**Research Experience**

1997-98 Senior Thesis Research  
Title: The effect of cytokines on cell growth  
Preceptor: Robert A. Shapiro, PhD, Department of Immunology, Brown University  
Project: Studies were performed to determine the growth properties of a cancer cell line in the presence of IL-2 and IL-4. We found that IL-2 stimulated growth while IL-4 has no effect. This work has led to further studies to identify signal transduction pathways that are activated in these cells.
