

ANNOUNCEMENT OF 1998 AWARDS

The Mount Sinai Journal of Medicine offers several prizes for manuscripts published in *The Journal* during the previous year and judged by an Awards Committee to be outstanding contributions to the medical literature. The committee's task certainly was formidable, but I believe that it has chosen wisely and well. The efforts of the members are much appreciated.

The 1998 Globus Award, established in honor of the first and long-time editor of *The Journal*, is for the best overall paper on a clinical topic. The award goes to Mitchell H. Grayson, M.D., and Bruce S. Bochner, M.D., for their paper entitled "New Concepts in the Pathogenesis and Treatment of Allergic Asthma," Volume 65, No. 4, pp. 246–256.

The 1998 Ralph Colp Award, in honor of the memory of a distinguished Chief of Surgery at The Mount Sinai Hospital, for the best paper on a surgical topic goes to Pamela L. Alberto, D.M.D., for her paper entitled "Implant Reconstruction of the Jaws and Craniofacial Skeleton," Volume 65, No. 5, pp. 316–321.

On behalf of the Editorial Staff, I am delighted to recognize the outstanding scholarship and contributions of our 1998 awardees to medicine in general, and to *The Mount Sinai Journal of Medicine* in particular.

Sherman Kupfer, M.D.
Professor of Medicine,
Physiology and Biophysics
Editor-in-Chief
