PubMed Interface Changes 2009

After many years, PubMed is updating its interface. **ALL FUNCTIONALITY REMAINS THE SAME**, but features and tools may be in different places. Here is information on the locations of some important features:

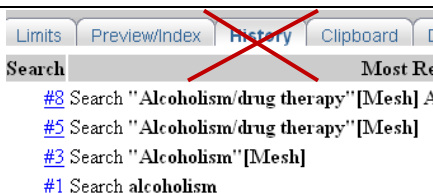

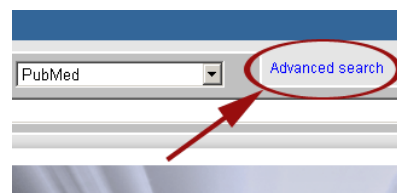

Then

Now

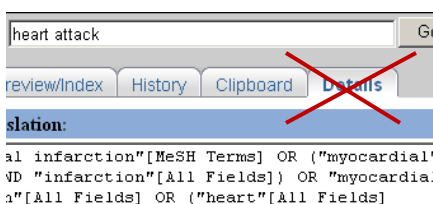

The **Limits** tab, to specify date ranges, authors, article types and more, has been removed.

Apply limits and specifications to your searches using the **Advanced Search** screen.

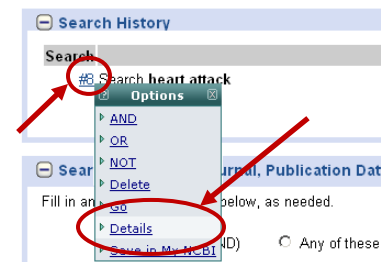

The **History** tab, to see and rerun your previous searches, has been removed

Find and rerun your previous searches on the **Advanced Search** screen.

The **Details** tab, to check how PubMed mapped your search, has been removed.

Check the Details by clicking the search number on the **Advanced Search** screen, and selecting **Details**.

In a spin: the mysterious dancing epidemic of 1518

Waller JC.
 Department of History, Michigan State University, East Grand River, East
 wallerj1@msu.edu

In 1518, one of the strangest epidemics in recorded history struck the city of Strasbourg. Hundreds of people were seized by an irresistible urge to dance, hop and leap into the air. In houses, halls and public spaces, as fear paralyzed the city and the members of the elite despaired, the dancing continued with mindless intensity. Seldom pausing to eat, drink or rest, many of them danced for days or even weeks. And before long, the chronicles agree, dozens were dying from exhaustion. What was it that could have impelled as many as 400 people to dance, in some cases to death?
