My Visit to the Seaver Center A Social Story

The Seaver Center is at Mount Sinai in New York City. I am going to visit soon.

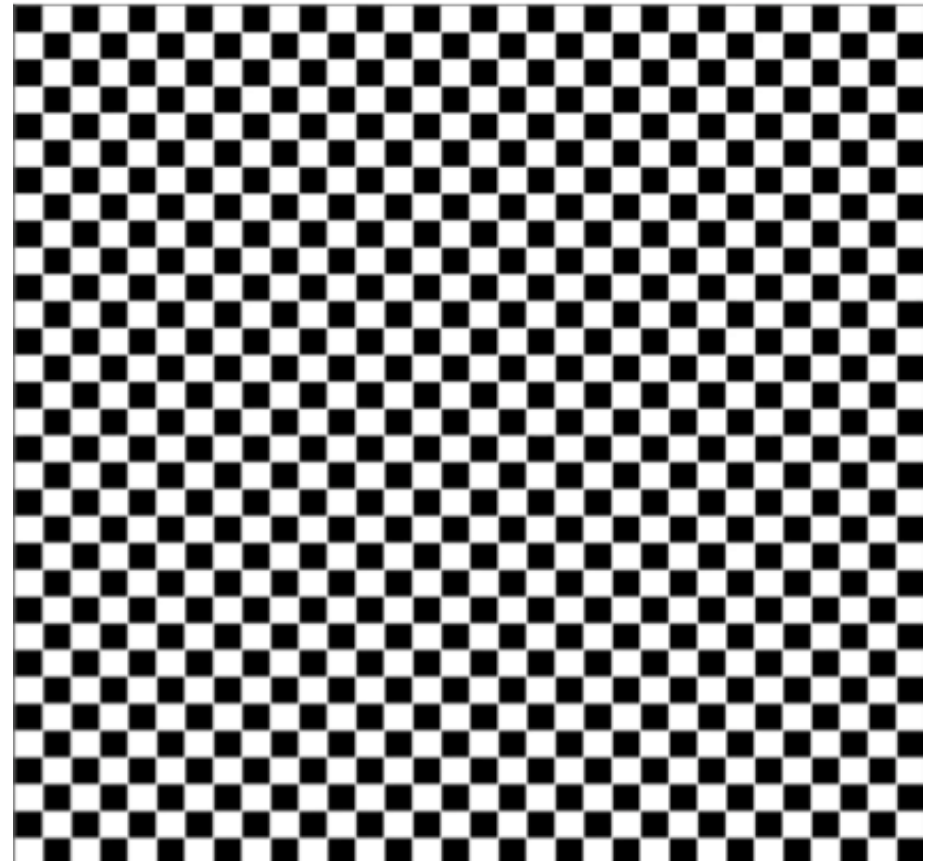

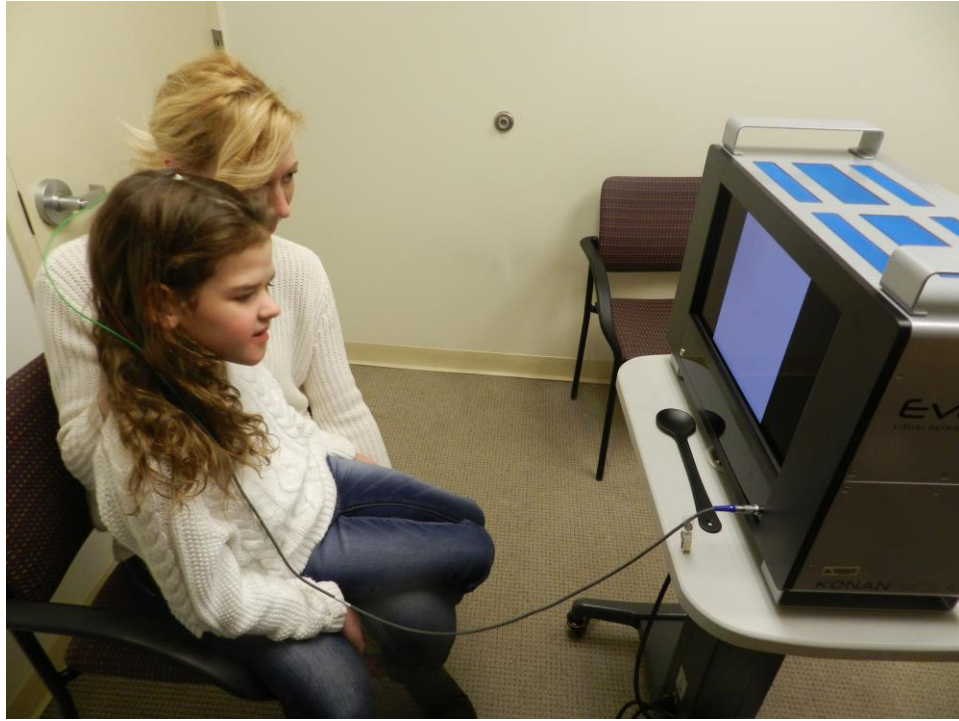

When I go to the Seaver Center I get to do many different activities. I get to explore new toys.

I get to look at pictures on screens and listen to sounds. Sometimes I wear a sticker on my forehead.

Sometimes I wear three stickers on the top of my head while I look at black and white patterns.

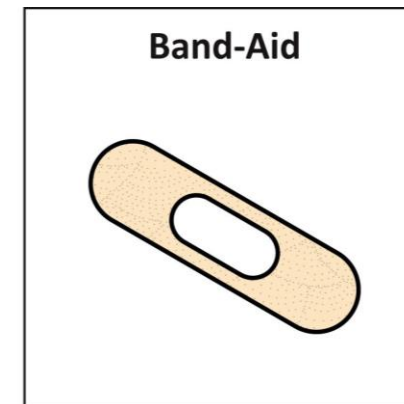

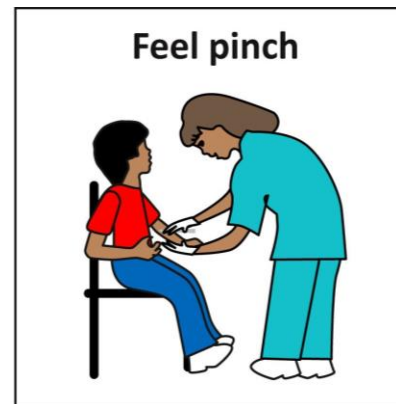

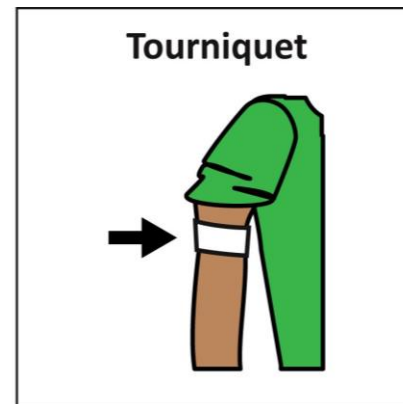

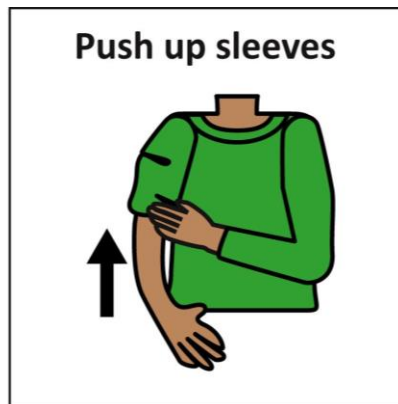

Other times I get to wear a whole cap of stickers while I listen to sounds. I also get to watch a favorite show while I sit and relax!

At every visit, I will meet with doctors who will be happy to see me!

At some visits, I might go to a different building where a nurse will draw blood from my arm.

My parents will stay with me the whole time.

At the end of each visit, I get to pick a prize to take home with me!

My favorite part about visiting the Seaver Center is the people I get to see!
