D amongst researchers and industry across the three jurisdictions. This collaboration aims to generate valuable discoveries and innovations which are transferable to the marketplace, or will lead to enhancements in health, disease prevention or healthcare. The Partnership achieves its goals through tri-partite research projects in which the funding agencies fund the elements of research undertaken in their own jurisdiction. Importantly, the Partnership must add significant value to each research programme above that achievable by the PI in each jurisdiction working alone.

Program URL	Link to program URL		
Deadline Dates (ALL)			
Synopsis	The Tres Cantos Open Lab Foundation was built around the belief that the best ideas come from collaborating with other like-minded people and organisations. The task of developing new medicines for endemic infectious diseases is too complex to be addressed by one group alone. Which is why the Tres Cantos Open Lab Foundation supports scientists from universities, not-for-profit partnerships, other research institutes and industry to advance research and development activities on global health. The Foundation reviews and selects new projects on a regular basis, and aims to support an average of 10 active open lab projects at steady state.

Synopsis	In providing Humboldt Research Fellowships for experienced researchers, the Alexander von Humboldt Foundation enables highly-qualified scientists and scholars from abroad, who completed their doctorates less than twelve years ago to spend extended periods of research (6-18 months; may be divided up into a maximum of three blocks) in Germany. Candidates are expected to have their			

own, clearly defined research profile. This means they should usually be working at least at the level of Assistant Professor or Junior Research Group Leader or be able to document independent research work over a number of years. Scientists and scholars from all disciplines and countries may apply.

Deadline Dates (ALL)				
Synopsis	The Programs to Increase Diversity Among Individuals Engaged in Health-Related Research (PRIDE) is an all-expense-paid Summer Institute, research education and mentoring initiative sponsored by the National Heart, Lung, and Blood Institute (NHLBI). This initiative addresses the difficulties experienced by junior investigators and transitioning postdoctoral scientists in establishing independent academic research careers and negotiating through the academic ranks. The primary outcome of this program is to increase the number of scientists and research-oriented faculty who			

are from backgrounds currently under-represented in the biomedical sciences and those with disabilities, by preparing them to successfully compete for external funding for scientific research in heart, lung, blood, and sleep (HLBS) disorders.
