The Tisch Cancer Institute

Tisch Cancer Institute (TCI) About Us

The Tisch Cancer Institute is an NCI-designated cancer center providing comprehensive care, that was established with the vision of creating a multidisciplinary approach to clinical care and clinical research. Here at TCI, we take great pride in providing exceptional medical care to help patients live longer, healthier lives! We are committed to recruiting and developing some of the most distinguished clinicians, researchers, and support staff to advance scientific knowledge. We accelerate scientific discovery through clinical trials to improve quality of life and outcomes of our patients.

Clinical Research The Bigger Picture

A clinical research professional (CRP) works closely with principal investigators in the implementation, development, and management of clinical trials. CRPs play an integral part on the study team in that they ensure the trial activities progress smoothly. The opportunity for career progression is great within our research community because we invest in talent development for our staff to help pave your path.

Eligibility

- Degree in science or related field
- Excellent communication skills (written and oral)
- Attentive to details
- Empathetic and motivated
- Values working within a diverse workforce and treating a unique patient population

A Day in the Life of a Clinical Research Coordinator (CRC)

- Care coordination
- Data abstraction, collection, entry and analysis
- Identify and match patients to promising clinical trials
- Provide protocol expertise to guide clinicians/ investigators
- Patient advocate and community educator
- Maintain compliance with federal and institutional regulations
- Administrative liaison for projects
- Specimen management and processing

TCI is interested in growing and diversifying our clinical research workspace with you in mind. Interested in an entry level or lateral move position, join our team, and accelerate your career while making a difference.
