

Icahn School of Medicine at  
**Mount Sinai**

Grants and Contracts Office

**Funding Opportunities Monthly Edition  
May 2024 Due Dates**

## Introduction

This funding opportunity packet contains information on funding opportunities with deadlines in May 2024. The opportunities are organized in the following order:

1. [National Institutes of Health \(NIH\)](#)
2. [National Science Foundation \(NSF\)](#)
3. [Other Federal](#)
4. [Non Federal](#)

## NIH Funding Opportunities

SPIN ID	Program Title	Sponsor Name	Sponsor Number	Deadline Date	Funding Amount
113074	<a href="#">The Metastasis Research Network (MetNet): MetNet Research Projects (U01 Clinical Trial Not Allowed)</a>	National Cancer Institute/NIH/DHHS	PAR-22-234	20-May-2024 [Optional][LOI/Pre-App]	2,500,000 USD
	Contact Name	Joanna M. Watson, Ph.D.

	Deadline Dates (ALL)	20-May-2024 [Optional][LOI/Pre-App], 20-Jun-2024 , 23-Sep-2024 [Optional][LOI/Pre-App], 23-Oct-2024 , 20-May-2025 [Optional][LOI/Pre-App], 20-Jun-2025			
	Synopsis	<p>The National Cancer Institute's (NCI) Metastasis Research Network (MetNet) is a collection of U54 Research Centers that support using systems-level approaches to understand pressing questions in metastasis. The overall goal of the MetNet is to advance our understanding of metastasis as a whole body, systems-level problem to develop a comprehensive and cohesive picture of the processes involved. Through this Funding Opportunity Announcement (FOA), the NCI invites applications for MetNet Research Projects. These Research Projects should be defined as discrete entities that use systems-level approaches to address gaps and opportunities in metastasis research to integrate into the MetNet and complement ongoing research across the Network.</p>			
107550	<a href="#">Toward Translation of Nanotechnology Cancer Interventions (TTNCI) (R01 Clinical Trial Not Allowed)</a>	National Cancer Institute/NIH/DHHS	PAR-22-071	17-May-2024	1,900,000 USD

	Deadline Dates (ALL)	17-May-2024 , 17-Nov-2024			
	Synopsis	<p>This Funding Opportunity Announcement (FOA), entitled "Toward Translation of Cancer Nanotechnology Interventions (TTNCI)" is designed to enable the translation of nanotechnology-based cancer interventions relying on nanoparticle formulations and/or nano-devices. The TTNCI initiative encourages applications for advanced pre-clinical research, supporting translation of nanotechnology-based cancer diagnostics and therapeutics. TTNCI awards are expected to mature experimental nanomedicines designed for highly relevant cancer clinical objectives with a strong potential to improve cancer</p>			

## NIH Funding Opportunities

SPIN ID	Program Title	Sponsor Name	Sponsor Number	Deadline Date	Funding Amount
					<p>treatment effectiveness. It is expected that improvement of treatment effectiveness will occur due to the combination of nanoparticle/nano-device structural design and/or therapeutic/diagnostic cargo which is delivered. TTNCI awards are expected to enable further development of proposed nanotechnology-based interventions to the stage in which they could continue on a developmental path towards the NCI Experimental Therapeutics (NExT) and other NCI translational programs.</p>
120148	<a href="#">Innovative Research in Cancer Nanotechnology (IRCN; R01 Clinical Trial Not Allowed)</a>	National Cancer Institute/NIH/DHHS	PAR-23-246	03-May-2024	2,375,000 USD
	<p>Contact Name</p> <p>Contact Telephone</p> <p>Contact Email</p> <p>Sponsor Website</p> <p>Program URL</p> <p>Deadline Dates (ALL)</p> <p>Synopsis</p>	<p>Piotr Grodzinski, Ph.D.</p> <p>240-781-3305</p> <p><a href="mailto:grodzinp@mail.nih.gov">grodzinp@mail.nih.gov</a></p> <p></p> <p><a href="#">Link to program URL</a></p> <p>03-May-2024 , 04-Nov-2024 , 05-May-2025 , 03-Nov-2025 , 04-May-2026</p> <p>Through this Notice of Funding Opportunity (NOFO) entitled "Innovative Research in Cancer Nanotechnology (IRCN)", the National Cancer Institute (NCI) encourages applications promoting transformative discoveries in cancer biology and/or oncology through the use of nanotechnology. Proposed projects should address overcoming major barriers in cancer biology and/or oncology using nanotechnology and should focus on mechanistic studies to expand the fundamental understanding of nanomaterial and/or nano-device interactions with biological systems. These studies are expected to be relevant to the delivery of nanoparticles and/or nano-devices to desired and intended cancer targets in vivo and/or characterization of detection and diagnostic devices and sensors in vitro. IRCN awards are expected to produce fundamental knowledge to aid future and more informed development of nanotechnology-based cancer interventions. The clinical translation of these interventions is outside of scope of this NOFO.</p>			
117092	<a href="#">RFA-CA-23-028 -- Discovery and Development of Natural Products for Cancer Interception and Prevention (UG3/UH3 Clinical Trial Not Allowed)</a>	National Cancer Institute/NIH/DHHS	RFA-CA-23-028	14-May-2024 [Optional][LOI/Pre-App]	Not Specified
	<p>Contact Name</p> <p>Contact Telephone</p> <p>Contact Email</p> <p>Sponsor Website</p> <p>Program URL</p>	<p>Altaf Mohammed, PhD</p> <p>240-276-6082</p> <p><a href="mailto:wynne.norton@nih.gov">wynne.norton@nih.gov</a></p> <p></p> <p><a href="#">Link to program URL</a></p>			

## NIH Funding Opportunities

SPIN ID	Program Title	Sponsor Name	Sponsor Number	Deadline Date	Funding Amount
	<p>Deadline Dates (ALL)   14-May-2024 [Optional][LOI/Pre-App], 13-Jun-2024 , 13-Jun-2025 , 14-Jun-2025 [Optional][LOI/Pre-App]</p> <p>Synopsis   Through this Notice of Funding Opportunity (NOFO), the National Cancer Institute (NCI) intends to support the discovery and development of novel natural products that are safe, non-toxic, and efficacious for cancer interception and prevention. The UG3 phase will provide up to three years of support for milestone-driven initial target selection, verification of the target in clinical samples and preclinical in vivo studies, assay development, and/or assay validation for target activity, as well as on-target toxicity screening, and pilot screening of natural agents. If UG3 milestones are met, support may be provided for a full-scale screening, identification of active natural compounds, full-scale evaluation of screened individual agents, assessment of the natural product's effect in vitro and in vivo, and determining the optimal dose for subsequent studies and safety testing in the UH3 phase.</p>				
114550	<a href="#">NCI Small Grants Program for Cancer Research for Years 2023, 2024, and 2025 (NCI Omnibus) (R03 Clinical Trial Optional)</a>	National Cancer Institute/NIH/DHHS	PAR-23-058	07-May-2024	100,000 USD
	<p>Contact Name</p> <p>Contact Telephone</p> <p>Contact Email</p> <p>Sponsor Website</p> <p>Program URL   <a href="#">Link to program URL</a></p> <p>Deadline Dates (ALL)   07-May-2024 , 20-Jun-2024 , 07-Sep-2024 , 17-Oct-2024 , 07-Jan-2025 , 24-Feb-2025 , 07-May-2025 , 20-Jun-2025 , 07-Sep-2025 , 17-Oct-2025 , 07-Jan-2026</p> <p>Synopsis   This funding opportunity announcement (FOA) supports small research projects on cancer that can be carried out in a short period of time with limited resources. The R03 grant mechanism supports different types of projects including pilot and feasibility studies; secondary analysis of existing data; small, self-contained research projects; development of research methodology; and development of new research technology.</p>				
112021	<a href="#">Cancer Prevention and Control Clinical Trials Planning Grant Program (U34 Clinical Trials Optional)</a>	National Cancer Institute/NIH/DHHS	PAR-22-174	07-May-2024	Not Specified

## NIH Funding Opportunities

SPIN ID	Program Title	Sponsor Name	Sponsor Number	Deadline Date	Funding Amount
	Deadline Dates (ALL)	07-May-2024 , 25-Jun-2024 , 07-Sep-2024 , 25-Oct-2024 , 07-Jan-2025 , 25-Feb-2025 , 07-May-2025 , 25-Jun-2025			
	Synopsis	Through this Funding Opportunity Announcement (FOA), the National Cancer Institute (NCI) intends to facilitate well planned clinical trials across the cancer prevention and control spectrum aimed at improving prevention/ interception, cancer-related health behaviors, screening, early detection, healthcare delivery, management of treatment-related symptoms, supportive care, and the long-term outcomes of cancer survivors. Although the scientific literature or preliminary data may provide the rationale for conducting a clinical trial, investigators often lack critical information about the study population, accrual challenges, intervention, outcome/ endpoints, data/statistical challenges or operational risks necessary to finalize the trial protocol completely. These information gaps can result in multiple protocol changes before and after trial start-up, leading to the need for additional time and expenses that may prevent study completion. Further, the suitability and feasibility of new trial designs, which minimize infrastructure and reduce costs may need to be tested in the context of a particular intervention, at-risk group, symptom or venue. Preparatory studies may fill information gaps and address unknowns this can include a pilot/feasibility clinical trial if necessary, improving trial design and rigor.

Deadline Dates (ALL)	12-May-2024 [Optional][LOI/Pre-App], 11-Jun-2024 , 16-Oct-2024 [Optional][LOI/Pre-App], 15-Nov-2024
Synopsis	The purpose of this Notice of Funding Opportunity (NOFO) is to invite exploratory/developmental research grant applications (R21) for innovative informatics methods and algorithms to improve the acquisition, analysis, visualization, or interpretation of data across the cancer research continuum including cancer biology, cancer treatment and diagnosis, early cancer detection, risk assessment and prevention, cancer control and epidemiology, and/or cancer health disparities. As a component of the NCI's Informatics Technology for Cancer Research (ITCR) Program, the emphasis of this NOFO is on supporting the development of novel informatics capabilities that involve a high degree of innovation that have the potential to accelerate or enhance research. To be successful, there must be a clear rationale for how the proposed informatics method or algorithm is novel and how it will benefit the cancer research field. Projects with a significant level of data generation and/or data analysis will not be considered responsive to this funding opportunity.

123041	<a href="#">RFA-CA-24-019 -- Sustained Support for Informatics Technologies for Cancer Research and Management (U24 Clinical Trial Optional)</a>	National Cancer Institute/NIH/DHHS	RFA-CA-24-019	12-May-2024 [Optional][LOI/Pre-App]	Not Specified
	<p>Contact Name: Juli Klemm, Ph.D.</p> <p>Contact Telephone: 202-853-7889</p> <p>Contact Email: <a href="mailto:juli.klemm@nih.gov">juli.klemm@nih.gov</a></p> <p>Sponsor Website:</p> <p>Program URL: <a href="#">Link to program URL</a></p> <p>Deadline Dates (ALL): 12-May-2024 [Optional][LOI/Pre-App], 11-Jun-2024 , 16-Oct-2024 [Optional][LOI/Pre-App], 15-Nov-2024</p> <p>Synopsis: The purpose of this Notice of Funding Opportunity (NOFO) is to invite Cooperative Agreement (U24) applications for the continued development and sustainment of high value informatics research resources to improve the acquisition, management, analysis, and dissemination of data and knowledge across the cancer research continuum including cancer biology, cancer treatment and diagnosis, early cancer detection, risk assessment and prevention, cancer control and epidemiology, and/or cancer health disparities. As a component of the NCI's Informatics Technology for Cancer Research (ITCR) Program, this NOFO focuses on sustaining operations and improving the user experience and availability of existing, widely-adopted informatics tools and resources. This is in contrast to early-stage and advanced development efforts to generate these tools and resources that are supported by companion ITCR NOFOs. The central mission of ITCR is to promote research-driven informatics technology across the development lifecycle to address priority needs in cancer research. In order to be successful, the proposed sustainment plan must provide clear justification for why the research resource should be maintained and how it has benefited and will continue to benefit the cancer research field. In addition, mechanisms for assessing and maximizing the value of the resource to researchers and supporting collaboration and deep engagement between the resource and the targeted research community should be described.</p>

SPIN ID	Program Title	Sponsor Name	Sponsor Number	Deadline Date	Funding Amount
123034	<a href="#">RFA-CA-24-018 -- Advanced Development of Informatics Technologies for Cancer Research and Management (U24 Clinical Trial Optional)</a>	National Cancer Institute/NIH/DHHS	RFA-CA-24-018	12-May-2024 [Optional][LOI/Pre-App]	3,000,000 USD
	<p>Contact Name   Juli Klemm, Ph.D.</p> <p>Contact Telephone   202-853-7889</p> <p>Contact Email   <a href="mailto:juli.klemm@nih.gov">juli.klemm@nih.gov</a></p> <p>Sponsor Website  </p> <p>Program URL   <a href="#">Link to program URL</a></p> <p>Deadline Dates (ALL)   12-May-2024 [Optional][LOI/Pre-App], 11-Jun-2024 , 16-Oct-2024 [Optional][LOI/Pre-App], 15-Nov-2024</p> <p>Synopsis   The purpose of this Notice of Funding Opportunity (NOFO) is to invite Cooperative Agreement (U24) applications for advanced development and enhancement of emerging informatics technologies to improve the acquisition, analysis, visualization, and interpretation of data across the cancer research continuum including cancer biology, cancer treatment and diagnosis, early cancer detection, risk assessment and prevention, cancer control and epidemiology, and cancer health disparities. As a component of the NCI's Informatics Technology for Cancer Research (ITCR) Program, this NOFO focuses on emerging informatics technology, defined as one that has passed the initial prototyping and pilot development stage, has demonstrated potential to have a significant and broader impact, has compelling reasons for further improvement and enhancement, and has not been widely adopted in the cancer research field. To be successful, proposed development plans must have a clear rationale on why the proposed technology is needed and how it will benefit the cancer research field. In addition, mechanisms to solicit feedback from users and collaborators throughout the development process must be included. Potential applicants who are interested in early-stage development or informatics resource sustainment should consult the companion NOFOs listed above.</p>

Deadline Dates (ALL)	25-May-2024 , 25-Sep-2024 , 25-Jan-2025
Synopsis	<p>This Funding Opportunity Announcement (FOA) invites applications for P30 Cancer Center Support Grants (CCSGs) to support NCI-designated Cancer Centers. CCSGs support three types of Cancer Centers: 1) Comprehensive Cancer Centers, which demonstrate reasonable depth and breadth of research activities in each of three major areas: basic laboratory; clinical; and prevention, control and population-based research, and which have substantial transdisciplinary research that bridges these scientific areas; and 2) Clinical Cancer Centers, which are primarily focused on basic laboratory; clinical; and prevention, cancer control, and population-based research; or some combination of these areas, and 3) Basic Cancer Centers, which focus on basic laboratory research. The purpose of all types of NCI-designated Cancer Centers is to capitalize on all institutional cancer research capabilities, integrating meritorious research into a single transdisciplinary research enterprise across all institutional boundaries. Cancer Centers supported through this FOA are expected to serve as major sources of discovery of the nature of cancer and of development of more effective approaches to prevention, diagnosis, and therapy; to contribute significantly to the development of Shared Resources that support research; to collaborate and coordinate their research efforts with other NCI-funded programs and investigators; and to disseminate research findings for the benefit of the community.</p>

Synopsis	The purpose of this funding opportunity announcement is to encourage collaborations between the life and physical sciences that: 1) apply a multidisciplinary bioengineering approach to the solution of a biomedical problem; and 2) integrate, optimize, validate, translate or otherwise accelerate the adoption of promising tools, methods, and techniques for a specific research or clinical problem in basic, translational, or clinical science and practice. An application may propose design-directed, developmental, discovery-driven, or hypothesis-driven research and is appropriate for small teams applying an integrative approach to increase our understanding of and solve problems in biological, clinical, or translational science. This FOA will support clinical trials that test functionality or validate performance in the chosen setting. This FOA is not intended to support conventional clinical trials that lack translation as the primary motivation. Applications that propose phase III clinical trials in any area of research are not sought by and will not be supported through this FOA. This FOA does not propose to support commercial production.

---------	---------------	--------------	----------------	---------------	----------------

substantial impact on gene expression and function, there is a lack of mechanistic insights into the dynamic regulation of RNA modifications and their de-regulation as drivers of cancer formation. A better understanding of the extent, diversity, and crosstalk between different types of RNA modification, and the elucidation of the molecular players that read and interpret the modification code are needed to reveal the mechanisms of RNA modifications that underlie cancer formation and the cancer phenotype.

Synopsis	The NEI uses U01 cooperative agreement awards to support investigator-initiated early-stage clinical trials that are greater than minimal risk and typically are Phase I or II trials. The risk level of the U01 trial requires appropriate performance oversight and safety monitoring. For purposes of this FOA, the proposed study must be intended to evaluate interventions aimed at screening, diagnosing, preventing, or treating vision disorders. Applicants are strongly advised to consult with NEI

Synopsis	The NEI uses UG1 cooperative agreement awards to support investigator-initiated large-scale clinical trials, human gene-transfer, stem cell therapy trials, and other complex or high resource- or safety-risk clinical trials. These projects are multifaceted and of high public health significance requiring clear delineation of study organization including roles and responsibilities and require careful performance oversight and monitoring. For purposes of this Notice of Funding Opportunity (NOFO), the proposed study must be intended to evaluate interventions aimed at screening, diagnosing, preventing, or treating vision disorders, or to compare the effectiveness of two or more established interventions. The NEI UG1-supported studies are typically funded as a group of single-component companion grant awards including the Chair's Grant, the Coordinating Center, and Resource Centers, when appropriate. Specifically, this NOFO encourages applications for the Coordinating Center grant, which provides details of the Coordinating Center's responsibilities and operations.

Program URL	<a href="#">Link to program URL</a>
Deadline Dates (ALL)	07-May-2024 , 16-Jun-2024 , 07-Sep-2024 , 16-Oct-2024 , 07-Jan-2025 , 16-Feb-2025 , 07-May-2025
Synopsis	The National Eye Institute (NEI) supports regenerative medicine clinical trials. Before a research team undertakes a clinical trial, it is critical to have clear delineation and documentation of the trial’s rationale, design, analytic techniques, protocols, and procedures in a Manual of Procedures (MOP). Additionally, there are other elements essential to the launching of a trial, such as obtaining regulatory authorizations or approvals and establishing agreements with requisite partners including cell manufacturing and production facilities, assay or cell analysis centers, and data coordinating centers. These activities are often costly and time-consuming, and they may involve collection of preliminary data to assess feasibility. The Regenerative Medicine Clinical Trial Planning Grant may be used by applicants to support the preparation of a clinical trial MOP and procedures necessary for implementing a clinical trial to evaluate interventions (or new treatments) that restore vision in humans through regeneration of cells.

109530	<a href="#">NEI Clinical Research Study Planning Grant Program (R34 Clinical Trial Not Allowed)</a>	National Eye Institute/NIH/DHHS	PAR-22-128	07-May-2024	300,000 USD

Program URL	<a href="#">Link to program URL</a>
Deadline Dates (ALL)	07-May-2024 , 16-Jun-2024 , 07-Sep-2024 , 16-Oct-2024 , 07-Jan-2025 , 16-Feb-2025 , 07-May-2025
Synopsis	The NEI supports large-scale clinical vision research projects, including randomized clinical trials and epidemiologic studies on eye/vision conditions. At the time of submission, applications requesting support for these activities are expected to provide detailed information regarding the study rationale, design, analytic techniques, protocols and procedures, facilities and environment, organizational structure, and collaborative arrangements. This information is best conveyed in a Manual of Procedures (MOP), the development of which represents a costly and time-consuming activity. This clinical research planning grant funding opportunity supports applicants in their planning efforts to conduct collaborative clinical research. The grant may be used to support the development of a MOP, as well as to conduct preliminary studies to refine study procedures or document recruitment potential. The grant must not be used to generate data on the effects of a proposed intervention. This NEI FOA is applicable to both epidemiologic and clinical trial research studies.

## NIH Funding Opportunities

109824	<a href="#">NEI Research Grant for Vision-Related Secondary Data Analysis (R21 Clinical Trial Not Allowed)</a>	National Eye Institute/NIH/DHHS	PAR-22-141	07-May-2024	275,000 USD
	<p>Contact Name   Donald Everett, M.A.</p> <p>Contact Telephone   301-435-8181</p> <p>Contact Email   <a href="mailto:everettd@mail.nih.gov">everettd@mail.nih.gov</a></p> <p>Sponsor Website  </p> <p>Program URL   <a href="#">Link to program URL</a></p> <p>Deadline Dates (ALL)   07-May-2024 , 16-Jun-2024 , 07-Sep-2024 , 16-Oct-2024 , 07-Jan-2025 , 16-Feb-2025 , 07-May-2025</p> <p>Synopsis   This FOA encourages applications from institutions/organizations that propose to conduct vision-related secondary data analyses utilizing existing database resources. Applications may be related to, but must be distinct from, the specific aims of the original data collection. The NEI supports an extensive portfolio of clinical trials and large-scale epidemiologic research projects wherein numerous data collection activities are required to meet each project's specific aims. The resultant wealth of data generated by these studies often provides unique, cost-effective opportunities to investigate additional research questions or develop new analytical approaches secondary to a project's originally-intended purpose. Data are not limited to those collected under NEI support, but such data are of the highest programmatic interest. The purpose of this FOA is for secondary data analysis using existing data sets from vision-related clinical trials, epidemiologic, and other clinical research studies. This FOA may be used to develop new statistical methodologies or test hypotheses using existing data, but this FOA must not be used to support the collection of new data.</p>

	Synopsis	The purpose of this Notice of Special Interest (NOSI) is to inform potential applicants that the National Eye Institute (NEI) is interested in supporting research to develop innovative informatics and data science methods, algorithms, and tools to improve data acquisition, analysis, visualization, annotation, integration, and interpretation. The emphasis will be on innovation and its potential impact on vision research, including discovery biology, population studies, as well as clinical and translational research.

Synopsis	This Notice of Special Interest (NOSI) seeks to expand the breadth of scientific research on the clinical course, prevention and treatment of diseases within the mission of the National Heart, Lung, and Blood Institute (NHLBI) by leveraging ongoing clinical research studies through ancillary studies. The purpose of this NOSI is to invite research project applications to conduct focused ancillary studies to large ongoing clinical trials (including late-stage T4 implementation clinical trials), observational studies, and registries. This NOSI also serves as a replacement for NOT-HL-20-755 (expired as of November 6, 2021).

	Synopsis	The symptom-based diagnosis and treatment of heart, lung, blood, and sleep (HLBS) diseases has vastly improved in recent years, yet an understanding of the molecular mechanisms underlying many of these diseases has remained elusive. Furthermore, in most cases the impact of genetic variation on severity of disease and treatment outcomes remains unknown. Therefore, the NHLBI has created the Trans-omics for Precision Medicine (TOPMed) program, which aims to utilize genomics			

## NIH Funding Opportunities

SPIN ID	Program Title	Sponsor Name	Sponsor Number	Deadline Date	Funding Amount
		<p>data to characterize a variety of HLBS diseases. TOPMed is well on its way to collecting whole genome sequence (WGS) from over 194,270 well-phenotyped individuals and is currently generating multi-omics data (e.g., over 31,852 RNA sequences, over 44,342 DNA methylation profiles, and 26,124 metabolomics profiles) from many of these individuals to complement whole genome sequence information. Having produced an unprecedented volume of high-throughput data, TOPMed now seeks to turn its attention to effectively leveraging this resource to uncover biological function and disease pathobiology through novel systems biology analyses and the power of artificial intelligence (AI) and Machine Learning (ML). Although lower costs and technological improvements in sequencing technology have vastly expanded our ability to generate large volumes of omics data, the ability to analyze such large datasets to extract biologically meaningful insights remains challenging. Systems level models incorporating trans-omics analyses will be an important step in uncovering the underlying biological networks and the gene-gene and gene-environment interactions influencing disease and treatment outcomes. Thus, advanced analyses that incorporate genotype and phenotype datasets from thousands to tens of thousands of individuals are essential to move TOPMed to the next phase of discovery.</p>			
112260	<a href="#">Notice of Special Interest (NOSI): Studies of Cellular/Molecular Pathobiological Mechanisms of Lung Diseases Using Human 3-Dimensional Cellular Systems (R01)</a>	National Heart, Lung, and Blood Institute/NIH/DHHS	NOT-HL-22-030	07-May-2024	Not Specified
	<p>Contact Name</p> <p>Contact Telephone</p> <p>Contact Email</p> <p>Sponsor Website</p> <p>Program URL</p> <p>Deadline Dates (ALL)</p> <p>Synopsis</p>	<p>Qing Lu, Ph.D.</p> <p>301-480-9158</p> <p><a href="mailto:qing.lu@nih.gov">qing.lu@nih.gov</a></p> <p></p> <p><a href="#">Link to program URL</a></p> <p>07-May-2024 , 05-Jun-2024 , 07-Sep-2024 , 05-Oct-2024 , 07-Jan-2025 , 05-Feb-2025 , 07-May-2025 , 05-Jun-2025 , 07-Sep-2025</p> <p>The purpose of this NOSI is to promote research characterizing the pathobiological processes and mechanisms that drive the onset and progression of lung diseases at a molecular/cellular level, providing a systems-level understanding by studying experimental systems with cellular heterogeneity and 3-D architecture. It is expected that projects supported by this NOSI will utilize ex vivo preparations (e.g., thin human lung slices) or 3-D multi-cellular in vitro systems (e.g., organoids) of human lung cells and will employ state-of-art multi-omics measures (e.g., spatial or single cell/nucleus omics) to better understand specific pathobiological processes in systems of interacting cell types.</p>

Synopsis	This Notice of Special Interest (NOSI) calls for research to understand and promote cardiovascular and cardiometabolic health during transitional phases across the lifecourse, from pre-adolescence (6-10 years) through adolescence (11-18 years) to young adulthood (19-39 years). This initiative would support research to: 1) understand the mechanisms and the pathogenesis of cardiometabolic health and cardiovascular disease (CVD) risk in vulnerable groups throughout transitional phases from pre-adolescence into adolescence and adolescence into young adulthood, and 2) develop precision prevention interventions (at the individual and populations levels) to address cardiovascular and cardiometabolic risk across these transitional phases.

---------	---------------	--------------	----------------	---------------	----------------

mechanisms contributing to the pathophysiology of HLBS disorders are invited. This NOSI encourages multidisciplinary and multiple investigator teams of experts in heart, lung, and blood research fields to synergistically work with circadian biologists and sleep researchers to provide a comprehensive understanding of the circadian biology in relation to HLBS conditions. The purpose is to facilitate translational research to identify potential applications of circadian science to the diagnosis, prevention and treatment of HLBS conditions. Mechanism-based studies investigating the circadian rhythm dysregulation, clinical markers, and/or therapeutic targets of HLBS conditions are encouraged. Behavioral, physiological, pharmacological, molecular, and genomic studies aimed at elucidating the relationship between circadian-dependent mechanisms and disease are appropriate. Studies to delineate circadian-based mechanisms, therapeutic targets, epidemiological risk and clinical trials to assess therapeutic safety, efficacy, effectiveness, or implementation may be proposed.

Trials using innovative designs such as platform trials, adaptive, and Bayesian designs are encouraged. These trials may include ones that test different therapeutic, behavioral, and/or prevention strategies. Trials for which this FOA applies must be relevant to the research mission of the NHLBI and meet the NIH definition of a clinical trial (see NOT-OD-15-015). For additional information about the mission, strategic vision, and research priorities of the NHLBI, applicants are encouraged to consult the NHLBI website. This FOA will utilize a milestone-driven cooperative agreement mechanism of award and runs in parallel with a companion FOA PAR-22-192() that encourages applications for a collaborating Clinical Coordinating Center (CCC). The objective of the DCC application is to present a comprehensive plan to provide overall project coordination, administration, data management, and biostatistical support for the clinical trial proposed in the collaborating CCC application. The application should also describe its approaches to collaborate with the CCC on implementation of the clinical trial community engagement and diversity plans. Both a DCC application and a collaborating CCC application must be submitted on the same application due date for consideration by NHLBI. Applicants are strongly encouraged to contact the appropriate Scientific/Research contact prior to submitting an application.</p>

Synopsis	<p>The purpose of this funding opportunity announcement (FOA) is to solicit current or recently completed NHLBI K01, K08, K23, and K25 recipients for small grant support to expand their current research objectives or to branch out to a new study that resulted from the research conducted under the K award. Active NHLBI K01, K08, K23, and K25 recipients may apply for R03 support after the notice of award (NoA) for their first type-5 K awards has been issued. Recently completed NHLBI K01, K08, K23, and K25 recipients are eligible to apply for the R03 if the earliest possible R03 start date falls within 2 years of their prior NHLBI K award Project Period end date. This FOA is intended to enhance the capability of NHLBI K01, K08, K23, and K25 recipients to conduct research as they complete their transition to fully independent investigator status. This R03 program is intended to support research projects that can be carried out and completed within a short period of time (no more than two years) with limited resources and that may generate preliminary data to support a subsequent R01-equivalent application. These studies include, but are not limited to, pilot or feasibility studies; proof of concept studies; secondary analysis of existing data; small, self-contained research projects; development of new research methodologies or technologies, or development of novel experimental models. A minimum of 40% protected overall research effort, not necessarily limited to the proposed R03 project, is required from applicants. For current and previous K23 recipients, research proposed in the R03 application may or may not include patient-oriented research.</p>

	Contact Email	<a href="mailto:desvignp@mail.nih.gov">desvignp@mail.nih.gov</a>			
	Sponsor Website				
	Program URL	<a href="#">Link to program URL</a>			
	Deadline Dates (ALL)	07-May-2024 , 16-Jun-2024 , 07-Sep-2024 , 16-Oct-2024 , 07-Jan-2025 , 16-Feb-2025 , 07-May-2025 , 16-Jun-2025 , 07-Sep-2025 , 16-Oct-2025 , 07-Jan-2026 , 16-Feb-2026 , 07-May-2026 , 16-Jun-2026 , 07-Sep-2026 , 16-Oct-2026 , 07-Jan-2027			
	Synopsis	<p>This Notice of Funding Opportunity (NOFO) supports studies that are both necessary and sufficient to inform the planning of a Phase II-IV clinical trial within NHLBI's mission. The NHLBI expects that applications to this NOFO will describe the planned clinical trial and in so doing demonstrate that the proposed (R34) research is scientifically necessary to design or plan the subsequent trial. Furthermore, this NOFO will support research projects that are designed to provide results that will be sufficient to inform the future trial without further studies. The planned Phase II, III, or IV trial must be primarily intended to test the efficacy, safety, clinical management, or implementation of intervention(s) in the prevention and/or treatment of heart, lung, blood, or sleep disorders. In contrast to the study start up or preparation phase of NHLBI funding opportunities for clinical trials (as described at Clinical Trial Development Continuum   NHLBI, NIH), the R34 mechanism is intended to provide new information that answers a scientific or operational question(s) which may be pragmatic in nature and, therefore, informs the final development of a Phase II-IV clinical trial. Regardless of the results of the R34, support of the proposed future clinical trial will require a new application. Plan for Enhancing Diverse Perspectives The NIH recognizes that diverse teams working together and capitalizing on innovative ideas and distinct perspectives outperform homogeneous teams. There are many benefits that flow from a diverse scientific workforce, including: fostering scientific innovation, enhancing global competitiveness, contributing to robust learning environments, improving the quality of the research, advancing the likelihood that underserved populations participate in, and benefit from research, and enhancing public trust. To support the best science, the NIH encourages inclusivity in research. Examples of structures that promote diverse perspectives include but are not limited to: -Transdisciplinary research projects and collaborations among neuroscientists and researchers from fields such as computational biology, physics, engineering, mathematics, computer and data sciences, as well as bioethics. - Engagement from different types of institutions and organizations (e.g., research-intensive, undergraduate-focused, minority-serving, community-based). - Individual applications and partnerships that enhance geographic and regional heterogeneity. - Investigators and teams composed of researchers at different career stages. - Participation of individuals from diverse backgrounds, including groups historically underrepresented in the biomedical, behavioral, and clinical research workforce (see NOT-OD-20-031), such as underrepresented racial and ethnic groups, those with disabilities, those from disadvantaged backgrounds, and women. - Opportunities to enhance the research environment to benefit early- and mid-career investigators. This NOFO requires a Plan for Enhancing Diverse Perspectives (PEDP), which will be assessed as part of the scientific and technical peer review evaluation. Applications that fail to include a PEDP will be considered incomplete and will be withdrawn. Applicants are strongly encouraged to read the NOFO instructions carefully</p>

Deadline Dates (ALL)	07-May-2024
Synopsis	<p>This Funding Opportunity Announcement (FOA) invites applications to enhance the pool of highly trained investigators from diverse backgrounds, including those from groups underrepresented in research areas of interest to the NHLBI. The career development will take place under the guidance of an experienced mentor in the biomedical, behavioral or clinical sciences leading to research independence. It is targeted toward individuals whose basic, clinical, and translational research interests are grounded in the advanced methods and experimental approaches needed to solve problems related to cardiovascular, pulmonary, and hematologic diseases and sleep disorders in the general and health disparities populations. This FOA invites applications from institutions with eligible faculty members to undertake special study and supervised research under a mentor who is an accomplished investigator in the research area proposed and has experience in developing independent investigators. This FOA is designed specifically for candidates proposing to serve as the lead investigator of an independent clinical trial, a clinical trial feasibility study, or a separate ancillary clinical trial, as part of their research and career development. Those not planning an independent clinical trial, or proposing to gain research experience in a clinical trial led by another investigator, must apply to companion FOA (RFA-HL-22-011).</p>

	<p>consult the NHLBI website. This FOA will utilize a bi-phasic, milestone-driven mechanism of award. The objective of the application is to present the scientific rationale for the clinical trial and a comprehensive scientific and operational plan that describes it. The application should address project management, subject recruitment and retention, performance milestones, scientific conduct of the trial, and dissemination of results. The multiple PD/PI model is strongly encouraged but not required. Applicants are encouraged to include a PD/PI with expertise in biostatistics, clinical trial design, and coordination. The application should also describe its approaches to increasing community engagement, reducing health inequities and disparities, and include a Plan for Increasing Diverse Perspectives (PDEP),.</p>

Program URL	<a href="#">Link to program URL</a>
Deadline Dates (ALL)	01-May-2024
Synopsis	<p>The aim of this solicitation is to create a multiple award Indefinite Delivery/Indefinite Quantity (IDIQ) type contract. The development and introduction of new therapeutic products against potential agents of bioterrorism, drug-resistant pathogens, emerging and re-emerging infectious diseases, as well as infectious diseases prevalent in resource-limited countries remains a public health priority. To assist in filling these public health gaps, the NIAID requires a nontraditional, proactive, and product development-oriented program to provide preclinical development support for promising therapeutic candidates that emerge from academia, the private sector, or other sources. The full suite of services, of which the services in this solicitation are a part, will encompass those activities commonly associated with the development of interventional products for infectious disease required for New Drug Application (NDA), Biologic License Applications (BLA) and/or Investigational New Drug (IND) applications. Consequently, NIAID recognizes that to obtain the full spectrum of expertise or facilities required to perform all activities set forth in this solicitation, individual organizations will likely need the expertise and resources of other organizations or persons through consortia agreements, partnerships, subcontracts, or consultants.</p> <p>Chemistry underpins all stages of product development by providing the materials required at each stage of development for studies supporting advancement to the next stage of development. The Interventional Agents Chemistry Services resource is intended for case-by-case support of diverse interventional agent product candidates rather than for carrying a single program through multiple stages of the preclinical development pathway. These services are intended to help a large number and variety of investigators to obtain critical data needed to attract additional funding, gain prospective partnerships (either for further development or to support clinical trials), fulfill regulatory requirements, and complete necessary studies to satisfy regulatory requirements. Investigators work with NIAID program officers to access the services through an online request portal. Through these interactions the program officers develop requirements in conjunction with the investigators that reflect the program development needs at the time. These requirements become the basis of the Statement of Work (SOW) of a Request for Task Order Proposal (RTOP) which is issued as a solicitation to all awardees (the contractor “pool”) of the Task Area to which the RTOP is issued. Contractors in the pool then submit technical and cost proposals against the work in the RTOP and these proposals are evaluated by the responsible NIAID staff. The proposal determined to be the best value to</p>

SPIN ID	Program Title	Sponsor Name	Sponsor Number	Deadline Date	Funding Amount
---------	---------------	--------------	----------------	---------------	----------------

the government is awarded, provided funds are available. Contractors in the pool are not involved in the development of the requirements, however, they may receive inquiries from the Contracting Officer (CO), in the form of a Request for Information (RFI) in regard to technical capabilities in some cases. For the purposes of this contract an Interventional Agent is a chemical or biological agent for control of an infectious disease caused by a pathogen or toxin (e.g., botulinum toxin). The provided services shall be directed at the following: Diseases caused by pathogens and toxins on the NIAID Emerging Infectious Diseases/Pathogens list (<https://www.niaid.nih.gov/research/emerging-infectious-diseases-pathogens>) Emerging and re-emerging infectious diseases Antimicrobial resistant and multi-drug resistant infections Other bacterial infections Fungal infections Viral infections Parasitic diseases. NIAID anticipates awarding multiple Indefinite Delivery, Indefinite Quantity (IDIQ) contracts to organizations that demonstrate capability to fulfill the technical requirements of at least one (1) of the technical Task Areas listed below plus required Task Area A. A contract may be awarded to an organization proposing to fulfill either or both of the technical Task Areas plus Task Area A. The Government anticipates making awards to those organizations with the best qualifications in each Task Area. Subpar evaluation in one technical Task Area will not exclude the organization from or negatively impact consideration for award in another Task Area. Organizations will be considered for contracts only in the Task Area(s) they include in the proposal. Task areas and the scope of each are as follows: Task Area A – Contract Kick-Off Meeting Task Area A will support the planning and participating in the parent contract kick-off meeting. Task Area B – Non-GMP Chemistry Task Area B will support activities required for the route optimization, process development, and synthesis of a synthetic intermediate, lead, or preclinical candidate, and may include acquisition or purchase of compounds from a third-party source, such as a commercial vendor. Activities under this Task Area include technology transfer of synthesis schemes and procedures between third party facilities and contractors as specified in each Task Order. Task Area C – GMP Manufacturing, Formulation, Fill and Finish Task Area C will support the formulation development for clinical or advanced preclinical studies; current Good Manufacturing Practices (cGMP)-compliant synthesis of Drug Substance (DS), cGMP-compliant manufacturing of Drug Product (DP) consistent with relevant FDA guidelines; provision of all required documentation including documentation required for IND filing; product release testing required for human clinical use; and DP stability testing required during clinical trials. The Contractor shall be responsible for directing and ensuring the successful technology transfer of all materials, assays, methods and procedures as required for the successful performance of the activities. The focus of this task area will be for discrete small molecule drugs, including those derived from fermentation. Biological drugs and complex or poorly defined mixtures are excluded.

	<p>Sponsor Website</p> <p>Program URL <a href="#">Link to program URL</a></p> <p>Deadline Dates (ALL) 07-May-2024 , 12-Jun-2024 , 07-Sep-2024 , 12-Oct-2024 , 07-Jan-2025 , 12-Feb-2025 , 07-May-2025 , 12-Jun-2025 , 07-Sep-2025 , 12-Oct-2025 , 07-Jan-2026</p> <p>Synopsis The purpose of the NIAID Physician-Scientist Pathway to Independence Award (K99/R00) program is to increase and maintain a strong cohort of new and talented independent physician-scientists. This program is designed to facilitate a timely transition of outstanding postdoctoral researchers with a clinical doctorate degree from mentored, postdoctoral research positions to independent, tenure-track or equivalent faculty positions. The program will provide independent NIAID research support during this transition to help awardees launch competitive, independent research careers in biomedical fields and thereby help to address the national physician-scientist workforce shortage. This Funding Opportunity Announcement (FOA) is designed specifically for candidates proposing research that does not involve leading an independent clinical trial, a clinical trial feasibility study, or an ancillary clinical trial. Under this FOA candidates are permitted to propose a research experience in a clinical trial led by a mentor or co-mentor. Those proposing a clinical trial or an ancillary clinical trial as lead investigator, should apply to the companion FOA (PAR-23-070).</p>				
114362	<a href="#">NIAID Resource-Related Research Projects (R24 Clinical Trial Not Allowed)</a>	National Institute of Allergy and Infectious Diseases/NIH/DHHS	PAR-23-065	07-May-2024	Not Specified

	Synopsis	The purpose of this notice of funding opportunity (NOFO) is to support radiation research at all stages of development for the identification of biomarkers of injury and the development of assays or devices for the purpose of triage, including assessing absorbed dose or predicting health outcomes of acute or delayed injuries resulting from radiation exposure during a public health emergency. This NOFO will support the development of these approaches, with the goal of future regulatory approval.

		<p>considered high-risk may be proposed, this program encourages high-risk clinical studies. High-risk does not imply human subject or patient risk, but rather defines a study that contains one or more of the following unique features: involves non-routine interventions, administration of an unlicensed product, or administration of a licensed product for an unapproved indication. Mechanistic studies are also encouraged and may be proposed under this program.</p>			
123710	<a href="#">NIAID Clinical Trial Implementation Cooperative Agreement (U01 Clinical Trial Required)</a>	National Institute of Allergy and Infectious Diseases/NIH/DHHS	PAR-24-100	13-May-2024	Not Specified

	<p>Contact Name   John V. Ilekis, PhD</p> <p>Contact Telephone   301-435-6895</p> <p>Contact Email   <a href="mailto:ilekij@nih.gov">ilekij@nih.gov</a></p> <p>Sponsor Website</p> <p>Program URL   <a href="#">Link to program URL</a></p> <p>Deadline Dates (ALL)   07-May-2024 , 05-Jun-2024 , 16-Jun-2024 , 07-Sep-2024 , 16-Oct-2024 , 07-Jan-2025 , 05-Feb-2025 , 16-Feb-2025</p> <p>Synopsis   Although the placenta is a short-lived organ limited to pregnancy, its importance is often underappreciated in being a crucial organ for the propagation of our species and future health of our progeny. Perturbations in any one of its many functions may result in many common adverse pregnancy outcomes. These include early pregnancy loss, preeclampsia, fetal growth restriction, stillbirth, and preterm birth. In addition, a poorly functioning placenta can lead to aberrant programming of the fetus that can impact the health of the individual later in adult life. This includes an increased incidence of adult diseases such as obesity, cardiovascular disease, and diabetes. Thus, a more comprehensive understanding of the placenta is necessary to help address a number of major gaps in knowledge.</p>				
103657	<a href="#">NICHD Small Research Grant Program (R03 Basic Experimental Studies with Humans Required)</a>	National Institute of Child Health and Human Development/NIH/DHHS	PA-21-231	07-May-2024	50,000 USD

This funding opportunity announcement is for basic science experimental studies involving humans, referred to in NOT-OD-18-212 as “prospective basic science studies involving human participants.” These studies fall within the NIH definition of a clinical trial and also meet the definition of basic research. Types of studies that should submit under this FOA include studies that prospectively assign human participants to conditions (i.e., experimentally manipulate independent variables) and that assess biomedical or behavioral outcomes in humans for the purpose of understanding the fundamental aspects of phenomena without specific application towards processes or products in mind. Studies conducted with specific applications toward processes or products in mind should submit under the appropriate ‘Clinical Trials Required’ FOA.</p>

SPIN ID	Program Title	Sponsor Name	Sponsor Number	Deadline Date	Funding Amount
	<p>Sponsor Website</p> <p>Program URL <a href="#">Link to program URL</a></p> <p>Deadline Dates (ALL) 07-May-2024</p> <p>Synopsis The purpose of this Notice of Special Interest (NOSI) is to encourage research on the processes that facilitate or hinder the achievement of healthy interbirth intervals and promote healthy birth outcomes. Because short interbirth intervals are associated with a range of risk factors and poor maternal and child health outcomes, reducing the proportion of pregnancies conceived within 18 months of a previous pregnancy is a Healthy People 2030 objective. These negative outcomes include a lack of preconception health care, delayed prenatal care, preeclampsia, prematurity, low birth weight, infant mortality, and maternal morbidity and mortality. Short interbirth intervals may also reduce the duration of breastfeeding; conversely, the continuation of breastfeeding can contribute to the lengthening of interbirth intervals. This NOSI is intended to encourage collaboration among researchers across the social, behavioral, biomedical, and public health sciences to elucidate understanding of the modifiable factors behind barriers to enhancing birth intervals.</p>

Synopsis	<p>The purpose of the NIDCR Dual Degree Dentist Scientist Pathway to Independence Award (K99/R00) program is to develop and maintain a strong cohort of independently funded dentist scientists dedicated to improving dental, oral and craniofacial health. This program is designed to facilitate a timely transition of outstanding dual degree dentist scientists from mentored, postdoctoral research positions to independent, tenure-track or equivalent faculty positions by providing support for two years of mentored training and three to five years of independent research. An option for five years of independent (R00) support is available to accommodate clinical training in a dental specialty program at no more than 3 person-months effort (25% full-time professional effort) in any year of the R00 phase. This Funding Opportunity Announcement is for basic science experimental studies involving humans, referred to in NOT-OD-18-212 as “prospective basic science studies involving human participants.” These studies fall within the NIH definition of a clinical trial and also meet the definition of basic research. Types of studies that should be submitted under this FOA include studies that prospectively assign human participants to conditions (i.e., experimentally manipulate independent variables) and that assess biomedical or behavioral outcomes in humans for the purpose of understanding the fundamental aspects of phenomena without specific application towards processes or products in mind. Applicants not planning an independent clinical trial or basic experimental study with humans, or proposing to gain research experience in a clinical trial or basic experimental study with humans led by another investigator, must apply to the 'Independent Clinical Trial Not Allowed' companion FOA. The proposed project must be related to the programmatic interests of one or more of the participating NIH Institutes and Centers (ICs) based on their scientific missions.</p>

Data analysis for each project can be performed using existing and/or novel methods to be developed in the proposed project(s), including methods for data and metadata mining, data integration, and Artificial Intelligence (AI)/Machine Learning (ML)/Deep Learning (DL) methods. In addition to analysis of existing data, experimental or in silico work is required to validate the results of the proposed analysis, or to validate a newly developed analytic method. Projects aimed at understanding oral health disparities to inform strategies for improving health for all individuals are a priority. Projects focused on investigating and/or characterizing human biological pathways to inform identification of intervention targets or defining the pathogenicity of known genetic variants are encouraged.</p>

Contact Name Contact Telephone Contact Email Sponsor Website Program URL Deadline Dates (ALL)	Dena Fischer, DDS, MSD, MS 301-594-4876 <a href="mailto:dena.fischer@nih.gov">dena.fischer@nih.gov</a>  <a href="#">Link to program URL</a> 07-May-2024  Synopsis This Funding Opportunity Announcement (FOA) will support UG3/UH3 phased, cooperative agreement research applications to plan and implement clinical trials within the mission of the National Institute of Dental and Craniofacial Research (NIDCR). Studies appropriate for this FOA are those testing diagnostic, prevention or treatment approaches to test a drug, biologic, device, or procedure for dental, oral, or craniofacial diseases or conditions, including trials for any phase of testing for a Food and Drug Administration (FDA)-regulated product. Awards made under this FOA will initially support a one-year milestone-driven UG3 planning phase, with possible transition to a UH3 clinical trial implementation phase of up to five years. The UH3 phase of the award will support the conduct of one investigator-initiated clinical trial. The UG3 planning phase permits both operational and scientific planning activities. Operational planning activities include, at minimum, finalizing the protocol and preparing other documents to implement the clinical trial (e.g., data collection instruments, Manual of Procedures, data management plan). Allowable scientific planning activities include small-scale data collection to assess the feasibility and/or acceptability of a planned intervention and associated study procedures (e.g., acceptability of mode of intervention delivery; feasibility of proposed data collection procedures; preliminary testing of intervention training and fidelity monitoring procedures) and assessment of the subject population to determine recruitment potential for the future trial. The UG3 phase cannot be used to test for intervention safety or efficacy. If the application proposes a clinical trial with an investigational drug, biologic or device, the investigators must have submitted the appropriate investigational application to the FDA prior to the UH3 phase.

## NIH Funding Opportunities

SPIN ID	Program Title	Sponsor Name	Sponsor Number	Deadline Date	Funding Amount
	<p>Deadline Dates (ALL)   06-Mar-2024 , 07-May-2024</p> <p>Synopsis   The purpose of this Funding Opportunity Announcement (FOA) is to encourage UG3/UH3 phased cooperative agreement research applications to plan and implement behavioral and social intervention clinical trials. Studies appropriate for this FOA include clinical trials to develop and test behavior change interventions related to dental, oral, or craniofacial conditions. Applications for NIDCR support of clinical trials research are expected to identify research proposals using the NIH Stage Model framework, described in detail here and incorporate an experimental medicine approach. Awards made under this FOA will initially support a milestone-driven UG3 planning phase for up to 2 years, with possible transition to a UH3 clinical trial implementation phase (UH3) of up to five years. The UG3 phase for behavioral and social intervention clinical trials will permit both scientific and operational planning activities. Scientific planning activities include small-scale data collection to assess the feasibility and/or acceptability of a planned behavioral or social intervention and associated study procedures (e.g., acceptability of study content or mode of delivery; feasibility of proposed data collection procedures; preliminary testing of intervention training and fidelity monitoring procedures). Operational planning activities include, at a minimum, development of: the final clinical protocol; the intervention manual or equivalent; the data management system and other tools for data and quality management, safety and operational oversight plans; recruitment and retention strategies; and other essential documents. The UH3 phase will support the conduct of investigator-initiated intervention research at all stages, from early mechanistic research and intervention development (e.g., Stages 0/ I) through implementation and health services research (Stages IV/V). This FOA may also support basic behavioral experimental studies with humans that are considered clinical trials based on the NIH's revised clinical trial definition (please see Clinical Trial Requirements for Grants and Contracts for guidance).</p>

	Synopsis	This funding opportunity announcement (FOA) supports research from creative early stage investigators who propose highly innovative, pioneering studies with potential to open new areas of HIV/AIDS research related to coinfections, comorbidities, and complications. Projects should reflect new and novel scientific directions that are distinct from concepts and approaches being pursued in the investigator’s research program or elsewhere. Projects must be consistent with the scientific priorities outlined by the NIH Office of AIDS Research (OAR). These priorities have been described most recently in NOT-OD-20-018.

 Deadline Dates (ALL) | 27-May-2024 [Optional][LOI/Pre-App], 27-Jun-2024

Synopsis | Sodium-glucose co-transporter-2 inhibitors (SGLT2i) that were developed for the treatment of type 2 diabetes (T2D) have significant protective effects for cardiac and renal diseases for people with and without diabetes. However, SGLT2i are not currently approved for individuals with type 1 diabetes (T1D) and there is an increased risk of diabetic ketoacidosis (DKA) for this population. Despite this concern, these drugs are increasingly being prescribed off-label for people with T1D. Continuous ketone monitoring (CKM) is a rapidly evolving technology that could be utilized clinically to prevent DKA by an early warning of elevations in ketone levels. The purpose of this NOFO is to solicit applications for studies that will develop and test risk mitigation strategies that involve the clinical integration of CKM for the safe use of SGLT2i for people living with T1D so that they may benefit from the cardiac and renal protection and glucose-lowering effects of this drug class. The NOFO will support short-term, clinical trials to gain and disseminate knowledge on safety and glucose control with CKM and SGLT2i use. Possible topics include testing optimal insulin delivery in open and closed loop systems or multiple daily injections and developing clinical protocols to control or ameliorate elevated ketone levels in individuals with T1D who are receiving adjunct therapy with SGLT2i.

Through the use of this mechanism, the NIDDK is seeking to enhance the capability of its K01, K08, K23, and K25 award recipients to conduct research as they complete their transition to fully independent investigator status. The R03 grant mechanism supports different types of projects, including pilot and feasibility studies; secondary analysis of existing data; small, self-contained research projects; development of research methodology; and development of new research technology. The R03 is, therefore, intended to support research projects that can be carried out in a short period of time with limited resources and that may provide preliminary data to support a subsequent R01, or equivalent, application.</p>

Kirschstein National Research Service Award (NRSA) Predoctoral Basic Biomedical Sciences Research Training Program is to develop a diverse pool of well-trained scientists available to address the nation’s biomedical research agenda. Specifically, this funding announcement provides support to eligible, domestic organizations to develop and implement effective, evidence-informed approaches to biomedical graduate training and mentoring that will keep pace with the rapid evolution of the biomedical research enterprise. NIGMS expects that the proposed research training programs will incorporate didactic, research, and career development elements to prepare trainees for careers that will have a significant impact on the health-related research needs of the nation. This Notice of Funding Opportunity (NOFO) does not allow appointed Trainees to lead an independent clinical trial, but does allow them to obtain research experience in a clinical trial led by a mentor or co-mentor.</p>

Conte Centers for Basic Neuroscience or Translational Mental Health Research. The NIMH seeks teams of researchers working at different levels of analysis and employing integrative, novel, and creative experimental approaches to address high-risk, high-impact questions with the primary objectives of: (a) advancing the state of the science in basic brain and behavior research that will uncover and dissect the underlying mechanisms that will ultimately provide the foundation for understanding mental disorders; (b) supporting the integration and translation of basic and clinical neuroscience research on severe mental illnesses; and/or (c) advancing our understanding of the neurobehavioral developmental mechanisms and trajectories of psychopathology that begin in childhood and adolescence. The Conte Centers program is intended to support interdisciplinary basic neuroscience or translational research that demonstrates an extraordinary level of synergy, integration, and potential for advancing the state of the field. This program is intended only for projects that could not be achieved using other, more standard grant mechanisms.</p>

	<p>members, clinicians, payers) to engage in high-impact studies that will significantly advance clinical practice and generate knowledge that will fuel transformation of mental health care in the United States. Advanced Laboratories for Accelerating the Reach and Impact of Treatments for Youth and Adults with Mental Illness (ALACRITY) Research Centers will support the rapid development, testing, and refinement of novel and integrative approaches for (1) optimizing the effectiveness of therapeutic or preventive interventions for mental disorders within well-defined target populations; (2) organizing and delivering optimized mental health services within real world treatment settings; and (3) continuously improving the quality, impact, and durability of optimized interventions and service delivery within various care systems that provide mental health interventions and services. The ALACRITY Centers program is intended to support research that maximizes synergies across various components of the mental health research ecosystem, including new discoveries in clinical research, transformative health care technologies, advances in information science, and new federal and state mechanisms for organizing mental health care. The Centers are intended for transdisciplinary projects that could not be achieved using standard research project grant mechanisms. The ALACRITY Centers program is also expected to facilitate widespread sharing of relevant data, methods, and resources that will accelerate clinical research and practice and provide opportunities for graduate students, postdoctoral researchers, and early-career investigators to participate in transdisciplinary, T2 translational mental health research.</p>

## NIH Funding Opportunities

SPIN ID	Program Title	Sponsor Name	Sponsor Number	Deadline Date	Funding Amount
	Synopsis	<p>2025 , 05-Oct-2025 , 07-Jan-2026</p> <p>This Funding Opportunity Announcement (FOA) seeks to support collaborative clinical studies, that primarily focus on mental health genetics, biomarker studies, and studies of mental illnesses (e.g., psychopathology, neurodevelopmental trajectories of psychopathology). Applicants should apply to this FOA when two or more sites are needed to complete the study. Accordingly, the collaborating studies share a specific protocol across the sites and are organized as such in order to increase sample size, accelerate recruitment, or increase the inclusion of women and minorities (NOT-OD-18-014) and NIH-defined health disparity populations. (see <a href="https://www.nimhd.nih.gov/about/strategic-plan/nih-strategic-plan-definitions-and-parameters.html">https://www.nimhd.nih.gov/about/strategic-plan/nih-strategic-plan-definitions-and-parameters.html</a>). It is expected that one site will be submitted as a coordinating R01 for data management and/or other centralized administration. For a linked set of collaborative R01s, each application has its own Program Director/Principal Investigator (PD/PI). The collaborative R01 program provides a mechanism for cross-R01 coordination, quality control, database management, statistical analysis, and reporting.</p>

	Synopsis	<p>The overarching goal of this Notice of Funding Opportunity (NOFO) is to support the development and validation of screening assays for the discovery of validated hits that can be used in future drug discovery/development efforts for identifying potential drug candidates for the treatment of mental illness. For purposes of this initiative, a “hit” is defined as a compound that has the desired activity in a compound screen and whose activity is confirmed upon retesting in orthogonal assays. Stages of discovery research covered by this NOFO include 1) assay development; 2) primary screen implementation to identify initial screening hits (high throughput target-focused screens, or moderate throughput screens); and 3) hit validation using a series of assays and initial medicinal chemistry inspection to prioritize the hit set.</p>

The principal goal of these studies is to assess the time of onset and severity of these symptoms, identify appropriate outcome measures, and establish potential timepoints for intervention. Additionally, the planning grants should focus on identifying potential quantitative clinical functional measures or biomarkers that could be used as prognostics and/or measures of change in future clinical trials. These retrospective natural history studies are expected to enable future prospective longitudinal studies (see Food and Drug Administration’s (FDA’s) guidance on natural history studies for rare disorders).</p>

		<p>Synopsis   This Notice of Funding Announcement (NOFO) solicits exploratory/developmental research applications within the learning health care framework to support adoption, implementation, sustainability, and continuous improvement of evidence-based practices in outpatient mental health and substance use treatment systems. These settings could include, but are not limited to, Certified Community Behavioral Health Clinics (CCBHCs) funded through the Substance Abuse and Mental Health Services Administration (SAMHSA) expansion grant program and CCBHCs participating in their states' Section 223 CCBHC Medicaid demonstration program, or as a part of independent state programs where the CCBHCs are meeting the federal CCBHC certification criteria. This NOFO requires active collaboration between behavioral health researchers and community behavioral health partners across all phases of the research process. Studies that are co-designed between community clinic staff/service users and health services researchers may focus on (1) identifying subgroups within the population of individuals served by CCBHCs with unique needs, including health disparities experienced by people from racial and ethnic minority groups or underserved communities; (2) workforce development strategies, including new approaches to train providers who vary in terms of prior experience, expertise and skills; (3) developing and testing tools to promote measurement-based treatment; (4) hybrid effectiveness-implementation trials aimed at implementing and improving evidence-based prevention, treatment, or services delivery approaches in real-world settings; and (5) research to establish and/or expand 988 crisis response services within CCBHC settings.</p>

	<p>Deadline Dates (ALL)</p> <p>Synopsis</p>	<p>07-May-2024 , 05-Jun-2024 , 07-Sep-2024 , 05-Oct-2024 , 07-Jan-2025 , 05-Feb-2025 , 07-May-2025 , 05-Jun-2025 , 07-Sep-2025</p> <p>The goal of this Funding Opportunity Announcement (FOA) is to identify, in animals, in vivo neurophysiological and behavioral measures for use as assays in the early screening phase of treatment development. This FOA will support efforts to optimize and evaluate measures of neurophysiological and behavioral processes that may serve as pharmacokinetic/pharmacodynamic (PK/PD) markers of neural processes of clinical interest based on available knowledge of the neurobiology of mental illnesses. The screening assays developed from this FOA are expected to build upon systems neurobiology and clinical neuroscience to enhance the scientific value of preclinical animal data contributing to a therapeutic development pipeline in which treatment candidates and therapeutic targets can be evaluated for their ability to impact neurobiological mechanisms of potential clinical relevance to mental illnesses. The objectives of this FOA will be accomplished by supporting basic neuroscience aimed at improving the efficiency and scientific value of the therapeutic development pipeline by advancing the discovery of in vivo physiological and behavioral measures reflecting circuit engagement as tools for early phase target validation and therapeutic screening for mental illness treatment development. The efforts supported by this initiative focus on measures in animals as a first step in generating translational assay measures that are adaptable across early therapeutic screens in animals to evaluation in humans. The FOA may be considered a prequel to build a suite of assays that are evaluated in future projects for coherence of assay performance between the preclinical species and healthy humans. In summary, this FOA will support efforts to improve the tool kit of assays available for early phase testing of novel therapeutic agents by incorporating measures proximal to neural systems that impact mental health.</p>

114549	<a href="#">Notice of Special Interest (NOSI): The Neural Mechanisms of Multi-Dimensional Emotional and Social Representation</a>	National Institute of Mental Health/NIH/DHHS	NOT-MH-23-120	07-May-2024	Not Specified
	<p>Contact Name</p> <p>Contact Telephone</p> <p>Contact Email</p> <p>Sponsor Website</p> <p>Program URL</p> <p>Deadline Dates (ALL)</p> <p>Synopsis</p>	<p>Andrew Breeden, Ph.D.</p> <p><a href="mailto:andrew.breeden@nih.gov">andrew.breeden@nih.gov</a></p> <p><a href="#">Link to program URL</a></p> <p>07-May-2024 , 05-Jun-2024 , 16-Jun-2024 , 07-Sep-2024 , 05-Oct-2024 , 16-Oct-2024 , 07-Jan-2025</p> <p>NIMH is issuing this Notice of Special Interest (NOSI) to outline priorities for research that incorporates a multi-dimensional perspective into studies of the neural mechanisms underlying emotional and/or social representations. The ability to integrate a broad array of emotional and social information is impaired in many mental disorders, yet the neural mechanisms underlying these processes are not well understood. This NOSI encourages studies in humans and animals investigating how diverse multi-dimensional emotional and/or social cues are represented across brain circuits that are important for mental health relevant cognitive, social, and affective behavioral functions. The term “multi-dimensional” refers to the consideration of multiple modalities (e.g., social, emotional, visual, and auditory), the effects of complex contexts and development, and/or dynamic processes that unfold over a variety of temporal scales.</p>

Kim, Ph.D. 301-827-6463 <a href="mailto:douglas.kim@nih.gov">douglas.kim@nih.gov</a>  <a href="#">Link to program URL</a> 15-May-2024 [Optional][LOI/Pre-App], 14-Jun-2024 , 18-Dec-2024 [Optional][LOI/Pre-App], 17-Jan-2025  Synopsis This Notice of Funding Opportunity (NOFO) from the NIH Brain Research through Advancing Innovative Neurotechnologies (BRAIN) Initiative is intended to support the scaling up of brain cell type-specific molecular or genetic access reagents to study circuit function. Scaled engineering and validation of cell type-specific reagents are priorities to be supported. Applications are sought for Reagent Resource for Design and Development projects that scale up the creation of these tools for several vertebrate species, including in experimental animals and human ex vivo tissues or cells. Projects will integrate: scaled engineering, validation, cataloguing, and adaptation into easily disseminable formats of reagents. Scaled up projects are sought that will develop tens to hundreds of cell type-selective reagents. Validated reagents produced in these projects are intended to be distributed to neuroscience researchers via centralized Production and Distribution Facilities to be supported separately. This NOFO is part of the BRAIN Initiative Armamentarium project, whose overall goal is to generate tools to specifically access, manipulate, and monitor brain cell types across multiple vertebrate species. This NOFO will foster close interaction between technologists, disseminators, and neurobiologists in a research consortium including investigators funded by other Armamentarium NOFOs. This NOFO requires a Plan for Enhancing Diverse Perspectives (PEDP), which will be assessed as part of the scientific and technical peer review evaluation. Applications that fail to include a PEDP will be considered incomplete and will be withdrawn.

Candidates are eligible to apply for support from this program from ~12 months prior to the start of the proposed postdoctoral position to within 12 months after starting in the proposed postdoctoral position. This NINDS F32 seeks to foster early, goal-directed planning and to encourage applications for bold and/or innovative projects by the candidate that have the potential for significant impact. Inclusion of preliminary data is strongly discouraged; rather, this F32 seeks innovative research ideas and thoughtful plans for training and mentorship that will facilitate the development of the postdoctoral fellow into an outstanding scientist. Applications are expected to incorporate strong training in quantitative reasoning and the quantitative principles of experimental design and analysis. Support by this program is limited to the first 4 years of a candidate's activity in a specific laboratory or research environment, so as to further encourage early, thoughtful planning and timely completion of "mentored training" within a particular lab or environment. This Funding Opportunity Announcement (FOA) does not allow applicants to propose to lead an independent clinical trial, but does allow applicants to propose research experience in a clinical trial led by a sponsor or co-sponsor. This Funding Opportunity Announcement (FOA) does not allow applicants to propose to lead an independent clinical trial, but does allow applicants to propose research experience in a clinical trial led by a sponsor or co-sponsor.</p>

	Synopsis	The purpose of the NINDS Faculty Development Award to Promote Diversity in Neuroscience Research (K01) is to diversify the pool of independent neuroscience research investigators by providing junior faculty with research cost support, protected research time and career stage appropriate professional development mentorship in neuroscience research. Individuals from diverse backgrounds, including those from groups underrepresented in biomedical research are eligible for support under this award if they have doctoral research degrees (Ph.D. or equivalent) and are in the first 3 years of a faculty tenure track or equivalent position at the time of application. This Funding Opportunity Announcement (FOA) is designed specifically for candidates proposing to serve as the lead investigator of an independent clinical trial, a clinical trial feasibility study, or a separate ancillary clinical trial, as part of their research and career development. Those not planning an independent clinical trial, or proposing to gain research experience in a clinical trial led by another investigator, must apply to companion FOA (PAR-21-152).

Deadline Dates (ALL)	20-Apr-2024 [Optional][LOI/Pre-App], 20-May-2024
Synopsis	<p>This RFA is soliciting applications proposing placebo-controlled, phase 3 clinical trials to determine the efficacy and safety of FDA approved monoclonal antibody therapies directed against amyloid compared to placebo in diverse "mixed dementia" populations with a focus on vascular contributions to cognitive impairment and dementia (VCID). In this NOFO the mixed-etiology dementias (MED) that are of interest and that are in scope are cognitive impairment and dementia cases positive for 1) canonical Alzheimer’s pathology biomarkers (for example, amyloid deposition assessed using positron emission tomography and/or low cerebrospinal fluid amyloid beta 42 combined with elevated phosphorylated tau; and 2) with evidence of vascular contributions based on imaging (for example, white matter disease and/or subclinical infarction). Bayesian approaches with response adaptive randomization to examine specific subgroups are encouraged. Successful applications will be powered to determine efficacy in diverse populations representative of the distribution of the disease in the United States by sex, race/ethnicity, and geographic distribution. Applications must include elements of patient and community engagement that are incorporated into all stages of program development and at all levels of the organizational structure.</p>

106266	<a href="#">NINDS Alzheimer's Disease and Alzheimer's Disease-Related Dementias (AD/ADRD) Advanced Postdoctoral Career Transition Award to Promote Diversity (K99/R00 Independent Clinical Trial Not Allowed)</a>	National Institute of Neurological Disorders and Stroke/NIH/DHHS	PAR-22-022	07-May-2024	Not Specified
	<p>Contact Name   Amelie Gubitz, Ph.D.</p> <p>Contact Telephone   301-451-7966</p> <p>Contact Email   <a href="mailto:gubitz@ninds.nih.gov">gubitz@ninds.nih.gov</a></p> <p>Sponsor Website  </p> <p>Program URL   <a href="#">Link to program URL</a></p> <p>Deadline Dates (ALL)   07-May-2024 , 12-Jun-2024</p> <p>Synopsis   The purpose of the NINDS Alzheimer's Disease and Alzheimer's Disease-Related Dementias (AD/ADRD) Advanced Postdoctoral Career Transition Award to Promote Diversity (K99/R00) program is to support a cohort of new and talented, independent investigators from diverse backgrounds (e.g. see NOT-OD-20-031, Notice of NIH's Interest in Diversity) conducting AD/ADRD research. The program is designed to facilitate a timely transition of eligible postdoctoral researchers from their mentored, postdoctoral research positions to independent, tenure-track or equivalent faculty positions. The program will provide independent NIH research support during this transition in order to help awardees establish independent research programs in the AD/ADRD field. This Funding Opportunity Announcement (FOA) is designed specifically for applicants proposing research that does not involve leading an independent clinical trial, a clinical trial feasibility study, or an ancillary study to a clinical trial. Applicants to this FOA are permitted to propose research experiences in a clinical trial led by a mentor or co-mentor.</p>				
103680	<a href="#">Notice of Special Interest (NOSI): Administrative Supplements to Promote Diversity for NINDS Alzheimer's Disease and Alzheimer's Disease-Related Dementias (AD/ADRD) Awardees</a>	National Institute of Neurological Disorders and Stroke/NIH/DHHS	NOT-NS-21-047	15-May-2024	Not Specified

## NIH Funding Opportunities

SPIN ID	Program Title	Sponsor Name	Sponsor Number	Deadline Date	Funding Amount
	<p>(AD/ADRD) research community to apply for administrative supplements in response to PA-21-071, "Research Supplements to Promote Diversity in Health-Related Research," or any reissues of this announcement through the expiration date of this Notice. The NIH has a strong interest in the diversity of the NIH-funded workforce (see NOT-OD-20-031, "Notice of NIH's Interest in Diversity") and encourages institutions to diversify their student populations by enhancing the participation of individuals from groups that are underrepresented in the biomedical, clinical, behavioral, and social sciences. Goal 1 of the National Plan to Address Alzheimer's Disease is to prevent and effectively treat AD/ADRD by 2025. This initiative addresses the critical need to increase the number of health professionals and researchers who are trained to meet the expanding demand for cognitive impairment and dementia diagnosis, care, and research to meet Goal 1.</p>				
111323	<a href="#">Notice of Special Interest (NOSI): Tools to Enhance the Study of Prenatal and Pediatric Hydrocephalus</a>	National Institute of Neurological Disorders and Stroke/NIH/DHHS	NOT-NS-23-003	07-May-2024	Not Specified

## NIH Funding Opportunities

SPIN ID	Program Title	Sponsor Name	Sponsor Number	Deadline Date	Funding Amount
	<p>Program URL <a href="#">Link to program URL</a></p> <p>Deadline Dates (ALL) 20-May-2024 [Optional][LOI/Pre-App], 20-Jun-2024 , 20-Sep-2024 [Optional][LOI/Pre-App], 21-Oct-2024</p> <p>Synopsis This Notice of Funding Opportunity (NOFO) supports the development and validation of novel, complex, and pathophysiologically relevant human cellular models of Alzheimer's Disease Related Dementias (ADRD). The cellular model system needs to reflect multiple aspects of the human condition as much as possible, such as capturing the multiple pathologies and brain cell types observed in ADRD. Validation is required, including face and construct validity. Human cellular models could be developed and validated with the goal of supporting therapeutic development or better understanding of human disease mechanisms and mechanisms that cause predisposition or resilience to developing ADRD.</p>				
124266	<a href="#">Translational Neural Devices (R61/R33 - Clinical Trial Optional)</a>	National Institute of Neurological Disorders and Stroke/NIH/DHHS	PAR-24-151	29-May-2024	Not Specified
	<p>Contact Name Nick Langhals, PhD</p> <p>Contact Telephone 301-496-1779</p> <p>Contact Email <a href="mailto:NINDS-Devices@nih.gov">NINDS-Devices@nih.gov</a></p> <p>Sponsor Website</p> <p>Program URL <a href="#">Link to program URL</a></p> <p>Deadline Dates (ALL) 29-May-2024 , 27-Sep-2024 , 28-Jan-2025 , 28-May-2025 , 29-Sep-2025 , 28-Jan-2026 , 28-May-2026 , 28-Sep-2026 , 28-Jan-2027</p> <p>Synopsis The purpose of this Notice of Funding Opportunity (NOFO) is to encourage investigators to pursue translational activities and small clinical studies to advance the development of low risk therapeutic and diagnostic devices for disorders that affect the nervous or neuromuscular systems. Activities supported in this program include implementation of clinical prototype devices, non-clinical safety and efficacy testing, design verification and validation activities, obtaining Institutional Review Board (IRB) approval for a Non-Significant Risk (NSR) study (R61 phase), as well as a subsequent small clinical study (R33 phase). The clinical study is expected to provide information about the device function or final design that cannot be practically obtained through additional non-clinical assessments (e.g., bench top or animal studies) due to the novelty of the device or its intended use. This NOFO utilizes an Exploratory/Developmental Phased Award and will involve participation of NIH program staff in negotiating the final project plan before award and monitoring of research progress. Transition from the R61 to the R33 phase is contingent upon the successful completion of proposed milestones. This NOFO requires a Plan for Enhancing Diverse Perspectives (PEDP), which will be assessed as part of the scientific and technical peer review evaluation. Applications that fail to include a PEDP will be considered incomplete and will be withdrawn. Applicants are strongly encouraged to read the NOFO instructions carefully and view the available PEDP guidance material.</p>

## NIH Funding Opportunities

SPIN ID	Program Title	Sponsor Name	Sponsor Number	Deadline Date	Funding Amount
	Sponsor Website				
	Program URL	<a href="#">Link to program URL</a>			
	Deadline Dates (ALL)	07-May-2024 , 25-May-2024 , 07-Sep-2024 , 25-Sep-2024 , 07-Jan-2025 , 25-Jan-2025 , 07-May-2025 , 25-May-2025 , 07-Sep-2025			
	Synopsis	The National Institute on Aging (NIA) invites the submission of investigator-initiated research program project (P01) applications addressing scientific areas relevant to NIA's mission. Each application submitted to this Funding Opportunity Announcement (FOA) must include at least three related research projects that share a common central theme, focus, and overall objective, in addition to an administrative core to lead the project. Revision applications should include expansion of an existing, or proposal of a new, project or projects within the context and theme of the parent P01 award. Revision applications may not request support beyond the end date of the parent P01 award, but may propose to expand existing cores, or propose new cores, to support the expansion or creation of new projects.

	Synopsis	This notice of funding opportunity (NOFO) invites applications proposing to establish multi-scale computational models recapitulating dynamic changes associated with aging and Alzheimer's disease (AD) and AD-related dementias (ADRD). This broad scope encompasses a variety of computational approaches—such as mathematical and computational modeling, image analysis, artificial intelligence, and machine learning—to better understand aging processes and AD/ADRD across molecules, cells and networks, and cognition and behavior.

	<p>Contact Email <a href="mailto:NIAOpenMeasure@nih.gov">NIAOpenMeasure@nih.gov</a></p> <p>Sponsor Website</p> <p>Program URL <a href="#">Link to program URL</a></p> <p>Deadline Dates (ALL) 16-May-2024 [Optional][LOI/Pre-App], 15-Jun-2024</p> <p>Synopsis This Notice of Funding Opportunity (NOFO) invites U24 Cooperative Agreement applications that propose to establish a national Open Measurement Coordinating Network for Non-Pharmacological Alzheimer's Disease (AD) and AD-Related Dementias (ADRD) Primary Prevention Trials. The Network will serve as a centralized hub for developing, validating, standardizing, and disseminating measures and measurement methods for AD/ADRD primary prevention trials. It will incorporate measures and measurement methods across neuropsychological, biomarker, and functional domains to meet the goal of primary prevention of AD/ADRD centered around brain health equity. Brain health equity is the fair distribution of brain health determinants, outcomes, and resources within and between segments of the population, regardless of social standing. Measures and measurement methods of interest will test outcomes and mechanisms of action (e.g., cognitive, behavioral, structural/social, computational, biological) that are customized for individuals with different needs and that are linked to real-world function. Resources developed through this initiative, including measurement instruments, methods, algorithms, code, documentation, and normative data, are intended to enable future measures and measurement-methods-development projects that support AD/ADRD primary prevention research needs. The National Institute on Aging (NIA) is particularly interested in proposals that aim to advance equity for populations disproportionately impacted by AD/ADRD.</p>

124215	<a href="#">RFA-AG-25-002 -- Consortium for Palliative Care Research Across the Lifespan (U54 Clinical Trial Optional)</a>	National Institute on Aging/NIH/DHHS	RFA-AG-25-002	31-May-2024 [Optional][LOI/Pre-App]	Not Specified
	<p>Contact Name: Alexis Bakos, PhD, MPH, RN</p> <p>Contact Telephone: 301-921-5970</p> <p>Contact Email: <a href="mailto:NIAPalliativeCareResearch@nih.gov">NIAPalliativeCareResearch@nih.gov</a></p> <p>Sponsor Website:</p> <p>Program URL: <a href="#">Link to program URL</a></p> <p>Deadline Dates (ALL): 31-May-2024 [Optional][LOI/Pre-App], 02-Jul-2024</p> <p>Synopsis: This Notice of Funding Opportunity (NOFO) invites applications proposing the development of a specialized center. Henceforth, the center will be referred to as the "Consortium." The aim of the Consortium will be to provide resources, expertise, and coordination to advance innovative, high-quality research on palliative care for those living with serious illnesses across the lifespan. The research infrastructure will encompass Alzheimer's disease (AD) and AD-related dementias (ADRD), cancer, and other serious illnesses and populations relevant to NIH's partnering Institutes, Centers, and Offices (ICOs). NIH currently funds many palliative care research projects across its ICOs, and there is a need for a research infrastructure to leverage synergies, coordinate efforts, develop the scientific workforce, and address remaining gaps in the field. An important focus will be research to understand and address disparities in access, quality, and use of palliative care services for health disparities populations (as defined by the NIA Health Disparities Framework priority populations). The overall goals of the Consortium are the following: Create new scientific knowledge on delivery and outcomes of palliative care approaches across the lifespan and across a range of populations and serious illnesses. Foster development of early- and mid-career investigators pursuing research careers in palliative care as well as established investigators shifting to palliative care research, with a goal of diversifying and expanding the palliative care research workforce. Serve as a national platform that provides resources and expertise to facilitate high-quality research on palliative care across the lifespan and across a range of populations and serious illnesses, including clinical trials, observational, quasi-experimental, and qualitative research. Engage healthcare systems, including long term care settings; home- and community-based services organizations; and other community partners, to inform the design and conduct of palliative care research studies, including pragmatic clinical trials. Disseminate research findings and their implications for clinical practice, methodologic approaches, best practices, toolkits, and other impactful resources for researchers, clinicians, patients, and other relevant audiences.</p>

## NIH Funding Opportunities

SPIN ID	Program Title	Sponsor Name	Sponsor Number	Deadline Date	Funding Amount
	<p>Sponsor Website</p> <p>Program URL <a href="#">Link to program URL</a></p> <p>Deadline Dates (ALL) 07-May-2024 , 25-Sep-2024 , 07-Jan-2025 , 25-Jan-2025 , 07-May-2025 , 25-Sep-2025 , 07-Jan-2026 , 25-Jan-2026 , 07-May-2026</p> <p>Synopsis This program offers institutions an opportunity to apply for additional trainee research slots to support eligible candidates under an existing T32 or T35 award when all regularly-awarded positions have been filled. The NIDCD administratively funds a supplemental slot designated specifically for a selected trainee - either predoctoral or postdoctoral - to an existing T32 or T35 award. That position remains a part of the T32 or T35 for as long as the named individual is a member of the training program. When the individual no longer receives support from the T32 or T35, the funds for the position are removed from the grant. To ensure an appropriate training experience, only predoctoral slots are considered for programs that exclusively support predoctoral training; the same applies to postdoctoral slots. Programs supporting both predoctoral and postdoctoral training may apply for either. NIDCD encourages institutions to recruit prospective predoctoral and postdoctoral students from diverse backgrounds to consider participating in this program, including but not limited to individuals from underrepresented groups, such as those from underrepresented racial and ethnic groups, individuals with disabilities and individuals from disadvantaged backgrounds. For more information, see NOT-OD-20-031 "Notice of NIH's Interest in Diversity".</p>

	<a href="#">Organoids (R01-Clinical Trial Not Allowed)</a>	Other Communication Disorders/NIH/DHHS	058		Specified
	<p>Contact Name   Nancy Freeman, Ph.D</p> <p>Contact Telephone   301-402-3458</p> <p>Contact Email   <a href="mailto:freemann@mail.nih.gov">freemann@mail.nih.gov</a></p> <p>Sponsor Website  </p> <p>Program URL   <a href="#">Link to program URL</a></p> <p>Deadline Dates (ALL)   07-May-2024</p> <p>Synopsis   The purpose of this NIDCD initiative is to encourage research in the development, characterization, and reproducibility/reliability of human auditory and vestibular organoids. Applications investigating animal organoids are allowable but only if accompanying comparative or other integrated companion studies with human organoids. Singular animal organoid studies alone are not responsive to this funding opportunity. This funding opportunity encourages innovative, reproducible, and novel methodologies and technologies that will drive the reproducibility and holistic longevity of hearing/balance sensory organoids as model systems. The development of novel tools to deliver genes, proteins, molecules, and synthetics that might lead to the successful expansion and longer-term survivability of organoid populations in a stable, reliable, and reproducible manner is highly encouraged. Subsequent characterization of the organoid platforms must be shown to mimic and recapitulate the native correlative biological function. Applications that provide approaches that remove current barriers and lessen challenges to improve current reproducibility and stability are highly encouraged. Applications that have breakthrough approaches and technologies using human auditory/vestibular organoids are highly encouraged.</p>

	<p>Synopsis</p>	<p>2025 , 05-Oct-2025 , 07-Jan-2026 , 05-Feb-2026 , 07-May-2026 , 05-Jun-2026 , 07-Sep-2026 , 05-Oct-2026 , 07-Jan-2027</p> <p>The NIDCD is committed to identifying effective interventions for the diagnosis, prevention, or treatment of communication disorders by supporting well-designed and well-executed clinical trials. This notice of funding opportunity announcement (NOFO) supports investigator initiated low risk clinical trials addressing the mission and research interests of NIDCD. Clinical trials must meet ALL the following criteria: meet the budget limits of this NOFO, not require FDA oversight, not an NIH defined Phase III Clinical Trial, have low risks to subjects, and intends to gather scientific data/evidence to inform subsequent studies. This NOFO also supports low risk trials determined to be Basic Science Experimental Studies involving Humans (BESH). These studies fall within the NIH definition of a clinical trial and meet the definition of basic research. It is advisable that only one clinical trial be proposed in each NIDCD Clinical Trials in Communication Disorders R01 application. High risk clinical trials not meeting all the criteria above are referred to companion U01 NOFO, PAR-24-050, NIDCD Cooperative Agreement for Clinical Trials in Communication Disorders.</p>

Synopsis	The National Institute on Deafness and Other Communication Disorders (NIDCD) is issuing this Notice to highlight priorities from its new strategic plan, in basic and mechanistic research on neural circuits underlying sensory processing in hearing, balance, taste and smell. NIDCD encourages multidisciplinary and innovative projects, from diverse teams, to advance a mechanistic understanding of the behavior of neural circuits at cellular and sub-second temporal resolution by integrating cutting-edge technologies and approaches for recording and modulation of cells and circuits (e.g., electrophysiology, optical imaging, optogenetics, chemogenetics, sonogenetics, magnetogenetics, pharmacologic modulation). Applications are expected to integrate appropriate domains of expertise, including but not limited to biological, chemical and physical sciences, engineering, computational modeling, statistical analysis, and bioethics, as appropriate. Mechanistic human studies and comparative, cross-species projects are highly encouraged.

## NIH Funding Opportunities

SPIN ID	Program Title	Sponsor Name	Sponsor Number	Deadline Date	Funding Amount
	Deadline Dates (ALL)	07-May-2024 , 05-Jun-2024 , 16-Jun-2024 , 07-Sep-2024			
	Synopsis	The purpose of this Notice of Special Interest (NOSI) is to encourage applications for research on hearing health care in adults in support of improving access and affordability. Further research is needed to strengthen the evidence base with a goal of delivering better hearing health care outcomes in adults.			
104661	<a href="#">Notice of Special Interest (NOSI): NIDCD Health Disparities and Inequities Research</a>	National Institute on Deafness and Other Communication Disorders/NIH/DHHS	NOT-DC-21-003	08-Apr-2024	Not Specified

	Synopsis	<p>The National Institute on Deafness and Other Communication Disorders (NIDCD) is issuing this Notice of Special Interest (NOSI) to stimulate research in areas regarding the health of women within the scope of NIDCD’s mission. NIDCD's mission is to conduct and support research and research training in the normal and disordered processes of hearing, balance, taste, smell, voice, speech, and language. As noted in the recently issued 2023–2027 NIDCD Strategic Plan (2023-2027 NIDCD Strategic Plan   NIDCD), research projects to improve the health of women covering the lifespan are encouraged across all the NIDCD mission areas. These projects may include biological studies which may incorporate anatomical, structural, hormonal, or genetic aspects, behavioral traits, societal aspects, or healthcare related activities that may benefit a women's quality of life.</p>

Program URL	<a href="#">Link to program URL</a>
Deadline Dates (ALL)	03-May-2024 , 08-Sep-2024
Synopsis	<p>This notice of funding Opportunity (NOFO) will support pilot, feasibility or exploratory research in priority areas in substance use epidemiology, prevention, and health services, including: 1) responses to sudden and severe emerging drug issues (e.g. the ability to look into a large and sudden spike in opioid or synthetic cannabinoid use/overdoses in a particular community); 2) responses to emerging marijuana trends and topics related to the shifting policy landscape, related to imminent policy change; 3) responses to unexpected and time-sensitive prescription drug abuse research opportunities (e.g., new state or local efforts); 4) responses to unexpected and time-sensitive medical system issues (e.g. opportunities to understand addiction services in the evolving health care system); 5) responses to unexpected and time-sensitive criminal or juvenile justice opportunities (e.g. new system and/or structural level changes) that relate to drug abuse and access and provision of health care service; 6) partnerships between researchers and state or local organizations to support the evaluation of new local policies, programs, or practices in response to public health emergencies (e.g., the opioid crisis); 7) research examining how the COVID-19 pandemic has impacted drug markets and overdose risk; 8) research examining health outcomes associated with telehealth compared to in-person psychiatric care (e.g. risk of diversion/misuse, reduced treatment gap); 9) research examining the impact of the discontinuation of the Medicaid continuous enrollment provision that was enacted during the COVID-19 pandemic on populations with substance use disorders, and 10) research to understand outcomes related to states receiving and implementing Centers for Medicare and Medicaid Services (CMS) 1115 waivers that allow Medicaid to pay for health care services in carceral settings. To be responsive to this NOFO, it should be clear that the knowledge gained from the proposed study is time-sensitive and that an expedited review and funding are required in order for the scientific question to be answered (i.e. an imminent policy change will not allow for standard review and funding timeline).</p>

## NIH Funding Opportunities

SPIN ID	Program Title	Sponsor Name	Sponsor Number	Deadline Date	Funding Amount
	Deadline Dates (ALL)	07-May-2024 , 05-Jun-2024 , 07-Sep-2024			
	Synopsis	NIDA is interested in receiving research applications focusing on studying the long-term neurocognitive consequences of the COVID-19/HIV/SUDs syndemic.			
106339	<a href="#">Notice of Special Interest (NOSI): Evaluation of Sex Differences on HIV-Associated Comorbidities in the Context of Stimulant Use</a>	National Institute on Drug Abuse/NIH/DHHS	NOT-DA-21-020	07-May-2024	Not Specified
	Contact Name	Da-Yu Wu, PhD			
	Contact Telephone	301-435-4649			
	Contact Email	<a href="mailto:wudy@nida.nih.gov">wudy@nida.nih.gov</a>			
	Sponsor Website				
	Program URL	<a href="#">Link to program URL</a>			
	Deadline Dates (ALL)	07-May-2024			
	Synopsis	The goal of this Notice is to encourage applications focusing on the understanding of the biological basis of sex differences in HIV neuropathogenesis and the comorbidity of HIV with misuse of stimulants, including amphetamine, methamphetamine, cocaine, and nicotine. Studies at single cell and CNS circuits levels and in live behaving animals are encouraged.			
102988	<a href="#">Notice of Special Interest (NOSI): Basic Research on Fentanyl and Synthetic Fentanyl Analogs: Signaling, Neurobiology, and Pharmacology</a>	National Institute on Drug Abuse/NIH/DHHS	NOT-DA-21-033	07-May-2024	Not Specified
	Contact Name	Pamela G. Fleming

SPIN ID	Program Title	Sponsor Name	Sponsor Number	Deadline Date	Funding Amount
	<p>Sponsor Website</p> <p>Program URL <a href="#">Link to program URL</a></p> <p>Deadline Dates (ALL) 07-May-2024 , 05-Jun-2024 , 16-Jun-2024 , 07-Sep-2024 , 05-Oct-2024 , 16-Oct-2024 , 07-Jan-2025 , 05-Feb-2025 , 16-Feb-2025 , 07-May-2025 , 05-Jun-2025 , 16-Jun-2025 , 07-Sep-2025</p> <p>Synopsis The purpose of this Notice is to encourage the submission of research project applications that enhance our understanding of the nature, extent, distribution, etiology, comorbidities, and consequences of drug use, misuse, and addiction across individuals, families, communities, and diverse population groups. Of interest are applications that address multiple levels of risk, resilience, and causation across scientific disciplines, and that apply novel methods to advance knowledge of the interplay among genetic, environmental, neurobiological, and developmental factors and associated health and disease outcomes. Priority will be given to research with a well described path towards translation and/or public health impact. In addition to novel data collection, approaches are encouraged that build on the research investments of NIH and sister HHS agencies to harness existing data on the epidemiology and etiology of drug misuse to improve public health prevention and treatment programs. The research areas noted below should be considered in the context of topics such as health disparities or inequities, familial/genetic liability, and physical, psychiatric, and polysubstance comorbidities and interactions.</p>

Synopsis	The goal of this Notice of Funding Opportunity (NOFO) is to support doctoral candidates from a variety of academic disciplines for up to two years for the completion of the doctoral dissertation research project. Research projects should align with the NIDA Strategic Plan (2022-2026 NIDA Strategic Plan Director's Message   National Institute on Drug Abuse (NIDA) (nih.gov). This award will facilitate the entry of promising new investigators into the field of substance use/substance use disorder (SU(D) research, enhancing the pool of highly talented SU(D) researchers. Applications are particularly encouraged from individuals from diverse backgrounds, including those from underrepresented groups as described in the Notice of NIH's Interest in Diversity (NOT-OD-20-031). This NOFO is designed specifically for applicants proposing research that does not involve leading an independent clinical trial, a clinical trial feasibility study, or an ancillary clinical trial. Applicants to this NOFO are permitted to propose research experience in a clinical trial led by a mentor or co-mentor.

	Deadline Dates (ALL)	07-May-2024 , 05-Jun-2024 , 16-Jun-2024 , 07-Sep-2024				
	Synopsis	The purpose of this Notice is to encourage grant applications proposing research that makes use of available, large data sets with the objective of improving HIV epidemic modeling and service planning, with greater attention to the role of substance use. Data may be from NIDA-funded or co-funded projects as well as from other sources. This Notice is expected to increase the utilization of existing data including epidemiologic and clinic cohorts, longitudinal follow-up studies of interventions, as well as other publicly available data including those provided by government bodies, data warehouses and commercial data sources. Existing data may include data from completed projects as well as those that are ongoing. Results from studies supported by this NOSI are expected to generate knowledge that can be used to answer significant questions about HIV epidemics, promote efficient provision of services, and address limitations of existing models that have guided public policy. NIDA is particularly interested in research that integrates substance use considerations into program planning and policy to increase the quality of HIV services and their responsiveness to substance using populations.

These institutional research training programs should produce well-trained neuroscientists who complete the program with the research skills and scientific knowledge to make a significant contribution to research on AD/ADRD cognitive impairment and dementia. Programs should be designed to enhance the breadth and depth of training across the spectrum AD/ADRD research areas (e.g. AD, Vascular Contributions to Cognitive Impairment and Dementia (VCID), Lewy Body Dementia (LBD), Fronto-temporal Dementia (FTD) and mixed dementias) by incorporating didactic, research and career development components within this theme into a program that fosters exceptional research skills and knowledge. Programs may support basic, clinical and/or translational research. Programs supported by this FOA must include formal components to ensure a thorough understanding of experimental design, statistical principles and methodological approaches, analytical skills, and skills for communicating science, both orally and in writing, to a wide variety of audiences. All programs are expected to design and/or provide opportunities and activities that will foster the development of quantitative literacy and the application of quantitative approaches to the trainees' research. These training programs are intended to be 2 years in duration and support training of one or more of the following groups: dissertation stage predoctoral students in their 3rd and/or 4th year of graduate school, postdoctoral fellows and fellowship-stage clinicians. (This FOA cannot be used to support 1st or 2nd year graduate students). This Funding Opportunity</p>

Synopsis	The Jointly Sponsored NIH Predoctoral Training Program in the Neurosciences (JSPTPN) is an institutional program that supports broad and fundamental research training in the neurosciences. In addition to a broad education in the neurosciences, a key component will be a curriculum that provides a strong foundation in experimental design, statistical methodology and quantitative reasoning. JSPTPN programs are intended to be 2 years in duration and students may only be appointed to this training grant during the first 2 years of their graduate research training. The primary objective is to prepare students to be well-trained scientists equipped to pursue careers in neuroscience. This Funding Opportunity Announcement (FOA) does not allow appointed Trainees to lead an independent clinical trial, but does allow them to obtain research experience in a clinical trial led by a mentor or co-mentor.

Synopsis	This funding opportunity announcement (FOA) is designed to support interdisciplinary research teams of multiple PDs/PIs to investigate the mechanism of action of pain relief by medical devices with the overall goal of optimizing therapeutic outcomes for FDA-approved or -cleared technologies. Teams must leverage appropriate multi-disciplinary expertise to develop new principles and methods for experimentation, analysis, and interpretation. Teams are encouraged to consider objectives that will produce major advances in the understanding of pain relief by medical devices.

Synopsis	The NIH Research Education Program (R25) supports research education activities in the mission areas of the NIH. The overarching goal of this R25 program is to support educational activities that complement and/or enhance the training of a workforce to meet the nation's biomedical, behavioral and clinical research needs. To accomplish the stated over-arching goal, this FOA will support creative educational activities with a primary focus on: Courses for Skills Development This FOA seeks to support programs that include innovative approaches to enhance biomedical engineering (BME) design education to ensure a future workforce that can meet the nation's needs in biomedical research and healthcare technologies. Applications are encouraged from institutions that propose to establish new or to enhance existing team-based design courses or programs in undergraduate biomedical engineering departments or other degree-granting programs with biomedical engineering tracks/minors. This FOA targets the education of undergraduate biomedical engineering/bioengineering students in a team-based environment. Health equity and universal design topics must be integrated throughout the educational activities. While current best practices such as multidisciplinary/interdisciplinary education, introduction to the regulatory pathway and other issues related to the commercialization of medical devices, and clinical immersion remain encouraged components of a strong BME program, this FOA also challenges institutions to propose other novel, innovative and/or

Synopsis	This Notice of Funding Opportunity (NOFO) supports translational exploratory/developmental research that directly advances the discovery of novel treatment strategies, i.e., medical countermeasures (MCMs), that address serious morbidity and mortality after acute exposure to highly toxic chemical threats. Chemical threats are toxic compounds that could be used in a terrorist attack or accidentally released from industrial production, storage, or shipping. They include traditional chemical warfare agents, toxic industrial chemicals, pesticides, and ultra-potent synthetic (UPS) opioids. This NOFO supports translational research that includes, but is not limited to, preliminary efficacy and/or early preclinical development studies towards discovery and validation of novel molecular entities or biologics as candidate MCMs. In addition to novel agents, new treatment strategies may involve repurposing already FDA-approved products or combinations of interventions based on established mechanisms of action. Projects supported by this NOFO are expected to generate preliminary data that would facilitate the development of competitive applications for more extensive support from the NIH CounterACT Cooperative Agreement program or other related initiatives.

## NIH Funding Opportunities

SPIN ID	Program Title	Sponsor Name	Sponsor Number	Deadline Date	Funding Amount
	Synopsis	<p>The purpose of this program is to recruit and retain outstanding, postdoctoral-level health professionals who have demonstrated potential and interest in pursuing careers as clinician-investigators. To address the growing need for this critical component of the research workforce, this funding opportunity seeks applications from institutional programs that can provide outstanding mentored research opportunities for Resident-Investigators and foster their ability to transition to individual career development research awards. The program will support institutions to provide support for up to 2 years of research conducted by Resident-Investigators in structured programs for clinician-investigators with defined program milestones.</p>

	Synopsis	<p>The purpose of this Brain Research through Advancing Innovative Neurotechnologies® (BRAIN) Initiative is to encourage research that will develop and validate novel tools to facilitate the detailed analysis of complex circuits and provide insights into cellular interactions that underlie brain function. The new tools and technologies should inform and/or exploit cell-type and/or circuit-level specificity. Plans for validating the utility of the tool/technology will be an essential feature of a successful application. The development of new genetic and non-genetic tools for delivering genes, proteins and chemicals to cells of interest or approaches that are expected to target specific cell types and/or circuits in the nervous system with greater precision and sensitivity than currently established methods are encouraged. Tools that can be used in a number of species/model organisms rather than those restricted to a single species are highly desired. Applications that provide approaches that break through existing technical barriers to substantially improve current capabilities are highly encouraged.</p>

Applications are encouraged to propose adventurous and challenging goals that can only be tackled by a synergistic team-based approach and have the potential to be transformative and/or to enable significant advances. These studies at the exploratory stage are intended for the development of experimental capabilities and/or theoretical frameworks in preparation for a future competition for larger-scale or extended efforts, including the BRAIN TargetedBCP (R01) or the multi-component, Team-Research BRAIN Circuit Programs (U19). The overall goal of this FOA is to enable a large-scale analysis of neural systems and circuits within the context and during the simultaneous measurement of an ethologically relevant behavior. Toward this end, teams are expected to assemble and leverage multi-disciplinary expertise, and to integrate experimental with computational and theoretical approaches. Teams are expected to bridge fields by incorporating rich information on cell-types, on circuit functionality and connectivity, in conjunction with sophisticated analyses of an ethologically relevant behavior of an organism or a well-defined neural system. Teams are also expected to aim for a mechanistic understanding of the circuits of the central nervous system (CNS) by applying cutting-edge methods such as those for large-scale recording, manipulation, and analysis of neural circuits across multiple regions of the CNS.</p>

The goal is to support adventurous projects that can realize a potentially transformative outcome within 5 years. Applications are expected to address circuit function in the context of specific behaviors or neural systems, such as sensation, perception, attention, reasoning, intention, decision-making, emotion, navigation, communication, or homeostasis. Projects should link theory, data analysis, and/or computational approaches to experimental design and should produce predictive models (conceptual or quantitative). Projects should aim to improve the understanding of circuits of the central nervous system by systematically controlling stimuli and/or behavior while actively recording and/or manipulating dynamic patterns of neural activity. Diverse species or experimental systems and a cross-species/comparative approach are welcome and should be chosen based on their power to address the specific question at hand and to reveal generalizable and fundamental neuroscience principles.</p>

	Synopsis	<p>This Funding Opportunity Announcement (FOA) solicits applications to develop informatics tools for analyzing, visualizing, and integrating data related to the BRAIN Initiative or to enhance our understanding of the brain. As part of programs of building the informatics infrastructure for the BRAIN Initiative, the FOA supports several different, but related activities. These include modifying existing analysis and visualization tools to deal with BRAIN Initiative data and integrating different types of BRAIN Initiative datasets. Proposing the development of new tools to deal with BRAIN Initiative data is also permitted. The tools supported under this FOA will make use of relevant data standards and will be built so that they can be integrated into the data repositories, both of which are created in awards under the other FOAs of the BRAIN initiative informatics program. The tools must be user-friendly in accessing and analyzing data from appropriate data archives, and should analyze/visualize data without requiring users to download data. The tools should also allow data to be combined for analysis/visualization from multiple locations.</p>

**Synopsis**  
 The purpose of the Research Enhancement Award Program (REAP) for Health Professional Schools and Graduate Schools is to support small scale research grants at institutions that do not receive substantial funding from the NIH, with an emphasis on providing biomedical research experiences primarily for health professional, undergraduate and graduate students and enhancing the research environment at applicant institutions. Eligible institutions must award baccalaureate or advanced science degrees and have received no more than \$6 million dollars per year of NIH support (in both direct and F&A/indirect costs) in 4 of the last 7 fiscal years. For institutions composed of multiple schools and colleges, the \$6 million funding limit is based on the amount of NIH funding received by all the schools and colleges within the institution as a whole. Help determining the Organization Funding Level can be found here or <https://grants.nih.gov/grants/funding/r15.htm>. This REAP funding opportunity announcement (FOA) supports investigator-initiated mechanistic and/or minimal risk clinical trials addressing the mission and research interests of the participating NIH institutes. For purposes of this FOA, minimal risk clinical trials are defined as those that do not require FDA oversight, do not intend to formally establish efficacy, and have low risks to potentially cause physical or psychological harm.

	<p>Sponsor Website</p> <p>Program URL <a href="#">Link to program URL</a></p> <p>Deadline Dates (ALL) 07-May-2024 , 07-Sep-2024 , 07-Jan-2025 , 07-May-2025 , 07-Sep-2025</p> <p>Synopsis                      The purpose of this NIH Mentored Research Scientist Development Award (K01) is to provide salary and research support to investigators who are within ten years of completing their terminal professional degree or residency training. Research and mentorship must be in the field of HIV/AIDS translational studies, using nonhuman primates (NHPs) as preclinical models. These awards will provide 3 years of support for intensive research career development under the guidance of an experienced mentorship team, with expertise in both the pre-clinical application of NHP HIV/AIDS models and in translation of the results from such studies to clinical application in humans. The expectation is that this sustained experience will launch independent research careers and enable awardees to become competitive for new research project grant (e.g., R01) funding. This funding initiative addresses research priorities of the fiscal year (FY) 2021-2025 NIH Strategic Plan for HIV and HIV-Related Research (<a href="https://www.oar.nih.gov/hiv-policy-and-research/strategic-plan">https://www.oar.nih.gov/hiv-policy-and-research/strategic-plan</a>): reduce the incidence of HIV; develop next-generation HIV therapies; research toward HIV cure; and address HIV-associated comorbidities, coinfections, and complications. This Notice of Opportunity Announcement (NOFO) is designed specifically for applicants proposing research that does not involve leading an independent clinical trial, a clinical trial feasibility study, or an ancillary clinical trial. Applicants to this NOFO are permitted to propose research experience in a clinical trial led by a mentor and/or co-mentor.</p>

---------	---------------	--------------	----------------	---------------	----------------

companion announcement RFA- AA-21-016 HIV Prevention and Alcohol (R01 Clinical Trials Optional). The NIAAA expects that applications to this NOFO will describe the planned clinical trial and in so doing demonstrate that the proposed (R34) research is scientifically necessary to design or plan the subsequent trial. Furthermore, this NOFO will support research projects that are designed to provide results that will be sufficient to inform the future trial without further studies. The planned Phase II, III, or IV trial must be primarily intended to test the efficacy, safety, clinical management, or implementation of intervention(s) in the prevention of HIV. In this NIAAA funding opportunity for pilot clinical trials the R34 mechanism is intended to provide new information that answers a scientific or operational question(s) which may be pragmatic in nature and, therefore, informs the final development of a clinical trial and testing of intervention tools.

Synopsis	The NOFO seeks to expand the HIV/AIDS prevention toolkit among alcohol impacted populations with a range of patterns of episodic and long-term use and associated behavioral and biological risks for HIV acquisition. This includes integration of effective prevention and treatment interventions with an understanding of the overarching framework for reducing the incidence of new infections by facilitating cross-cutting informative research. This research activity includes the development and testing of new interventions and expansion of existing effective interventions as well as the implementation of these integrative preventive activities in diverse settings and populations. Six areas of research are of primary interest related to alcohol use and related mental health and substance use comorbidities. These include but are not limited to 1) PrEP Utilization, 2) Treatment as Prevention (TasP), 3) Integration of Preventive Intervention Strategies, 4) Prevention-related Cross-cutting Research, 5) Syndemic Approaches and, 6) Implementation and Operations Research.

	Synopsis	<p>The purpose of this notice of funding opportunity announcement (NOFO ) is to support preclinical HIV/AIDS research using NHP models performed by Early Stage Investigators (ESIs) who are within 10 years of their terminal degree or completion of their residency training but who have at least two years of postdoctoral experience. The goal of this support is to help advance HIV/AIDS researchers using NHP models in preclinical research by providing a degree of independence for these ESIs to develop new research directions and to position these researchers to be competitive for new research funding (e.g., R01). Proposed projects must use NHPs as preclinical models for HIV/AIDS research. This funding initiative encompasses all priorities of the fiscal year (FY) 2021-2025 NIH Strategic Plan for HIV and HIV-Related Research (<a href="https://www.oar.nih.gov/hiv-policy-and-research/strategic-plan">https://www.oar.nih.gov/hiv-policy-and-research/strategic-plan</a>): reduce the incidence of HIV; develop next-generation HIV therapies; conduct research toward HIV cure; address HIV-associated comorbidities, coinfections, and complications; and advance cross-cutting areas of research.</p>

	Synopsis	This Funding Opportunity Announcement (FOA) solicits applications from research partnerships formed by academic and industrial investigators to accelerate the development and adoption of promising bioengineering tools and technologies that can address important biomedical problems. The objectives are to establish these tools and technologies as robust, well-characterized solutions that fulfill an unmet need and are capable of enhancing our understanding of life science processes or the practice of medicine. Awards will focus on supporting multidisciplinary teams that apply an integrative, quantitative bioengineering approach to developing technologies. The goal of the program is to support technological innovations that deliver new capabilities which can realize meaningful solutions within 5 – 10 years.

Synopsis	The purpose of this notice of funding opportunity (NOFO) is to support preclinical optimization and development of safe, effective, and non-addictive small molecule and biologic therapeutics to treat pain. The goal of the program is to accelerate the optimization and development of promising early therapeutic molecules and to facilitate readiness for the Early Phase Pain Investigation Clinical Network (EPPIC-Net) or other Phase II clinical studies. Applicants must have a promising biologic or small molecule starting point for optimization, robust biological rationale for the intended approach, and identified assays for optimization of the agent. The scope of this program includes optimization and early development activities, IND-enabling studies, development of a pharmacodynamic/target engagement biomarker, assembly and filing of an Investigational New Drug (IND) application and Phase I clinical testing. This is a milestone-driven phased cooperative agreement program involving participation of NIH program staff in the development of the project plan and monitoring of research progress.

Research projects must address the research priorities related to the regulatory authority of the Food and Drug Administration (FDA) Center for Tobacco Products (CTP) as mandated by the Family Smoking Prevention and Tobacco Control Act (FSPTCA), Public Law 111-31. The awards under this FOA will be administered by NIH using funds made available through the CTP and the FSPTCA (P.L. 111-31). This Funding Opportunity Announcement (FOA) is designed specifically for candidates proposing research that does not involve leading an independent clinical trial, a clinical trial feasibility study, or an ancillary study to a clinical trial. Applicants to this FOA are permitted to propose research experience in a clinical trial led by a mentor or co-mentor. Those proposing a clinical trial or an ancillary clinical trial as lead investigator, should apply to the companion FOA (RFA-OD-22-024).</p>

SPIN ID	Program Title	Sponsor Name	Sponsor Number	Deadline Date	Funding Amount
---------	---------------	--------------	----------------	---------------	----------------

Program is a historic effort to gather data from at least 1 million people, with the goal of accelerating health research and medical breakthroughs, and enabling individualized prevention, treatment, and care. The program is creating a national research resource to inform thousands of studies, covering a wide variety of health conditions. Researchers will use data from the program to learn more about how individual differences in lifestyle, environment, and biological makeup can influence health and disease. The purpose of this announcement is to fund organizations who can help All of Us build its cohort of volunteers who reflect the rich diversity of the United States and are actively engaged as partners. These funded organizations will help design and implement strategies to raise awareness of the program through community and health care provider organizations, drive increased enrollment of participants, foster regular communication with participants, and engage the research community to use the data being gathered. Award Project Duration: Award periods are anticipated to be up to five (5) years but may be shortened or extended as needed. Pre-Submission Webinar: A webinar will be conducted on June 27, 2022 at [Time TBD]. Registration information will be posted here once it is available. White Paper Deadlines: This ROA will remain open for three (3) years from its issue date, unless otherwise updated via an amendment, and includes multiple white paper (WP) submission deadlines. All WP deadline times are 3:00 PM Eastern Time: Calendar Year 2022 WP Deadlines August 31, 2022 November 30, 2022 Calendar Year 2023 WP Deadlines February 28, 2023 May 31, 2023 August 31, 2023 November 30, 2023 Calendar Year 2024 WP Deadlines February 29, 2024 May 31, 2024 August 30, 2024 November 29, 2024 Calendar Year 2025 WP Deadlines February 28, 2025 May 23, 2025 Documents and Related Links: The full ROA package is attached in the 'Attachments/Links' section. Potential offerors are encouraged to carefully review the announcement before submitting questions and/or preparing a white paper submission. A link to the All of Us Research Program webpage has been provided for additional information about our program.

## NIH Funding Opportunities

SPIN ID	Program Title	Sponsor Name	Sponsor Number	Deadline Date	Funding Amount
	Synopsis	<p>The NIH INvestigation of Co-occurring conditions across the Lifespan to Understand Down syndromE (INCLUDE) Project seeks to improve health and quality-of-life for individuals with Down syndrome (DS). This Notice of Special Interest (NOSI) announces NIH support for development of Academic Research Enhancement Award (AREA) and Research Enhancement Award Program (REAP) applications to support small scale basic and translational research grants that meet programmatic objectives of the INCLUDE project at institutions that do not receive substantial funding from the NIH, with an emphasis on providing biomedical research experiences primarily for undergraduate and/or graduate students and enhancing the research environment at applicant institutions. Eligible institutions must award NIH-relevant baccalaureate or advanced degrees in health professions and have received less than \$6 million per year of NIH support (total costs) in 4 of the last 7 fiscal years. In this FOA, a college is a stand-alone entity and not a component of a university system. The goal of this NOSI is also to build a pathway of meritorious undergraduate and graduate students engaged in Down syndrome research.</p>

## NIH Funding Opportunities

SPIN ID	Program Title	Sponsor Name	Sponsor Number	Deadline Date	Funding Amount
	Synopsis	<p>This funding opportunity announcement (FOA) is issued by the National Institute of Neurological Disorders and Stroke to enable submission of program project grant applications that propose to conduct innovative, interactive research to answer significant scientific questions that are important for the mission of NINDS, via a synergistic collaboration between outstanding scientists who might not otherwise collaborate. The program project grant is designed to support research in which the funding of several interdependent highly meritorious projects as a group offers significant scientific advantages over support of these same projects as individual research grants.</p>			
115336	<a href="#">Ruth L. Kirschstein National Research Service Award (NRSA) Short-Term Institutional Research Training Grant (Parent T35)</a>	National Institutes of Health/DHHS	PA-23-080	07-May-2024	Not Specified

	Synopsis	<p>The National Institutes of Health (NIH) will award Ruth L. Kirschstein National Research Service Award (NRSA) Short-Term Institutional Research Training Grants (T35) to eligible, domestic institutions to develop and/or enhance research training opportunities for predoctoral students interested in careers in biomedical, behavioral, or clinical research. Many NIH Institutes and Centers (ICs) use this NRSA program exclusively to support intensive, short-term research training experiences for health professional students (medical students, veterinary students, and/or students in other health-professional programs) during the summer. This program is also intended to encourage training of graduate students in the physical or quantitative sciences to pursue research careers by short-term exposure to, and involvement in, the health-related sciences. The training should be of sufficient depth to enable the trainees, upon completion of the program, to have a thorough exposure to the principles underlying the conduct of biomedical research. This Funding Opportunity Announcement (FOA) does not allow appointed Trainees to lead an independent clinical trial, but does allow them to obtain research experience in a clinical trial led by a mentor or co-mentor.</p>

121523	<p><a href="#">Specialized Programs of Research Excellence (SPOREs) in Human Cancers for Years 2024, 2025, and 2026 (P50 Clinical Trial Required)</a></p>	National Institutes of Health/DHHS	PAR-23-284	25-May-2024	7,000,000 USD
	<p>Contact Name Toby T. Hecht, Ph.D, Associate Director</p> <p>Contact Telephone 240-276-5683</p> <p>Contact Email <a href="mailto:hechtt@mail.nih.gov">hechtt@mail.nih.gov</a></p> <p>Sponsor Website</p> <p>Program URL <a href="#">Link to program URL</a></p> <p>Deadline Dates (ALL) 25-May-2024 , 25-Sep-2024 , 25-Jan-2025 , 25-May-2025 , 25-Sep-2025 , 25-Jan-2026 , 25-May-2026 , 25-Sep-2026</p> <p>Synopsis Through this Notice of Funding Opportunity (NOFO), the National Cancer Institute (NCI) invites applications for P50 Research Center Grants for Specialized Programs of Research Excellence (SPORE). Based on the research proposed, applications may be jointly funded with the National Institute of Dental and Craniofacial Research (NIDCR). The program will fund P50 SPORE grants to support state-of-the-art investigator-initiated translational research that will contribute to improved prevention, early detection, diagnosis, and treatment of an organ-specific cancer or a highly related group of cancers. For the purpose of this NOFO, a group of highly related cancers are those that are derived from the same organ system, such as gastrointestinal, neuroendocrine, head and neck, and other cancers. Other programmatically appropriate groups of cancers may include those centered around a common biological mechanism critical for promoting tumorigenesis and/or cancer progression in organ sites that belong to different organ systems. For example, a SPORE may focus on cancers caused by the same infectious agent or cancers promoted and sustained by dysregulation of a common signaling pathway. In addition, a SPORE may focus on cross-cutting themes such as pediatric cancers or cancer health disparities. The research supported through this program must be translational and must stem from research on human biology using cellular, molecular, structural, biochemical, and/or genetic experimental approaches. SPORE projects must have the goal of reaching a translational human endpoint within the project period of the grant.</p>

## NIH Funding Opportunities

SPIN ID	Program Title	Sponsor Name	Sponsor Number	Deadline Date	Funding Amount
---------	---------------	--------------	----------------	---------------	----------------

announces NIH support for the professional development of early career scientists aiming to establish a career in DS-related research. By providing these scientists with training, resources, and mentorship, the NIH intends to support the career development of junior investigators in DS who will lead future research to improve the understanding of the biology of DS and support development of new treatments for health conditions experienced by those with DS.

 Deadline Dates (ALL) 07-May-2024

Synopsis The purpose of this Notice of Special Interest (NOSI) is to promote and support innovative methods in Big Data Science (BDS) to identify unappreciated biomedical, behavioral, social patterns and other social determinants that shed light on HIV acquisition, transmission, the development of comorbidities, and long-term viral control as in the HIV treatment continuum. BDS approaches can bring together data to evaluate the complex interplay between individual, contextual, and structural

---------	---------------	--------------	----------------	---------------	----------------

factors influencing the epidemiology of risk and care. Further, because this field can reveal unexpected associations through analysis of diverse data, BDS approaches may reveal events that are unseen or transient in traditional analysis of datasets. Discovery of these events will considerably advance research on HIV networks of transmission and the care continuum. This NOSI will support the establishment of BDS standards, bioinformatics data tools, machine-learning algorithms, mathematical modeling, advanced epidemiology and statistical analytic methods, and consideration and application of privacy and ethical issues in the use of public and personal data in the context of HIV research.

Deadline Dates (ALL)	07-May-2024 , 05-Jun-2024 , 07-Sep-2024
Synopsis	This initiative will support innovative, collaborative, and multi-disciplinary research designed to study the effective adaptation, integration, and implementation of recommended guidelines of care of persons with multiple chronic conditions (MCCs) from populations that experience health disparities. Projects would be expected to involve more than one component and/or more than one level of influence within existing or newly proposed health care models. The goal of this initiative is attainment of optimal treatment and health outcomes goals to advance health care towards health equity.

	Synopsis	<p>This Notice of Special Interest (NOSI) aims to accelerate a comprehensive understanding of the mechanisms of COVID-19-Associated Coagulopathy (CAC) which are provoked by vascular endothelial cell injury, hyperimmune responses, and hypercoagulability at genomic, molecular, and cellular levels. Knowledge obtained from such studies may be applied to the future design of early diagnostics and effective treatment for high-risk patients as well as enable CAC research findings to be applied to on-going COVID-19 clinical trials.</p>

	Synopsis	<p>The purpose of this funding opportunity announcement (FOA) is to invite applications for multisite clinical trials and observational studies developed in conjunction with NICHD Networks that will be conducted using NICHD-supported Network infrastructure. The goal of this FOA is to operationalize the previously reported NICHD guiding principles for multisite clinical trials delineated in Notice NOT-HD-19-034: To enhance the rigor and reproducibility of clinical trial protocols To promote greater availability of multisite clinical trial infrastructure to support trials from a wider range of investigators To facilitate data sharing and access to biospecimens to efficiently expand research capacity for all investigators To facilitate greater involvement of diverse populations in multisite clinical trials. Consequently, multisite clinical trials and observational studies conducted by and within the participating NICHD-supported Clinical Research Networks will be submitted as investigator-initiated, multi-Principal Investigator (PI) grant applications by any qualified investigator in the extramural community (including NICHD Network investigators) in conjunction with the respective NICHD Network Data Coordinating Center (DCC). It is the intent of this initiative to utilize the NICHD Clinical Research Network infrastructure in a manner that will promote the funding and support of the best science in a timely, transparent, equitable and cost-effective manner.</p>

	Synopsis	<p>The purpose of this Funding Opportunity Announcement is to support research that investigates the effectiveness of school-based health centers (SBHCs) as a health services care delivery model to address the needs of school-aged children from populations with health disparities (hence, underserved youth). The goals of this FOA are to support multidisciplinary research that investigates the effectiveness of SBHCs as a health services care delivery model to detect, manage, and prevent chronic illnesses that disproportionately burden underserved youth. The mechanisms of impact by which SBHCs improve the health of at-risk populations such as sexual and gender minority youth, immigrant youth, and youth who reside in rural areas are also a relevant focus for understanding effective models of SBHCs. Applications are expected to provide a conceptual model that describes hypothesized causal pathways by which SBHCs engage underserved youth to improve health outcomes and how SBHCs may complement (or reduce) the use of other services. Lessons learned through this initiative can help</p>

## NIH Funding Opportunities

SPIN ID	Program Title	Sponsor Name	Sponsor Number	Deadline Date	Funding Amount
	<p>Synopsis The NIH Research With Activities Related to Diversity (ReWARD) Program's overarching goal is to enhance the breadth and geographical location of research and research-related activities supported by NIH. The ReWARD program provides support for the health-related research of scientists who are making a significant contribution to Diversity, Equity, Inclusion, and Accessibility (DEIA) and who have no current NIH research project grant funding. The ReWARD program provides funding for both the scientific research and the DEIA activities of investigators. The grant will support scientific research in areas related to the programmatic interests of one or more of the participating NIH Institutes and Centers (ICs) and ongoing DEIA activities focused on enhancing diversity in the biomedical research enterprise within the United States and territories.</p>

Applicants not planning an independent clinical trial or basic experimental study with humans, or proposing to gain research experience in a clinical trial or basic experimental study with humans led by another investigator, must apply to the 'Independent Clinical Trial Not Allowed' companion FOA. The proposed project must be related to the programmatic interests of one or more of the participating NIH Institutes and Centers (ICs) based on their scientific missions. Special Note: Not all NIH Institutes and Centers participate in Parent Announcements. Applicants should carefully note which ICs participate in this announcement and view their respective areas of research interest and requirements at the Table of IC-Specific Information, Requirements and Staff Contacts website. ICs that do not participate in this announcement will not consider applications for funding. Consultation with NIH staff before submitting an application is strongly encouraged.</p>

Synopsis The purpose of the Mentored Quantitative Research Career Development Award (K25) is to attract to NIH-relevant research those investigators whose quantitative science and engineering research has thus far not been focused primarily on questions of health and disease. The K25 award will provide support and "protected time" for a period of supervised study and research for productive professionals with quantitative (e.g., mathematics, statistics, economics, computer science, imaging science, informatics, physics, chemistry) and engineering backgrounds to integrate their expertise with NIH-relevant research. This Funding Opportunity Announcement (FOA) is designed specifically for applicants proposing to serve as the lead investigator of an independent clinical trial, a clinical trial feasibility study, or a separate ancillary clinical trial, as part of their research and career development. Applicants not planning an independent clinical trial, or proposing to gain research experience in a clinical trial led by another investigator, must apply to companion FOA. Synopsis

The purpose of the NIH Mentored Research Scientist Development Award (K01) is to provide support and “protected time” (three to five years) for an intensive, supervised career development experience in the biomedical, behavioral, or clinical sciences leading to research independence. Although all of the participating NIH Institutes and Centers (ICs) use this support mechanism to support career development experiences that lead to research independence, some ICs use the K01 award for individuals who propose to train in a new field or for individuals who have had a hiatus in their research career because of illness or pressing family circumstances. This Parent Funding Opportunity Announcement is for basic science experimental studies involving humans, referred to in NOT-OD-18-212 as “prospective basic science studies involving human participants.” These studies fall within the NIH definition of a clinical trial and also meet the definition of basic research. Types of studies that should be submitted under this FOA include studies that prospectively assign human participants to conditions (i.e., experimentally manipulate independent variables) and that assess biomedical or behavioral outcomes in humans for the purpose of understanding the fundamental aspects of phenomena without specific application towards processes or products in mind. Applicants not planning an independent clinical trial or basic experimental study with humans, or proposing to gain research experience in a clinical trial or basic experimental study with humans led by another investigator, must apply to the 'Independent Clinical Trial Not Allowed' companion FOA. The proposed project must be related to the programmatic interests of one or more of the participating NIH Institutes and Centers (ICs) based on their scientific missions. Special Note: Not all NIH Institutes and Centers participate in Parent Announcements. Applicants should carefully note which ICs participate in this announcement and view their respective areas of research interest and requirements at the Table of IC-Specific Information, Requirements and Staff Contacts website. years-old and following them longitudinally to early adulthood. These data will be made available to the scientific community through the NIMH Data Archive. The purpose of this Funding Opportunity Announcement (FOA) is to encourage applications proposing the analysis of this public use dataset to increase knowledge of adolescent health and development. More information about the ABCD Study may be found on the ABCD Study web page ([www.abcdstudy.org](http://www.abcdstudy.org)). This FOA uses the R01 grant mechanism, whereas its companion FOA, PAR-22-138, seeks shorter, higher-risk R21 grant applications.

Synopsis	<p>This Funding Opportunity Announcement (FOA) supports projects relevant to the NIGMS mission or those of other NIH institutes or Centers (ICs) participating in the FOA that focus solely on the development of technologies with the potential to enable acquisition of biomedical knowledge. Projects should be justified in terms of technical innovation and utility of such technical innovation for impacting future biomedical research. Outcomes or products of the proposed project should significantly advance the current state of the art and be sufficiently characterized for application in addressing a broad range of biomedical research questions. These outcomes may include, but are not limited to: laboratory instruments and other devices, algorithms and software, chemical reagents and processes, biological molecules or systems that have been modified by human intervention to become research tools. The goal of this FOA is to support the development of technologies with demonstrated proof-of-concept that have remaining significant technical challenges to full implementation and broad utility. As such, applications should not propose to test specific biological questions. Applications proposing to test specific biological questions are not responsive to this FOA and will be administratively withdrawn without review. Applications with a focus on optimization, hardening, or obvious extrapolations of established technology will be a lower priority for funding.</p>

<p>Contact Name</p> <p>Contact Telephone</p> <p>Contact Email <a href="mailto:grantinfo@nih.gov">grantinfo@nih.gov</a></p> <p>Sponsor Website</p> <p>Program URL <a href="#">Link to program URL</a></p> <p>Deadline Dates (ALL) 07-May-2024</p> <p>Synopsis</p>	<p>The purpose of the Mentored Quantitative Research Career Development Award (K25) is to attract to NIH-relevant research those investigators whose quantitative science and engineering research has thus far not been focused primarily on questions of health and disease. The K25 award will provide support and "protected time" for a period of supervised study and research for productive professionals with quantitative (e.g., mathematics, statistics, economics, computer science, imaging science, informatics, physics, chemistry) and engineering backgrounds to integrate their expertise with NIH-relevant research. This Funding Opportunity Announcement (FOA) is designed specifically for applicants proposing research that does not involve leading an independent clinical trial, a clinical trial feasibility study, or an ancillary clinical trial. Applicants to this FOA are permitted to propose research experience in a clinical trial led by a mentor or co-mentor. Applicants proposing a clinical trial or an ancillary clinical trial as lead investigator, should apply to the companion FOA (PA-20-197). Special Note: Not all NIH Institutes and Centers participate in Parent Announcements. Applicants should carefully note which ICs participate in this announcement and view their respective areas of research interest and requirements at the Table of IC-Specific Information, Requirements and Staff Contacts website. ICs that do not participate in this announcement will not consider applications for funding. Consultation with NIH staff before submitting an application is strongly encouraged.</p>

SPIN ID	Program Title	Sponsor Name	Sponsor Number	Deadline Date	Funding Amount
---------	---------------	--------------	----------------	---------------	----------------

Synopsis | The NIH Research Project Grant supports a discrete, specified, circumscribed project in areas representing the specific interests and competencies of the investigator(s). This Parent Funding Opportunity Announcement is for basic science experimental studies involving humans, referred to in NOT-OD-18-212 as “prospective basic science studies involving human participants.” These studies fall within the NIH definition of a clinical trial and also meet the definition of basic research. Types of studies that should submit under this FOA include studies that prospectively assign human participants to conditions (i.e., experimentally manipulate independent variables) and that assess biomedical or behavioral outcomes in humans for the purpose of understanding the fundamental aspects of phenomena without specific application towards processes or products in mind. Studies conducted with specific applications toward processes or products in mind should submit under the appropriate ‘Clinical Trials Required’ or ‘Clinical Trial Optional’ FOA. The proposed project must be related to the programmatic interests of one or more of the participating NIH Institutes and Centers (ICs) based on their scientific missions. Note: Not all NIH Institutes and Centers (ICs) participate in Parent Announcements. Applicants should carefully note which ICs participate in this announcement and view their respective areas of research interest at the R01 IC-Specific Scientific Interests and Contact website. ICs that do not participate in this announcement will not consider applications for funding.

In addition to behavioral assessments, youth undergo neuroimaging and provide biospecimens, including oral fluids for hormone analysis, urine and hair for substance use and exposure, deciduous teeth for environmental exposures, and blood for genetic analysis and metabolic and hematologic assays. This initiative allows investigators to apply for access to biological samples from the ABCD Study<sup>®</sup>. More information about the ABCD Study can be found on the NIDA ABCD Study web page. Additional information about this resource is available on the NIDA funding opportunities page, under Supplemental Information for NOFOs. ABCD Study biospecimens are managed through the NIH Brain Development Cohorts (NBDC) Biorepository and Analysis Center, which offers a web portal with services related to biospecimen access. Visit the NBDC portal to query available samples using the Biospecimen Explorer, submit a Biospecimen Availability Inquiry to determine the resource availability and impact on existing samples, and learn more about this resource.</p>

## NIH Funding Opportunities

SPIN ID	Program Title	Sponsor Name	Sponsor Number	Deadline Date	Funding Amount
		<p>Funding Opportunity is for basic science experimental studies involving humans, referred to in NIH Grants Policy Statement Section 4.1.3.1 as prospective basic science studies involving human participants. These studies fall within the NIH definition of a clinical trial and also meet the definition of basic research. Types of studies that should submit under this NOFO include studies that prospectively assign human participants to conditions (i.e., experimentally manipulate independent variables) and that assess biomedical or behavioral outcomes in humans for the purpose of understanding the fundamental aspects of phenomena without specific application towards processes or products in mind. Studies conducted with specific applications toward processes or products in mind should submit under the appropriate Clinical Trials Required or Clinical Trial Optional NOFO.</p>

## NIH Funding Opportunities

SPIN ID	Program Title	Sponsor Name	Sponsor Number	Deadline Date	Funding Amount
	<p>Deadline Dates (ALL)   07-May-2024 , 05-Jun-2024 , 07-Sep-2024 , 05-Oct-2024</p> <p>Synopsis   The purpose of this Notice of Special Interest (NOSI) is to stimulate novel epidemiological research to address key knowledge gaps within and between subpopulations of Asian Americans, Native Hawaiians, and Pacific Islanders. These populations are frequently aggregated in research, potentially masking important social and health differences. Given clear heterogeneity in ancestry, culture, immigration patterns among Asian Americans, socioeconomic position, and acculturation into American life, a critical need exists for epidemiological research to enhance our understanding of the interplay of environmental exposures, lifestyle, behavioral, genomics, social, neighborhood, and biological factors that impact the health of Asian American, Native Hawaiian, and Pacific Islander subpopulations.</p>

## NIH Funding Opportunities

SPIN ID	Program Title	Sponsor Name	Sponsor Number	Deadline Date	Funding Amount
	<p>Deadline Dates (ALL) 07-May-2024</p> <p>Synopsis Postural Orthostatic Tachycardia Syndrome (POTS) can be a debilitating condition that affects routine activities such as working or attending school. POTS primarily affects women of child-bearing age, with most studies reporting 80-90% female predominance. The peak incidence is at age 14 years, but half of all individuals with POTS develop it in adulthood. While there are no precise data on the prevalence of POTS, it is estimated to affect 0.2-1% of the U.S. population. There is thus a compelling need to stimulate research to understand the causes of POTS in order to inform the development of treatments. Improving the diagnosis of POTS through the development of biomarkers or improved diagnostic tools represents another major need. Translational studies and mechanistic clinical trials to guide the development of better treatments are also important goals. This NOSI signals interest in this important area with the goal of stimulating research applications to address these critical needs.</p>				
107841	<a href="#">Risk and Protective Factors of Family Health and Family Level Interventions (R01 - Clinical Trial Optional)</a>	National Institutes of Health/DHHS	PAR-21-358	07-May-2024	Not Specified

The long-term goal of this program is to enhance diversity in the biomedical research workforce. The MOSAIC K99/R00 program is designed to facilitate a timely transition of promising postdoctoral researchers from diverse backgrounds (e.g., see Notice of NIH's Interest in Diversity) from their mentored, postdoctoral research positions to independent, tenure-track or equivalent research-intensive faculty positions. The MOSAIC K99/R00 program will provide independent NIH research support before and after this transition to help awardees launch successful, independent research careers. Additionally, MOSAIC K99/R00 scholars will be part of organized scientific cohorts and will be expected to participate in mentoring, networking, and professional development activities coordinated by MOSAIC Institutionally-Focused Research Education Award to Promote Diversity (UE5) grantees. This Funding Opportunity Announcement is for basic science experimental studies involving humans, referred to in NOT-OD-18-212 as “prospective basic science studies involving human participants.” These studies fall within the NIH definition of a clinical trial and also meet the definition of basic research. Types of studies that should be submitted under this FOA include studies that prospectively assign human participants to conditions (i.e., experimentally manipulate independent variables) and that assess biomedical or behavioral outcomes in humans for the purpose of understanding the fundamental aspects of</p>

	<p><b>Synopsis</b>   The Blueprint Neurotherapeutics Network for Biologics (BPN-Biologics) provides support for biologic-based therapeutic discovery and development, from lead optimization through phase I clinical testing. This Funding Opportunity Announcement (FOA) supports preclinical discovery and development of potential therapeutic Biotechnology Products and Biologics including, but not limited to, large biologic macromolecules, (e.g., proteins, antibodies, and peptides), gene-based therapies (i.e., oligonucleotide- and viral-based), cell therapies, and novel emerging therapies (e.g., microbial and microbiome therapies). Applicants will collaborate with NIH-funded consultants and can augment their project with NIH contract research organizations (CROs) that specialize in manufacturing, scaling, pharmacokinetics, toxicology, and Phase I clinical testing. BPN-Biologics awardee institutions retain their assignment of IP rights and gain assignment of IP rights from the BPN-Biologics contractors (and thereby control the patent prosecution and licensing negotiations) for biotherapeutic candidates developed in this program.</p>

This initiative is broadly supported by many participating NIH institutes, centers, and offices (ICOs). For this NOSI, interoception includes the processes by which an organism senses, interprets, integrates, and regulates signals originating from within itself and represents its internal states. This NOSI encourages basic and clinical research projects that 1) combine diverse expertise; 2) develop and use innovative technologies and approaches to delineate interoceptive mechanisms at the molecular, cellular, circuit, functional, and/or behavioral levels; 3) assess pathophysiological processes of interoception in the context of diseases and disorders; 4) determine the impact of interventions and therapies to manipulate interoceptive processes on health and/or disease; and 5) develop and validate predictive biomarkers, computational models, or artificial intelligence models relevant to interoception and its impact on health and disease.</p>

Deadline Dates (ALL)	07-May-2024
Synopsis	NIMH and participating institutes/centers (ICs) listed above are issuing this Notice of Special Interest (NOSI) to encourage secondary analyses of data from the Human Connectome Project (HCP) including the multiple datasets in the Lifespan Human Connectome projects and the Human Connectomes Related to Human Disease. Applicants beyond the groups that originally collected the data are encouraged to apply. The analyses will serve to generate and evaluate hypotheses about the complex interrelationships among: brain structure, function and connectivity; cognitive, affective, sensory and motor processes; environmental factors; life event, social and psychosocial factors; genomic data, and clinical symptoms during development, aging, or disease. Details about the “Lifespan” and “Disease” Connectomes, including neuroimaging protocols and clinical and behavioral assessments, can be found at the Connectome Coordinating Facility

Deadline Dates (ALL)	07-May-2024 , 12-Jun-2024 , 07-Sep-2024 , 12-Oct-2024 , 07-Jan-2025 , 12-Feb-2025 , 07-May-2025 , 12-Jun-2025 , 07-Sep-2025 , 12-Oct-2025 , 07-Jan-2026
Synopsis	The purpose of this Funding Opportunity Announcement (FOA) is to provide early-stage investigators with support and “protected time” (up to five years) for intensive, research-focused career development program activities under the guidance of an experienced mentorship team with expertise in both the preclinical application of nonhuman primate (NHP) models and in translation of the results from such studies to clinical application. The focus of this program is to increase the number of highly skilled scientists using NHP models to address complex translational biomedical research designed to foster translation of outcomes into the clinic. The expectation is that through this sustained period of research career development and training, awardees will launch independent research careers and become competitive for new research project grant (e.g., R01) funding. This Funding Opportunity Announcement (FOA) is designed specifically for applicants proposing research that does not involve leading an independent clinical trial, a clinical trial feasibility study, or an ancillary study to a clinical trial. Applicants to this FOA are permitted to propose research experience in a clinical trial led by a mentor or co-mentor.

## NIH Funding Opportunities

SPIN ID	Program Title	Sponsor Name	Sponsor Number	Deadline Date	Funding Amount
	Synopsis	<p>This NOFO invites applications at the intersection of HIV and aging by proposing research that aims to meet the following objectives: 1) Improve the understanding of biological, clinical, and socio-behavioral aspects of aging through the lens of HIV infection and its treatment; and 2) Improve approaches for testing, preventing, and treating HIV infection, and managing HIV-related comorbidities, co-infections, and complications in different populations and cultural settings by applying current aging science approaches. Proposed research must be consistent with the HIV/AIDS Research Priorities outlined by NIH's Office of AIDS Research (OAR) as described in NOT-OD-20-018.</p>

	<p>Synopsis</p>	<p>The NIH Exploratory/Developmental Grant supports exploratory and developmental research projects by providing support for the early and conceptual stages of these projects. These studies may involve considerable risk but may lead to a breakthrough in a particular area, or to the development of novel techniques, agents, methodologies, models, or applications that could have a major impact on a field of biomedical, behavioral, or clinical research. This Parent Funding Opportunity Announcement requires that at least 1 clinical trial be proposed. The proposed project must be related to the programmatic interests of one or more of the participating NIH Institutes and Centers (ICs) based on their scientific missions. Applicants should note that some ICs (see Related Notices) only accept applications proposing mechanistic studies that meet NIH's definition of a clinical trial through this funding opportunity announcement. The following Institutes/Centers only accept mechanistic studies that meet NIH's definition of a clinical trial. See Related Notices section below. National Institute of Arthritis and Musculoskeletal and Skin Diseases (NIAMS) National Institute of Mental Health (NIMH) Note: Not all NIH Institutes and Centers (ICs) participate in Parent Announcements. Applicants should carefully note which ICs participate in this announcement and view their respective areas of research interest at the R21 Basic Experimental Studies with Humans Required IC-Specific Scientific Interests and Contact website. ICs that do not participate in this announcement will not consider applications for funding.</p>

	Synopsis The NIH Exploratory/Developmental Grant supports exploratory and developmental research projects by providing support for the early and conceptual stages of these projects. These studies may involve considerable risk but may lead to a breakthrough in a particular area, or to the development of novel techniques, agents, methodologies, models, or applications that could have a major impact on a field of biomedical, behavioral, or clinical research. This Parent Funding Opportunity Announcement is for basic science experimental studies involving humans, referred to in NOT-OD-18-212 as “prospective basic science studies involving human participants.” These studies fall within the NIH definition of a clinical trial and also meet the definition of basic research. Types of studies that should submit under this FOA include studies that prospectively assign human participants to conditions (i.e., experimentally manipulate independent variables) and that assess biomedical or behavioral outcomes in humans for the purpose of understanding the fundamental aspects of phenomena without specific application towards processes or products in mind. Studies conducted with specific applications toward processes or products in mind should submit under the appropriate ‘Clinical Trials Required’ or ‘Clinical Trial Optional’ FOA. The proposed project must be related to the programmatic interests of one or more of the participating NIH Institutes and Centers (ICs) based on their scientific missions. Note: Not all NIH Institutes and Centers (ICs) participate in Parent Announcements. Applicants should carefully note which ICs participate in this announcement and view their respective areas of research interest at the R21 Basic Experimental Studies with Humans Required IC-Specific Scientific Interests and Contact website. ICs that do not participate in this announcement will not consider applications for funding.

Synopsis This Notice of Special Interest (NOSI) is being issued by the National Center for Complementary and Integrative Health (NCCIH) with participation from multiple NIH Institutes, Centers, and Offices (ICOs). This NOSI aims to promote mechanistic research of therapeutic benefits of minor cannabinoids and terpenes in the cannabis plant. Minor cannabinoids are defined as any and all cannabinoids from the cannabis plant other than Δ9-tetrahydrocannabinol (Δ9-THC). Cannabinoids of particular interest include the following: Δ8-THC, Cannabidiol (CBD), Cannabigerol (CBG), Cannabinol (CBN), Cannabichromene (CBC), cannabichromevarin (CBDV), tetrahydrocannabivarin (THCV), Tetrahydrocannabivarin acid (THCVA), tetrahydrocannabinolic acid (THCA), carmagerol, cannabicitran, sesquicannabigerol. Terpenes of particular interest include the following: Myrcene, β-caryophyllene, Limonene, α -terpineol, Linalool, α-phellandrene, α-pinene, β-pinene, β-terpinene, and α-humulene. This NOSI intends to support highly innovative basic and/or mechanistic studies in appropriate model organisms and/or human subjects aiming to investigate the impact of minor cannabinoids and terpenes on mechanisms underlying their therapeutic effects. Preclinical studies of combinations of minor cannabinoids with terpenes or other natural products that may enhance their therapeutic benefits and/or abate unwanted effects are encouraged. The mechanisms and processes underlying potential contribution of minor cannabinoids and terpenes to symptoms relief and functional restoration may be very broad encompassing different pathological conditions and diseases. This NOSI encourages interdisciplinary collaborations among experts from multiple fields, such as pharmacologists, chemists, physicists, physiologists, neuroscientists, psychologists, endocrinologists, immunologists, geneticists, behavioral scientists, clinicians, or others in relevant areas of inquiry.

Synopsis | The NIH has a strong interest in the diversity of the NIH-funded research enterprise (see NIH notice NOT-OD-20-031) and encourages institutions to diversify their scientific workforce by increasing the participation of individuals from groups identified as underrepresented in the biomedical, clinical, behavioral, and social sciences. Participating institutes continue to support these efforts through ongoing programs and supplement funding opportunities. This specific notice reiterates this interest and encourages eligible grant and cooperative agreement awardees in the HEAL Initiative community to apply for administrative supplements in response to PA-20-222 (or any subsequent reissuances), Research Supplements to Promote Diversity in Health-Related Research (Admin Supp - Clinical Trial Not Allowed). This notice is part of the NIH's Helping to End Addiction Long-term (HEAL) Initiative to speed scientific solutions to the national opioid public health crisis. The NIH HEAL Initiative is a trans-NIH effort to (1) improve prevention and treatment strategies for opioid misuse and addiction and (2) enhance pain management. More information about the HEAL Initiative is available at: <https://heal.nih.gov/>.

Synopsis	<p>The purpose of this Notice of Special Interest (NOSI) is to announce that the National Institute of Allergy and Infectious Diseases (NIAID), the National Institute of Arthritis and Musculoskeletal and Skin Diseases (NIAMS), the National Institute of Mental Health (NIMH), and the National Institute of Neurological Disorders and Stroke (NINDS), encourage applications to advance research activities relevant to the five strategic priorities identified in the recently released NIH Strategic Plan for Tickborne Disease Research: Improve fundamental knowledge of Tickborne Diseases (TBDs) to understand the host, vector, and pathogen factors that drive TBD pathogenesis and transmission. Elucidate the host immune mechanisms in response to and exploited by TBD pathogens. Advance research to improve the diagnosis of TBDs using both host- and pathogen-targeted approaches, including research for rapid diagnostics and multiplex platform approaches that detect multiple tickborne pathogens. Accelerate research to improve TBD prevention by supporting science to design, develop, and evaluate vaccines, vector control strategies, and other prevention approaches. Promote research to improve treatment for all forms of TBDs, including studies to develop effective therapies to treat symptoms that persist after TBD treatment, therapies for non-infectious TBDs, and new antimicrobials. Support tools and resources to advance research in understanding, preventing, diagnosing, and treating TBDs, including repositories, genomic resources, animal models, and preclinical services to aid the development and assessment of diagnostic, vaccine, and therapeutic candidates.</p>

	Deadline Dates (ALL)	08-Apr-2024 , 07-May-2024 , 05-Jun-2024 , 06-Jun-2024 , 12-Jun-2024 , 16-Jun-2024 , 20-Jun-2024 , 07-Sep-2024 , 05-Oct-2024 , 09-Oct-2024 , 12-Oct-2024 , 16-Oct-2024 , 07-Jan-2025 , 05-Feb-2025 , 12-Feb-2025 , 16-Feb-2025 , 07-May-2025 , 05-Jun-2025 , 12-Jun-2025 , 16-Jun-2025			
	Synopsis	This Notice calls for research on the health of sexual and gender minority populations. SGM populations include, but are not limited to, individuals who identify as lesbian, gay, bisexual, asexual, transgender, Two-Spirit, queer, and/or intersex. Individuals with same-sex or -gender attractions or behaviors and those with a difference in sex development are also included. These populations also encompass those who do not self-identify with one of these terms but whose sexual orientation, gender identity or expression, or reproductive development is characterized by non-binary constructs of sexual orientation, gender, and/or sex.

This Notice is to encourage intervention research focused on addressing exposure to violence - including but not limited to child maltreatment, intimate partner violence/teen dating violence, elder mistreatment, peer violence/bullying, and community violence – to improve individual-level health processes and outcomes.</p>				
112267	<a href="#">Notice of Special Interest (NOSI): Advancing Research on Early Pregnancy Loss</a>	National Institutes of Health/DHHS	NOT-HD-22-026	07-May-2024	Not Specified
	<p>Contact Name Clara Cheng, PhD</p> <p>Contact Telephone 301-435-6992</p> <p>Contact Email <a href="mailto:clara.cheng@nih.gov">clara.cheng@nih.gov</a></p> <p>Sponsor Website</p> <p>Program URL <a href="#">Link to program URL</a></p> <p>Deadline Dates (ALL) 07-May-2024 , 05-Jun-2024 , 16-Jun-2024 , 07-Sep-2024 , 05-Oct-2024 , 16-Oct-2024 , 07-Jan-2025 , 05-Feb-2025 , 16-Feb-2025 , 07-May-2025 , 05-Jun-2025 , 16-Jun-2025 , 07-Sep-2025</p> <p>Synopsis Early Pregnancy loss (EPL), defined as a pregnancy loss occurring up to 20 weeks gestation, is a very common pregnancy complication, occurring in 12-15% of clinically recognized pregnancies, with increased prevalence associated with increasing maternal age. The use of highly sensitive hCG assays allows the detection of pregnancy earlier in gestation than the time of clinical recognition, and gives an even higher estimated loss of 50-70% of conceptions prior to the second trimester. To achieve a successful pregnancy, a series of strict embryonic and maternal conditions must be met, that include high quality embryos, favorable conditions for embryo implantation, receptive maternal endometrium and optimal uterine environment to sustain the conceptus to term. In addition, maternal immune tolerance and hormonal factors play a critical role. While approximately half of all cases of EPL appear to be due to embryonic aneuploidy, very little is known about the physiologic and pathophysiologic processes that underlie non-aneuploid EPL. As a result, there is also a lack of understanding for the underlying causes of recurrent pregnancy loss (RPL). This NOSI seeks to address these critical knowledge gaps by encouraging basic, translational and clinical studies on biological processes that may uncover potential etiologies of EPL and RPL. This includes research to understand implantation mechanistically and identify a range of key factors, involved in implantation and placentation that are important for early pregnancy establishment, including abnormalities that contribute to sporadic</p>

The latter may include pilot studies of strategies or approaches to intervention, and/or other service system-based research to address areas such as economics, funding, service quality and engagement. In addition to the prevention of substance use, misuse and disorder, other outcomes of interest for the research supported through this NOFO include a reduction in negative sequelae of use, such as deaths related to impaired driving, suicidal behavior (e.g., nonfatal and fatal attempts), and substance-related acquisition or transmission of HIV infection and viral hepatitis among diverse populations and settings.</p>

		<p>services research relevant to the COVID-19 pandemic. NIMH is especially interested in research to provide an evidence base to understand how mental illness contributes to COVID-19 risk and mortality, how incident mental illness develops with COVID-19, and the development of scalable interventions to meet the public mental health needs during and resulting from the pandemic both specifically related to the virus but also at a broader population level that is impacted by stress, disruptions, and loss of lives in the pandemic. Research addressing the intersection of COVID-19, mental health, and HIV treatment and prevention are also of interest to NIMH. Research is anticipated to focus on particularly vulnerable populations based on existing evidence of increased mental health symptoms and illness and preexisting and worsening health disparities.</p>

	<p>Contact Name   Yin Liu, Ph.D.            Contact Telephone   240-276-6251            Contact Email   <a href="mailto:liuy@mail.nih.gov">liuy@mail.nih.gov</a>            Sponsor Website              Program URL   <a href="#">Link to program URL</a>            Deadline Dates (ALL)   07-May-2024 , 05-Jun-2024 , 12-Jun-2024 , 16-Jun-2024            Synopsis   The overall goal of this Notice of Special Interest (NOSI) is to promote mechanistic research aimed at better understanding the pathophysiology of immune-related adverse events (irAEs). It is anticipated that the mechanistic research supported through this NOSI will build the foundational knowledge which will ultimately lead to better strategies to predict, prevent and/or ameliorate toxicities that can arise as a consequence of current immunotherapeutic regimens, and improve treatment outcomes. The proposed research can be basic or translational but should be focused on revealing the mechanisms underlying irAEs. Single investigators and/or multidisciplinary teams with relevant expertise in the research area proposed and/or patient characterization and selection are encouraged to apply.</p>

	Synopsis	The National Institutes of Health seeks research conducted in real-world settings, where a wide range of clinical presentations, psychosocial factors, age-related (e.g., youth; adult; older adult), geographic (rural/remote settings), cultural considerations, and health disparities influence the types of care that are provided. Examples of NIMH and NIDA studies that are encouraged through this Notice address the continuum of crisis service systems. Applications that include crisis services for children and under-resourced populations are encouraged. Topics of research interest span the crisis care continuum, including the effectiveness of these components: call center capabilities to address distress and coordinate care, deployed mobile crisis outreach and support, and crisis services that can diagnose and provide short term stabilization.

Synopsis

Though epidemiologic research has helped identify drowning risk factors, little is known about what intervention strategies have the greatest efficacy to prevent drowning and/or improve outcomes after a drowning event. Thus, the goal of this NOSI is to encourage and facilitate scientific discovery for drowning prevention, specifically aimed at reducing drowning risk and improving outcomes in three primary domains. Domain 1: Understanding drowning disparities and developing drowning interventions to address these disparities. Rates of drowning vary significantly. Reasons contributing to drowning risks among certain populations are multifaceted and likely related to access and exposure to water, knowledge and skills around water, and behaviors and beliefs. Research evaluating both structural and/or systemic forces which contribute to disparities in drowning risk among children, parents and communities is needed. Development of effective interventions aimed at addressing these factors as they pertain to drowning prevention is critical. Domain 2: Studying the effects of swim instruction on swim skills to prevent drowning. Swim skills, which are often obtained through swim instruction, can decrease drowning risk; however tremendous variability among types and techniques of swim instruction exists. Validated measures which consistently assess swim skill efficacy to prevent drowning at differing ages and developmental abilities are lacking. Metrics which help to identify effective, quality swim instruction to prevent drowning are needed. The development of evidence-based best practices as to when and how to instruct populations most at risk for drowning (such as children of young age, of certain races/ethnicities, with intellectual or developmental disabilities, or those with linguistic or cultural differences), is essential. Domain 3: The adoption, integration and sustainable scale-up of the drowning chain of survival. The five steps of drowning chain of survival can reduce drowning mortality. These steps include: (1) preventing drowning, (2) recognizing distress, (3) providing flotation, (4) removal from water and (5) providing care as needed. Depending on the water source,

	Synopsis	The purpose of this Notice of Special Interest (NOSI) is to encourage advance research that addresses outstanding questions related to the developmentally and culturally appropriate characterization and assessment of STB in children/preteens. For purposes of this NOSI, children/preteens are defined as youth 12 years old and younger. NIMH encourages applications that consider issues relevant to the assessment of diverse youth, including the acceptability and cultural relevance of the strategies for assessment among youth from minoritized backgrounds and/or sexual and gender minority youth.

## NIH Funding Opportunities

SPIN ID	Program Title	Sponsor Name	Sponsor Number	Deadline Date	Funding Amount
	Synopsis	<p>This Funding Opportunity Announcement (FOA) encourages research grant applications directed toward developing next-generation human cell-derived microphysiological systems (MPS) and related assays that replicate complex nervous system architectures and physiology with improved fidelity over current capabilities. Supported projects will be expected to enable future studies of complex nervous system development, function and aging in healthy and disease states. The R21 grant mechanism is intended to encourage exploratory/developmental research by providing support for the early and conceptual stages of project development. High risk/high reward projects that lack preliminary data may be most appropriate for this FOA. Applicants with preliminary data may instead wish to apply to the companion R01 mechanism (PAR-23-046).</p>			
114250	<a href="#">Trailblazer Award for New and Early Stage Investigators (R21 Clinical Trial Optional)</a>	National Institutes of Health/DHHS	PAR-24-022	16-Mar-2024	400,000 USD

	Program URL	<a href="#">Link to program URL</a>			
	Deadline Dates (ALL)	16-Mar-2024 , 07-May-2024 , 16-Jun-2024 , 16-Jul-2024 , 07-Sep-2024 , 16-Oct-2024 , 16-Nov-2024 , 07-Jan-2025 , 16-Feb-2025 , 16-Mar-2025 , 07-May-2025 , 16-Jun-2025 , 16-Jul-2025 , 07-Sep-2025 , 16-Oct-2025 , 16-Nov-2025 , 07-Jan-2026			
	Synopsis	<p>This Trailblazer Award is an opportunity for NIH-defined New and Early Stage Investigators (<a href="https://grants.nih.gov/policy/early-investigators/index.htm">https://grants.nih.gov/policy/early-investigators/index.htm</a>) to pursue research programs of high interest to the NIBIB that integrate engineering and the physical sciences with the life and/or biomedical sciences. A Trailblazer project may be exploratory, developmental, proof of concept, or high risk-high impact, and may be technology design-directed, discovery-driven, or hypothesis-driven. Importantly, applicants must propose research approaches for which there are minimal or no preliminary data. A distinct feature for this FOA is that no preliminary data are required, expected, or encouraged. However, if available, minimal preliminary data are allowed. Preliminary data are defined as material which the applicant has independently produced and not yet published in a peer-reviewed journal. All preliminary data should be clearly marked and limited to one-half page, which may include one figure. Applications including data more than one-half page or more than one figure will be considered noncompliant with the FOA instructions and will not go forward to review.</p>

	Deadline Dates (ALL)	07-May-2024 , 05-Jun-2024 , 16-Jun-2024 , 07-Sep-2024			
	Synopsis	The purpose of this Notice is to inform potential applicants of the National Institute on Drug Abuse (NIDA) special interest in grant applications to conduct rigorous basic, translational and/or clinical research to: (1) advance identification of sex and/or gender differences in risk for substance use disorders or the response or medical consequences of alcohol or substance misuse to uncover the mechanisms of those differences, and to conduct translational research on those differences, and (2) advance research specific to women or highly relevant to women. Both preclinical and clinical studies are sought across all areas of drug and alcohol research.			
103983	<a href="#">Notice of Special Interest (NOSI): Public Policy Effects on Alcohol-, Cannabis-, Tobacco-, and Other Drug-Related Behaviors and Outcomes</a>	National Institutes of Health/DHHS	NOT-AA-21-028	07-May-2024	Not Specified

	<p>its effects on behaviors and outcomes pertaining to alcohol and other drugs. This Notice is intended to support innovative research to examine policy effects that have the potential to lead to meaningful changes in public health. Research projects that may be supported include, but are not necessarily limited to: causal analyses of the effects of one or multiple public policies; evaluations of the effectiveness of specific public policies as tools for improving public health through their effects on alcohol-, cannabis-, tobacco-, and other substance-related behaviors and outcomes; studies of disparities in policy effects and the role of policy in exacerbating or potentially reducing health disparities; and research to advance methods and measurement used in studying relationships between public policies and alcohol-, cannabis-, tobacco-, and other substance-related behaviors and outcomes.</p>				
104076	<a href="#">Pilot Health Services and Economic Research on the Treatment of Drug, Alcohol, and Tobacco Use Disorders (R34 - Clinical Trial Optional)</a>	National Institutes of Health/DHHS	PA-21-180	07-May-2024	450,000 USD
	<p>Contact Name: Keisher Highsmith, DrPH</p> <p>Contact Telephone:</p> <p>Contact Email: <a href="mailto:duffys@nida.nih.gov">duffys@nida.nih.gov</a></p> <p>Sponsor Website:</p> <p>Program URL: <a href="#">Link to program URL</a></p> <p>Deadline Dates (ALL): 07-May-2024</p> <p>Synopsis: This Funding Opportunity Announcement (FOA) encourages pilot and preliminary research in preparation for larger-scale services research effectiveness trials. Relevant trials may test a wide range of approaches, including interventions, practices, and policies designed to optimize access to, and the quality, effectiveness, affordability and utilization of drug, tobacco, or alcohol use disorder treatments and related services, as well as services for comorbid medical and mental disorder conditions. Relevant approaches may include both those that are novel, and those that are commonly used in practice but lack an evidence base. This FOA provides resources for assessing the feasibility, acceptability, and utility of these approaches, in addition to usual trial preparation activities.</p>

## NIH Funding Opportunities

SPIN ID	Program Title	Sponsor Name	Sponsor Number	Deadline Date	Funding Amount
	<p>Program URL <a href="#">Link to program URL</a></p> <p>Deadline Dates (ALL) 07-May-2024 , 16-Jun-2024 , 07-Sep-2024 , 16-Oct-2024 , 07-Jan-2025</p> <p>Synopsis The Joint NINDS/NIMH Exploratory Neuroscience Research Grant program supports exploratory and innovative research projects, which fall within the missions of the NINDS and NIMH. Awards will provide support for the early and conceptual stages of projects. These studies often assess the feasibility of a novel avenue of investigation and involve considerable risk, but have the potential to bring about breakthroughs in the understanding of important areas of neuroscience, or to the development of novel techniques, agents, methodologies, or models, of high value to the neuroscience community. While this funding opportunity also accepts clinical trials, only applications proposing “mechanistic clinical trials or studies” (studying pathophysiology or mechanism of action of an intervention, but not safety or efficacy) or basic experimental studies with humans (BESH) will be supported. For information on NIH clinical trial definitions and the types of clinical trials that are within scope of this funding opportunity announcement refer to the NIH Definition of a Clinical Trial page and the Funding Opportunity Description, below, respectively.</p>

SPIN ID	Program Title	Sponsor Name	Sponsor Number	Deadline Date	Funding Amount
	<p>Deadline Dates (ALL) 07-May-2024 , 05-Jun-2024 , 16-Jun-2024 , 07-Sep-2024</p> <p>Synopsis NIH Institutes, Centers, and Offices participating in the Social, Behavioral, and Economic Impacts of COVID-19 in Vulnerable and Health Disparity Populations initiative are issuing this Notice of Special Interest (NOSI) to highlight interest in research to strengthen the understanding and response to the Coronavirus Disease 2019 (COVID-19) pandemic and help us prepare more effectively for future public health emergencies. While research related to the direct clinical effects of COVID-19 are supported by other funding opportunities, there are additional urgent public health needs, particularly in populations who experience health disparities and in vulnerable populations. The purpose of this Notice is to 1) emphasize the roles and impacts of interventions, particularly those under the umbrella of digital health, as well as community-engaged and multi-level interventions in healthcare settings to address access, reach, delivery, engagement, effectiveness, scalability, and sustainability of services that are utilized during and following the pandemic, and 2) encourage the leveraging of existing large-scale data sources with broad population coverage to improve prediction of various mitigation efforts (including vaccinations, masking, and physical distancing to inform the public health response) on transmission reduction and on social and economic impacts, and assess the downstream health and healthcare access effects, with an emphasis on underserved and vulnerable populations. Additionally, the use of large-scale data sources to study the indirect health impacts of the pandemic and subsequent social and economic changes is needed to understand the costs and benefits of various COVID-19 mitigation strategies.</p>				
106119	<a href="#">Small Grants for New Investigators to Promote Diversity in Health-Related Research (R21 Clinical Trial Optional)</a>	National Institutes of Health/DHHS	PAR-21-313	07-May-2024	375,000 USD

	Synopsis	The National Institute on Drug Abuse (NIDA) recognizes that stigma is pervasive in clinic, social service and other settings related to HIV prevention and care. Stigma contributes to a lack of attention to drug use screening, inadequate outreach to people who use drugs (PWUD) and insufficient uptake of services to prevent, treat, or mitigate HIV infection (and related consequences of drug use) among PWUD. Stigmas of interest include: internalized stigma among drug users, stigma associated with providing services to PWUD, and stigma toward PWUD by providers or service settings. Policies and practices that create or augment stigma also are of interest here, as well as stigma experienced by providers who might otherwise

		broaden their services to PWUD. Stigma reduction interventions for HIV service settings have been developed and, in some cases, implemented on a wide scale, but generally target sexual transmission as the primary behavioral risk; however, knowledge from this work can inform stigma among PWUD. Large literatures on stigma also exist in a variety of other conditions (e.g., cancer, mental illness) which also can provide conceptual and programmatic bases to speed the development of new interventions addressing PWUD.

## NIH Funding Opportunities

SPIN ID	Program Title	Sponsor Name	Sponsor Number	Deadline Date	Funding Amount
	Deadline Dates (ALL)	07-May-2024 , 05-Jun-2024 , 16-Jun-2024 , 07-Sep-2024 , 05-Oct-2024 , 16-Oct-2024 , 07-Jan-2025 , 05-Feb-2025 , 16-Feb-2025 , 07-May-2025			
	Synopsis	The National Institute of Mental Health (NIMH), National Institute on Drug Abuse (NIDA), and Office of Research on Women's Health (ORWH) are issuing this Notice of Special Interest (NOSI) to outline priorities for research in crisis response services. Research is sought that is conducted in real-world settings, where a wide range of clinical presentations, psychosocial factors, age-related (e.g., youth; adult; older adult), geographic (rural/remote settings), cultural considerations, and health disparities influence the types of care that are provided. Studies are encouraged that address the continuum of crisis service systems, as well as applications that address crisis services for children and under-resourced populations.

	Deadline Dates (ALL)	18-Mar-2024 , 07-May-2024 , 05-Jun-2024 , 07-Sep-2024 , 05-Oct-2024 , 07-Jan-2025 , 05-Feb-2025 , 07-May-2025 , 05-Jun-2025 , 07-Sep-2025 , 05-Oct-2025 , 07-Jan-2026 , 05-Feb-2026 , 07-May-2026 , 05-Jun-2026 , 07-Sep-2026 , 05-Oct-2026 , 07-Jan-2027			
	Synopsis	The purpose of this Notice of Funding Opportunity (NOFO) is to support innovative observational and intervention-based research to identify and characterize the pathways and mechanisms through which health and health care disparities occur among sexual and gender minority populations of minoritized racial/ethnic and socio-economic statuses. Per Notice Number: NOT-MH-24-170: Research Priorities The National Institute of Mental Health (NIMH) will only accept nonclinical trials applications that reflect the mission and scientific priorities as identified in the strategic plan NIMH » The National Institute of Mental Health Strategic Plan (nih.gov) and also NIMH's Approach to Mental Health Disparities Research. Clinical trial applications will not be accepted under this notice. Per NOT-MH-20-067, NIMH expects that grant applications involving human research participants will collect a minimum set of Common Data Elements.

This NOSI encourages applications which focus on dissemination and implementation research to deliver interventions in the school setting that will promote healthy MEB development and/or prevent MEB disorders. Applications should include a focus on one of the following: (1) primary/universal prevention MEB programs designed to promote healthy MEB development by decreasing risk factors and increasing protective factors to prevent onset of an MEB disorder; or (2) secondary/selective prevention programs designed to support screening and early identification of MEB disorders to slow progression with early intervention. Applications focused on tertiary/indicated treatment of MEB disorders will be considered non-responsive to this Notice.</p>

address key issues not currently covered by available COVID-related funding announcements among these populations. It is hoped that the use of administrative supplements will foster research in these key areas in the most timely manner. Research projects addressing issues that are the focus of currently available or future COVID funding opportunity announcements will be encouraged to submit to those announcements. Also, applicants responding to this NOSI are strongly encouraged to describe plans for the rapid sharing of data and results as well as innovative data analytics approaches. The sharing of COVID-related data and resources and the effective communication of results are a high priority of the NIH.

Synopsis	This Funding Opportunity Announcement (FOA) supports exploratory research leading to the development of innovative technologies for biomedical research that is relevant to the NIGMS mission or that of other NIH Institutes or Centers (ICs)

## NIH Funding Opportunities

SPIN ID	Program Title	Sponsor Name	Sponsor Number	Deadline Date	Funding Amount
---------	---------------	--------------	----------------	---------------	----------------

participating in this FOA. Projects should entail a high degree of risk and/or novelty, which will be offset by a high future potential impact in biomedical research. Outcomes or products of the proposed project, which should significantly advance the current state of the art, may include, but are not limited to: laboratory instruments and other devices, algorithms and software, chemical reagents and processes, biological molecules or systems that have been modified by human intervention to become research tools. The goal of this FOA is to support proof of concept, high-risk and potentially high-reward studies for feasibility and exploratory technology development. Due to the constraints that would be imposed on broad utility, this FOA does not support technology development that is narrowly focused on addressing specific biological questions. Rather, applications should propose development of innovative tools that can potentially benefit a broad spectrum of biomedical research. Moreover, feasibility of the proposed technology must not have already been established in the literature or with preliminary data. Applications that are focused on technology development to address specific biological questions and/or include unpublished or published data that provide proof of concept are not responsive to this FOA and will be administratively withdrawn without review.

	<p>Contact Telephone   301-827-4901</p> <p>Contact Email   <a href="mailto:juanita.chinn@nih.gov">juanita.chinn@nih.gov</a></p> <p>Sponsor Website  </p> <p>Program URL   <a href="#">Link to program URL</a></p> <p>Deadline Dates (ALL)   07-May-2024 , 05-Jun-2024 , 12-Jun-2024 , 16-Jun-2024 , 25-Jun-2024 , 07-Sep-2024</p> <p>Synopsis   The Eunice Kennedy Shriver National Institute of Child Health and Human Development (NICHD) is issuing this Notice of Special Interest (NOSI) to invite applications to: Identify mechanisms, causes, correlates, and modifiable risk factors underlying recent trends in mortality during adolescence and young adulthood. Trends to be examined include the growing inequalities in overall mortality and by cause of death and manner of death (natural, unintentional and intentional injuries, including suicide and homicide, and undetermined), with attention to race, ethnicity, sex, gender, age, disability status, as well as family structure and living arrangements, income, education, and geographic location. Examine trends in mortality among individuals with intellectual and physical disabilities with a particular interest in studies that identify mechanisms, explanations, and modifiable risk factors. Improve the accuracy and granularity of cause of death coding, especially for individuals with intellectual and physical disabilities, and to improve the accuracy of manner of death coding, particularly across unintentional and intentional injuries, including suicide and homicide, for adolescents and young adults as well as for individuals with intellectual and physical disabilities. Improve research on mortality among youth populations of all sexual orientations and gender identities –especially for suicide and homicide, and other intentional and unintentional injuries. Examine the impact of rising mortality among adolescents, adolescents transitioning to adulthood and young adults on the health and development of the population, including demographic factors such as fertility and nuptiality, on the health and development of decedents' offspring and other family members, and on the health, development, and well-being of populations of interest to the NICHD is of high program priority. The NICHD populations of interest that are the focus of this Notice are adolescents, young adults, and individuals with intellectual, developmental, or physical disabilities. For information on the NICHD Strategic Plan 2020 (<a href="https://www.nichd.nih.gov/about/org/strategicplan">https://www.nichd.nih.gov/about/org/strategicplan</a>)</p>

## NIH Funding Opportunities

SPIN ID	Program Title	Sponsor Name	Sponsor Number	Deadline Date	Funding Amount
---------	---------------	--------------	----------------	---------------	----------------

	Synopsis	<p>The NIH Research Education Program (R25) supports research education activities in the mission areas of the NIH. The overarching goal of this IC Name R25 program is to support educational activities that complement and/or enhance the training of a workforce to meet the nation’s biomedical, behavioral and clinical research needs. To accomplish the stated over-arching goal, this FOA will support creative educational activities with a primary focus on: Courses for Skills Development. This R25 program will support the development and implementation of short courses to prepare nurse scientists, and scientists in aligned fields, to conduct firearm injury prevention research in support of the NINR Strategic Plan (<a href="https://www.ninr.nih.gov/aboutninr/ninr-mission-and-strategic-plan">https://www.ninr.nih.gov/aboutninr/ninr-mission-and-strategic-plan</a>). Applications for courses that build on the existing knowledge, approaches, methods, and techniques related to injury prevention to advance research specifically in the area of firearm injury are encouraged. Proposed courses should include content related to inequities in firearm injuries (e.g., race, ethnicity, socioeconomic position, gender, geography, and their intersections) and research at the individual, community, institutional, and structural levels. This NOFO requires a Plan for Enhancing Diverse Perspectives (PEDP), which will be assessed as part of the scientific and technical peer review evaluation. Applications that fail to include a PEDP will be considered incomplete and will be withdrawn.</p>

	Synopsis	<p>To achieve more potent strategies to promote sustained health-related behavior change, there is a need for intentional and methodical translation of foundational behavioral and social science discoveries into new or improved interventions. The Office of Behavioral and Social Sciences Research (OBSSR) and participating ICOs are issuing this Notice to highlight interest in the systematic development of original health-related behavioral interventions that test hypotheses that draw on basic behavioral and social sciences research (bBSSR) findings that posit causal or processual mechanisms of action of healthier behavior change. This includes research that focuses on use-inspired bBSSR, understanding of mechanisms of action underlying initial and sustained behavior change, and systematic development and testing of health-related behavioral interventions and their components.</p>

The MMRRC consortium is expected to facilitate research by identifying, acquiring, evaluating, characterizing, cryopreserving, and distributing mutant mouse strains to qualified biomedical investigators. A regional network of four MMRRCs and an Informatics, Coordination and Service Center (ICSC) collectively serve the needs of the biomedical research community for transgenic, knockout and other genetically-engineered mutant mice and related biomaterials. MMRRC strains are held to the highest standards to optimize reproducibility of studies and assure scientific rigor and transparency; all submitted strains are thoroughly reviewed and documented and include additional quality control measures. The Program Director/Principal Investigator (PD/PI) of each MMRRC in addition to the major resource activities is required to develop a small high risk, high return, research pilot project that complements the goals and needs of the MMRRC consortium.</p>

## NIH Funding Opportunities

SPIN ID	Program Title	Sponsor Name	Sponsor Number	Deadline Date	Funding Amount
	Synopsis	<p>The purpose of this Notice of Funding Opportunity (NOFO) is to provide continuing support for specific pathogen-free (SPF) macaque colonies previously funded under the auspices of PAR-21-089 and PAR-18-669 that support Human Immunodeficiency Virus (HIV)/Acquired Immunodeficiency Syndrome (AIDS) research. Breeding colonies are essential to sustain appropriate SPF macaques for research related to HIV/AIDS. Pedigree SPF macaques are free of certain viruses, which may confound the results of HIV/AIDS-related investigations or present a risk to the personnel who care for the animals. The SPF macaques are genetically characterized for major histocompatibility complex (MHC) class I types, because MHC class I genotypes have large effects on macaque immune responses to Simian Immunodeficiency Virus (SIV) that can induce AIDS in nonhuman primates (NHPs) and on human immune responses to HIV.</p>

	Synopsis	<p>This funding opportunity announcement (FOA) encourages grant applications that support the activities of the National Primate Research Centers (NPRCs). Nonhuman primates (NHPs) are most closely related to humans, both physiologically and genetically. Therefore, NHPs are critical animal models for basic and translational research aimed at understanding human biology, both in normal and diseased states. Proper husbandry and management of NHPs require specialized physical and intellectual resources, which are most effectively and economically provided in centralized primate centers, the resources of which are made available to investigators on a national basis. The NPRCs provide these resources to investigators/grantees who utilize NHPs in biomedical research and thereby complement and help enable the missions of the NIH Institutes and Centers.</p>

These Centers provide support for special colonies of laboratory animals, as well as other resources such as informatics tools, reagents, cultures (cells, tissues, and organs) and genetic stocks that serve the biomedical research community in a variety of research areas on a local, regional, and national basis. The goal of projects supported by this FOA is to provide research resources that facilitate optimization and enhancement of scientific rigor, transparency, and experimental reproducibility of biomedical research. Proposed Animal and Biological Material Resource Centers must have broad application to multiple NIH Institutes or Centers (ICs) to align with the ORIP's NIH-wide mission (<a href="https://orip.nih.gov/about-orip">https://orip.nih.gov/about-orip</a>). This funding opportunity is designed to support both continuation of existing resources and to develop new ones when appropriate. Prior to preparing an application, all applicants are strongly encouraged to consult with Scientific/Research staff to be advised on appropriateness of the intended resource plans for this program, competitiveness of a potential application, and ORIP's program priorities.</p>

001 to submit a revision application to add a Curation and Informatics component to existing Animal and Biological Material Resource Centers (P40) as a Curation and Informatics component is a requirement in RFA-OD-23-001. The supplement will provide support to currently funded Centers for a Curation and Informatics component to develop and maintain in-house data management systems, curate stocks of animals and biomaterials, and maintain a searchable web portal with an integrated community-friendly request/ordering system and outreach presentations.

Synopsis | The Office of Research Infrastructure Programs (ORIP) encourages resource-related research grant applications aimed at developing broadly applicable technologies, tools, and resources for validating animal models and enhancing rigor, reproducibility, and translatability of animal research. Proposed studies, models, resources, or technologies submitted under this Funding Opportunity Announcement (FOA) must either address research interests of multiple NIH Institutes and Centers (ICs), explore multiple organ systems, or be applicable to diseases and processes that impact multiple organ systems in order to align with ORIP's NIH-wide mission and programs. Applications should aim to enhance the rigor, reproducibility, and translatability of animal research through the development of technologies, tools, and resources that have significant impact across a broad range of research areas using animal models. Applications must demonstrate how the proposed resources and technologies impact rigor and reproducibility of animal studies. Applications for developing a limited quantity of resources are not suitable for this FOA.

Synopsis	With this Notice of Special Interest (NOSI), ORIP intends to support exploratory/developmental and highly innovative projects aimed at developing broadly applicable technologies, tools, and resources for validating animal models and enhancing the rigor, reproducibility, and translatability of animal research. This NOSI is for two-year projects that address key animal resource- and technology-related gaps identified in the “Validation of Animal Models and Tools for Biomedical Research” workshop organized by ORIP, NHLBI, NIA, NIDDK, NIGMS, and NINDS. Animal models of interest for this NOSI include, but are not limited to, invertebrate and vertebrate organisms ranging from C. elegans and Drosophila to zebrafish, mouse, rat, pig, and nonhuman primates.

They support individuals proposing plans for graduate education that take individual experiences, interests and competencies into consideration. A CSGrad4US Fellowship applicant’s plan describes the academic and industrial achievements, attributes, and experiences that illustrate their demonstrated potential for significant research achievements. A CSGrad4US Fellowship applicant must provide a profile of their relevant education and experience and a reference letter that demonstrates this potential. CSGrad4US Fellowship applicants are advised that, to eventually receive a fellowship, they must pursue graduate study in a doctoral degree-granting program in a CISE discipline at an accredited, non-profit institution of higher education having a campus located in the United States, its territories or possessions, or the Commonwealth of Puerto Rico.</p>

	Synopsis	<p>The Civic Innovation Challenge (CIVIC) is a research and action competition that accelerates the transition to practice of foundational research and emerging technologies into communities through civic-engaged research. By addressing priorities at the local scale that are relevant across the US, CIVIC is laying the foundation for a broader and more fluid exchange of research and technology capabilities and civic priorities through joint partnerships involving civic partners and the research community. CIVIC funds projects that pilot state-of-the-art solutions to community challenges over 12 months, following a six-month planning phase, and have the potential for lasting impact in the partnering community as well as the potential to be scaled and implemented in other communities. Additionally, the foundation for CIVIC projects should be rooted in maturing and transitioning state-of-the-art research in disciplines, including but not limited to computer science, engineering, geosciences, biological sciences, and social sciences.</p>

	Synopsis	<p>The National Science Foundation's Directorates for Engineering (ENG), Computer and Information Science and Engineering (CISE), Mathematical &amp; Physical Sciences (MPS), and Social, Behavioral and Economic Sciences (SBE) are coordinating efforts to create fundamental understanding that will enable continued effective use of an essential common resource, the electromagnetic spectrum. Existing approaches to spectrum management and regulation have struggled with the ever-increasing demands for spectrum created by continual emergence of new scientific, military, and commercial applications, powered by steady advances in wireless technologies. Development of fundamentally new models and paradigms of spectrum access and management, along with enabling technologies, is needed before it becomes too costly to accommodate new innovations and essential services, or too late to sustain the digital transformation and growth of key industries and public services. This program seeks to develop the intellectual capital enabling the U.S. to smoothly and quickly transition to effective new ways of using and managing the radio and optical spectrum after the end of the current spectrum era of long-term exclusive-use license auctions, thereby sustaining and advancing the social, economic, scientific, and U.S. national leadership benefits derived from the electromagnetic spectrum.</p>

Synopsis	The astrophysics community has available a diverse and powerful network of ground- and space-based instruments and facilities to enable observers to identify the electromagnetic signatures of Multi-Messenger Astrophysics (MMA) events, and then monitor and characterize their evolution. There also exists a rich set of software packages to track, schedule and support these observations. The community has identified the need to better harmonize these resources and interconnect users. The Multi-Messenger Coordination for Windows on the Universe (MMC-WoU) program will support the development of pathways or networks to increase the coordination and optimization of follow-up observations for MMA campaigns.

SPIN ID	Program Title	Sponsor Name	Sponsor Number	Deadline Date	Funding Amount
	<p>Sponsor Website <a href="#">Link to sponsor website</a></p> <p>Program URL <a href="#">Link to program URL</a></p> <p>Deadline Dates (ALL) 15-Apr-2024 , 14-May-2024</p> <p>Synopsis                      The primary goal of the Citizen Science for Earth Systems Program (CSESP) is to develop and implement capabilities to augment and enhance NASA scientific data and capacity through voluntary observations, interpretations, or other direct participation by members of the general public to advance understanding of the Earth as a system. The program complements NASA's capability of observing Earth globally from space, air, land, and water by engaging the public in NASA's strategic goals in Earth Science (see <a href="https://science.nasa.gov/about-us/science-strategy">https://science.nasa.gov/about-us/science-strategy</a>). The program aims to advance the use of citizen science in scientific research about Earth by directly supporting citizen science activities, as well as by deploying technology to further citizen science research. This program element is a follow on to the 2016 CSESP ROSES Program element for which the funded projects are described on the Citizen Science for Earth Systems Program page. While much of the focus of the original program element has remained, the new program element also includes an option to propose to analyze and interpret legacy NASA-supported citizen science data. For the purposes of this program element, NASA citizen science data means data that were collected by citizen scientists and that were derived from a NASA-funded citizen science project, or citizen science data hosted directly on a NASA data system, or citizen science data that are directly used to calibrate or validate NASA Earth observation data For the purpose of this program element, citizen science is defined as efforts or projects that use voluntary public participation in the scientific endeavor, including – but not limited to – formulating research questions, conducting experiments, collecting and analyzing data collected by citizen and/or professional scientists, interpreting results, making new discoveries, and/or developing or deploying technologies and applications. Crowdsourcing, another frequently used term describing voluntary contributions, is included under citizen science in this program element.</p>

SPIN ID	Program Title	Sponsor Name	Sponsor Number	Deadline Date	Funding Amount
	Synopsis	<p>CDC announces availability of fiscal year 2024 funding for a cooperative agreement for Cycle 5 of the STI Surveillance Network (SSuN). Continuing resurgence of sexually transmitted infections (STIs), along with the imperative to implement syndemic approaches to disease surveillance addressing related epidemics such as Human Immunodeficiency Virus (HIV) and mpox (Orthopox virus previously referred to as monkeypox) inform this competitive Notice of Funding Opportunity (NOFO) which will support integrated sentinel and enhanced surveillance at the local, state, and national level. Emergent issues of concern such as mpox and antimicrobial resistant STIs add urgency to the maintenance of robust syndemic surveillance at the community level and in sexual health clinical settings. The purpose of this NOFO is to support sentinel and enhanced surveillance for STIs providing complete demographics, behavioral risk, clinical and preventive services data missing in routine reporting.</p>

	Synopsis	This award honors excellence in research and discoveries in the field of hypertension as well as a researcher's contributions. The selection committee assesses the candidates' impact on their fields throughout their productive careers as well as any single discovery. Scientists with a background in hypertension research and those who have made a meritorious scientific discovery or discoveries, either alone or with others, may be considered.

	Deadline Dates (ALL)	08-May-2024 [LOI/Pre-App]			
	Synopsis	<p>This Request for Proposals (RFP) from Cures Within Reach (CWR) is seeking clinical repurposing trials from US-based research institutions using already approved treatments to address unmet and high-priority medical needs of US veterans and/or active US military, such as mental health, post-traumatic stress disorder (PTSD) and brain injuries. The sponsor's strongest preference is for proof of concept, pivotal, Phase I or Phase IIA clinical repurposing trials. Clinical trials utilizing telehealth or other decentralized / remote strategies are encouraged to apply. Repurposed therapies must be approved and/or generally recognized as safe for human use by some regulatory agency, such as the US Food and Drug Administration, European Medicines Agency, Health Canada or Japan's Pharmaceuticals and Medical Devices Agency, and may include drugs, devices, nutraceuticals, diagnostics or cellular/gene therapies, as well as combination therapies. These repurposed therapies must be tested in a new indication for which they are not already approved or used widely in the clinic as standard of care.</p>

	Synopsis	The Patient-Centered Outcomes Research Institute (PCORI) is issuing a funding announcing for the Implementation of Effective Shared Decision Making Approaches in Practice Settings. This PFA is intended to promote the targeted implementation and systematic uptake of shared decision making (SDM) in healthcare settings, in line with PCORI's mission of supporting patients in making informed decisions about their care. For this PFA, PCORI defines an SDM strategy as an intervention or approach that draws on and presents evidence to inform patients of available treatment options and their risks and benefits and either engages patients in a decision-making process with their clinician or promotes their ability to engage in such a process.
