

Icahn School of Medicine at  
**Mount Sinai**

Grants and Contracts Office

**Funding Opportunities Monthly Edition  
July 2024 Due Dates**

## Introduction

This funding opportunity packet contains information on funding opportunities with deadlines in July 2024. The opportunities are organized in the following order:

1. [National Institutes of Health \(NIH\)](#)
2. [National Science Foundation \(NSF\)](#)
3. [Other Federal](#)
4. [Non Federal](#)

## NIH Funding Opportunities

SPIN ID	Program Title	Sponsor Name	Sponsor Number	Deadline Date	Funding Amount
117828	<a href="#">RFA-CA-23-029 -- Cancer Immunoprevention Network (CIP-Net) ?Research Projects (UG3/UH3 Clinical Trials Not Allowed)</a>	National Cancer Institute/NIH/DHHS	RFA-CA-23-029	03-Jul-2024	2,500,000 USD
	<p>Contact Name   Altaf Mohammed, Ph.D.</p> <p>Contact Telephone   240-276-6028</p> <p>Contact Email   <a href="mailto:CIP-Net@mail.nih.gov">CIP-Net@mail.nih.gov</a></p> <p>Sponsor Website  </p> <p>Program URL   <a href="#">Link to program URL</a></p> <p>Deadline Dates (ALL)   03-Jul-2024</p> <p>Synopsis   Through this Notice of Funding Opportunity (NOFO), the National Cancer Institute (NCI) intends to establish a Cancer Immunoprevention Network (CIP-Net) to support a deeper understanding of basic mechanisms of immunoprevention, discover novel immunoprevention strategies, preclinical development and testing of interventions, and foster a community of cancer immunoprevention researchers. The UG3/UH3 research projects will enable de novo discovery of immune pathways, targets, immunoprevention mechanisms, or investigate the efficacy and potential side effects of new vaccines or immunomodulatory agents. Applicants responding to this NOFO must apply for both the UG3 and UH3 phases together in a single application. Achievement of the UG3 milestones will be necessary for the transition to the UH3 phase.</p>				
110367	<a href="#">Research Projects in Physical Sciences-Oncology (U01 Clinical Trial Optional)</a>	National Cancer Institute/NIH/DHHS	PAR-22-147	01-Jul-2024	2,000,000 USD

projects that are expected to accelerate the pace of translation of NCI-supported methods/assays/technologies (referred to as "assays") to the clinic. Specifically, the focus of applications submitted in response to this NOFO should be on the adaption and clinical validation of molecular/cellular/imaging markers (referred to as "markers" or "biomarkers") for cancer detection, diagnosis, prognosis, monitoring, and prediction of response in treatment, as well as markers for cancer prevention and control. Applications may support the acquisition of well-annotated specimens from NCI-supported or other clinical trials or observational cohorts/consortia for the purpose of clinical validation of the assay. Research projects proposed in response to this NOFO encourage multidisciplinary interaction among scientific investigators, assay developers, clinicians, statisticians, and clinical laboratory staff. Clinical laboratory scientist(s) and statistical experts are highly encouraged to comprise integral parts of the application. This NOFO is not intended to support early-stage development of technology or the conduct of clinical trials, but rather the adaption and validation of assays to the point where they could be integrated into clinical trials as investigational assays/tools/devices.

Synopsis | National Cancer Institute (NCI) invites applications from investigators interested in conducting basic, mechanistic research into the biological/genetic causes of cancer health disparities. These research project grants (R01) will support innovative studies designed to investigate biological/genetic bases of cancer disparities, such as (1) mechanistic studies of biological factors associated with cancer disparities, including those related to basic research in cancer biology or cancer prevention strategies, (2) the development and testing of new methodologies and models, and (3) secondary data analyses. This FOA is also designed to aid and facilitate the growth of a nationwide cohort of scientists with a high level of basic research expertise in cancer health disparities research who can expand available resources and tools, such as biospecimens, patient derived models, and methods that are necessary to conduct basic research in cancer health disparities. This FOA will use the NIH Research Project (R01) award mechanism.

Deadline Dates (ALL)	07-May-2024 , 05-Jun-2024 , 05-Jul-2024 , 07-Sep-2024 , 05-Oct-2024 , 05-Nov-2024 , 07-Jan-2025 , 05-Feb-2025 , 05-Mar-2025 , 07-May-2025 , 05-Jun-2025 , 05-Jul-2025 , 07-Sep-2025
Synopsis	The purpose of this funding opportunity announcement is to encourage collaborations between the life and physical sciences that: 1) apply a multidisciplinary bioengineering approach to the solution of a biomedical problem; and 2) integrate, optimize, validate, translate or otherwise accelerate the adoption of promising tools, methods, and techniques for a specific research or clinical problem in basic, translational, or clinical science and practice. An application may propose design-directed, developmental, discovery-driven, or hypothesis-driven research and is appropriate for small teams applying an integrative approach to increase our understanding of and solve problems in biological, clinical, or translational science. This FOA will support clinical trials that test functionality or validate performance in the chosen setting. This FOA is not intended to support conventional clinical trials that lack translation as the primary motivation. Applications that propose phase III clinical trials in any area of research are not sought by and will not be supported through this FOA. This FOA does not propose to support commercial production.

## NIH Funding Opportunities

SPIN ID	Program Title	Sponsor Name	Sponsor Number	Deadline Date	Funding Amount
112442	<a href="#">NCI Clinical and Translational Exploratory/Developmental Studies (R21 Clinical Trial Optional)</a>	National Cancer Institute/NIH/DHHS	PAR-22-216	12-Jun-2024	275,000 USD
	<p>Contact Name   William C. Timmer, Ph.D</p> <p>Contact Telephone   240-276-6130</p> <p>Contact Email   <a href="mailto:william.timmer@nih.gov">william.timmer@nih.gov</a></p> <p>Sponsor Website  </p> <p>Program URL   <a href="#">Link to program URL</a></p> <p>Deadline Dates (ALL)   12-Jun-2024 , 01-Jul-2024 , 10-Oct-2024 , 01-Nov-2024 , 13-Feb-2025 , 01-Mar-2025 , 12-Jun-2025 , 01-Jul-2025</p> <p>Synopsis   This Funding Opportunity Announcement (FOA) supports preclinical and early phase clinical research, as well as correlative studies, directly related to advancements in cancer treatment, diagnosis, prevention, comparative oncology, symptom management, or reduction of cancer disparities. This includes (but is not limited to) development and testing of the following: new molecular agents or biologics for cancer treatment; management strategies for cancer-related symptoms or treatment-related toxicity; cancer screening or diagnostic tools, such as imaging techniques; cancer preventive agents or approaches; predictive and prognostic biomarkers for patient selection or stratification; clinically relevant in vivo or in vitro tumor models (including genetically engineered mouse models, patient-derived xenograft models, organoids, and cell lines); and strategies to address therapeutic outcome disparities among underserved populations. In addition to novel agents, new treatment strategies may involve repurposed agents or novel combinations of interventions (including radiation), based on established mechanisms of action. Comparative correlative studies in cancer patients with age, gender, racial/ethnic, or health disparities are encouraged to explore mechanisms underlying their differential responses (efficacy and toxicity) and resistance to therapeutic interventions. Comparative oncology studies in dogs investigating strategies for treatment and diagnosis of human disease are supported as well. This FOA does not support research that focuses on basic cancer biology (such as studies of cancer-related pathways, molecular mechanisms, or mechanisms of metastasis), late-stage clinical trials, risk assessment studies, epidemiological studies, or studies of behavioral interventions. These applications will be deemed not responsive to this FOA and will not be reviewed (see below for a more detailed description of studies that are not responsive for this FOA). The R21 mechanism is intended to encourage exploratory and developmental research projects by providing support for the early and conceptual stages of these projects. These studies may involve considerable risk but may lead to breakthroughs in particular areas, or to the development of novel techniques, agents, methodologies, models, or applications that could have a major impact on cancer research (preclinical or clinical).</p>

The purpose of this NOFO is to facilitate the transition of SBIR or STTR Phase II projects to the commercialization stage. This NOFO is expected to promote partnerships between Federally-funded SBIR or STTR Phase II awardees and third-party investors and/or strategic partners to facilitate and accelerate the capital-intensive steps that are required to commercialize new products and services. Applicants must submit a Commercialization Plan, which should include details on any independent third-party investor funding that has already been secured or is anticipated during the Phase IIB Bridge Award project period. It is expected that the level of this independent third-party funding will be equal to or greater than the NCI funds being requested throughout the Phase IIB Bridge Award project period. Proposed projects may address preclinical and/or clinical stages of technology development. Clinical trials may be proposed as appropriate but are not required.</p>

encourage current grant or cooperative agreement awardees to extend their funded studies to investigate uterine serous carcinoma (USC). To be eligible for these supplemental funds, parent grants must currently focus on (1) endometrial cancer; (2) TP53 aberrant tumors; (3) serous ovarian cancer; (4) development of in vitro and in vivo model systems; or (5) cancer health disparities. The overall goal of these administrative supplements is to advance knowledge in the tumor biology (including the tumor microenvironment), prevention, diagnosis, early detection, treatment, risk assessment, or the health disparity issues of USC that would lead to future benefits for patients with this disease.

Deadline Dates (ALL)	20-Jun-2024 , 15-Jul-2024 , 21-Oct-2024 , 13-Nov-2024 , 20-Feb-2025 , 10-Mar-2025 , 20-Jun-2025 , 14-Jul-2025 , 20-Oct-2025 , 17-Nov-2025 , 20-Feb-2026 , 17-Mar-2026 , 22-Jun-2026 , 13-Jul-2026 , 20-Oct-2026 , 13-Nov-2026
Synopsis	<p>The goal of this notice of funding opportunity (NOFO) is to support feasibility trials of complementary and integrative health approaches with physical and/or psychological therapeutic inputs (often called mind and body interventions) for conditions that have been identified by NCCIH as high-priority research topics. This funding opportunity is intended to support feasibility clinical trials that provide new information that are scientifically necessary for the planning and conduct of a subsequent clinical efficacy or effectiveness study, pragmatic trial, or dissemination and implementation trial within NCCIH’s mission. NCCIH expects that applications to this NOFO will describe the planned future clinical trial and in so doing demonstrate that the proposed (R34) research is scientifically necessary to design or plan the subsequent competitive full-scale clinical trial. Under this R34, the data collected should be used to fill gaps in scientific knowledge necessary to develop a competitive full-scale clinical trial, including, but not limited to the following: examining feasibility and acceptability of interventions lacking published data; tailoring or adapting the content or structure of an intervention to a specific population, modality, or setting; refining the intervention to determine the most appropriate frequency or duration; determining feasibility of recruitment, retention, and data collection procedures; refining and assessing the feasibility of protocolized multi-component interventions; or examining acceptability and adherence of control conditions. The subsequent full-scale clinical trial should have the potential to make a significant impact on public health. Prior to submitting to this NOFO, applicants are encouraged to contact the appropriate NCCIH Scientific/Research contact person for the science area of the planned application. This NOFO requires a Plan for Enhancing Diverse Perspectives (PEDP), which will be assessed as part of the</p>

Deadline Dates (ALL)	20-Jun-2024 , 15-Jul-2024 , 21-Oct-2024 , 13-Nov-2024 , 20-Feb-2025 , 10-Mar-2025 , 20-Jun-2025 , 14-Jul-2025 , 20-Oct-2025 , 17-Nov-2025 , 20-Feb-2026 , 17-Mar-2026 , 22-Jun-2026 , 13-Jul-2026 , 20-Oct-2026 , 13-Nov-2026
Synopsis	<p>This Notice of Funding Opportunity (NOFO) encourages applications for investigator-initiated fully remotely delivered and conducted clinical trials to assess the efficacy or effectiveness of complementary and integrative health interventions in NCCIH- designated areas of high research priority. Applications submitted under this NOFO are expected to propose a remotely delivered and conducted fully powered clinical trial with no in-person contact between research staff and study participants and may utilize mHealth tools or technologies. Applicants must provide justification for the remotely delivered approach and provide preliminary data on the feasibility and safety of the approach, along with evidence that the intervention has promise of clinical benefit. Applicants are encouraged to contact the appropriate NCCIH Scientific/Research contact for the area of science for which they are planning to develop an application prior to submitting to this NOFO. This NOFO requires a Plan for Enhancing Diverse Perspectives (PEDP), which will be assessed as part of the scientific and technical peer review evaluation. Applications that fail to include a PEDP will be considered incomplete and will be withdrawn. Applicants are strongly encouraged to read the NOFO instructions carefully and view the available PEDP guidance material.</p>

Deadline Dates (ALL)	20-Jun-2024 , 15-Jul-2024 , 21-Oct-2024 , 13-Nov-2024 , 20-Feb-2025 , 20-Jun-2025 , 15-Jul-2025 , 20-Oct-2025 , 18-Nov-2025 , 20-Feb-2026 , 17-Mar-2026 , 22-Jun-2026 , 14-Jul-2026 , 20-Oct-2026 , 17-Nov-2026
Synopsis	<p>This notice of funding opportunity (NOFO) invites applications for investigator-initiated clinical trials of complementary and integrative health approaches with physical and/or psychological therapeutic inputs (often called mind and body interventions) in NCCIH-designated areas of high research priority. Applications submitted under this NOFO are expected to propose a multisite feasibility clinical trial that will provide new information that is scientifically necessary for the planning and conduct of a subsequent clinical efficacy or effectiveness study, pragmatic trial, or dissemination and implementation trial within NCCIH’s mission. NCCIH expects that applications to this NOFO will describe the planned future clinical trial and in so doing demonstrate that the proposed (R01) research is scientifically necessary to design or plan the subsequent fully powered, full-scale clinical trial. Under this R01, the data collected should be used to fill gaps in scientific knowledge, including, but not limited to the following: assessing whether the intervention can be delivered with fidelity across sites; demonstrating feasibility of recruitment, accrual, and randomization of participants across sites; demonstrating participant adherence to the intervention, as well as retention of participants throughout the study across sites; refining and assessing the feasibility of protocolized multimodal interventions, and/or demonstrating feasibility of data collection across sites in preparation for a future fully powered, multisite efficacy or effectiveness trial. The need for multisite feasibility trials is expected to be justified by sufficient preliminary data from previous single site feasibility or acceptability trial(s) or the published literature. The data collected should be used to fill gaps in scientific knowledge and be necessary to develop a competitive fully powered multisite clinical trial that has the potential to make a significant impact on public health. Prior to submitting to this NOFO, applicants are encouraged to contact the appropriate NCCIH Scientific/Research contact person for the science area of the planned application. This NOFO requires a Plan for Enhancing Diverse Perspectives (PEDP), which will be assessed as part of the scientific and technical peer review evaluation. Applications that fail to include a PEDP will be considered incomplete and will be withdrawn. Applicants are strongly encouraged to read the NOFO instructions carefully and view the available PEDP guidance material.</p>

Synopsis	This Funding Opportunity Announcement (FOA) encourages cooperative agreement applications for investigator-initiated, multi-site, clinical trials (Phase III and beyond) to study the effects of natural products in NCCIH designated areas of high research priority. Applicants should describe plans for a Clinical Coordinating Center to develop and implement the proposed multi-site clinical trial. The objective of the Clinical Coordinating Center is to provide the design scientific rationale and a comprehensive scientific and operational plan for the clinical trial. The Clinical Coordinating Center is expected to be responsible for project management, participant recruitment and retention strategies, performance milestones, scientific conduct, and dissemination of results. Clinical Coordinating Center applications submitted under this FOA will utilize a two-phase, milestone-driven, cooperative agreement (UG3/UH3) funding mechanism. In addition, an accompanying Data

Synopsis | The NIH Research Education Program (R25) supports research education activities in the mission areas of the NIH. The overarching goal of this R25 program is to support educational activities that encourage individuals from diverse backgrounds, including those from groups underrepresented in the biomedical and behavioral sciences, to pursue further studies or careers in research. The NIH Research Education Program (R25) supports research education activities in the mission areas of the NIH. The overarching goal of this NHGRI R25 program is to support educational activities that encourage undergraduates from diverse backgrounds, including those from groups underrepresented in the biomedical workforce, to pursue further training and careers in the scientific, medical, ethical, social and/or legal areas of genomics research. To accomplish the stated over-arching goal, this FOA will support creative educational activities with a primary focus on: Research Experiences Courses for Skills Development This Genome Research Experiences to Attract Talented Undergraduates into the Genomic Field to Promote Diversity (GREAT) Program will support collaborative institutional partnerships that provide research education programs for undergraduates enrolled at minority-serving institutions (MSIs) or Institutional Development Award (IDeA)-eligible institutions. A partnership will include a MSI or IDeA-eligible institution, and one or more research-intensive institutions or organizations with a suitable research base for graduate-level training in scientific areas of interest to NHGRI.

## NIH Funding Opportunities

SPIN ID	Program Title	Sponsor Name	Sponsor Number	Deadline Date	Funding Amount
	Synopsis	<p>The purpose of this Funding Opportunity Announcement (FOA) is to solicit applications on the optimization and characterization of technologies and assays with the potential for utilization and adoption in regulatory submissions of genome editing therapeutics. This Funding Opportunity Announcement (FOA) is developed as a Common Fund initiative (<a href="https://commonfund.nih.gov/">https://commonfund.nih.gov/</a>) through the NIH Office of the NIH Director, Office of Strategic Coordination (<a href="https://dpcpsi.nih.gov/">https://dpcpsi.nih.gov/</a>). All NIH Institutes and Centers participate in Common Fund initiatives. The FOA will be administered by the National Institute of Allergy and Infectious Diseases (NIAID) on behalf of the NIH.</p>			
124966	<a href="#">RFA-AI-24-009 -- Limited Interaction Targeted Epidemiology: Epidemiology of Transmission and Treatment of HIV Among People Who Are at Increased Risk for HIV Infection in Latin America (LITE-LA) (UG3/UH3 Clinical Trial Optional)</a>	National Institute of Allergy and Infectious Diseases/NIH/DHHS	RFA-AI-24-009	30-Jun-2024 [Optional][LOI/Pre-App]	Not Specified

	Deadline Dates (ALL)	30-Jun-2024 [Optional][LOI/Pre-App], 30-Jul-2024			
	Synopsis	<p>The purpose of this notice of funding opportunity (NOFO) is to support investigators who will form large, electronically-generated cohorts in Latin America of HIV-negative men who have sex with men (MSM), transgender women (TGW), people who inject drugs (PWID), and/or female sex-workers and follow them to study the epidemiology of HIV incidence. Continued follow-up of those persons who acquire HIV will be required to study the epidemiology of viral suppression. Descriptions of these groups and comparisons of participants by seroconversion status will provide information on geographic and socially defined areas of high HIV incidence as well as on both personal and structural vulnerabilities to HIV infection. Studies of participants who seroconvert and comparisons of those becoming rapidly engaged in care and who reach non-detectable HIV levels to those whose virus remains detectable will inform on the treatment of HIV in Latin American countries. This NOFO will allow digital trials to determine optimal study approaches, or to pilot evidence-based digital (mHealth and online) HIV prevention and treatment interventions to both reduce HIV incidence and improve treatment in Latin America.</p>

## NIH Funding Opportunities

SPIN ID	Program Title	Sponsor Name	Sponsor Number	Deadline Date	Funding Amount
	Deadline Dates (ALL)	21-Jul-2024 [LOI/Pre-App], 20-Aug-2024			
	Synopsis	The purpose of this notice of funding opportunity (NOFO) is to support research that 1) defines associations between variations in human leukocyte antigen (HLA) and killer cell immunoglobulin-like receptor (KIR) genetic regions and immune-mediated diseases, 2) elucidates mechanisms underlying these associations with the goal of advancing therapeutic opportunities, and/or 3) validates association data in order to improve the predictive power of clinical disease screening. This NOFO requires a Plan for Enhancing Diverse Perspectives (PEDP), which will be assessed as part of the scientific and technical peer review evaluation. Applications that fail to include a PEDP will be considered incomplete and will be withdrawn. Applicants are strongly encouraged to read the NOFO instructions carefully and view the available PEDP guidance material.			
122359	<a href="#">Exploratory Clinical Trial Grants in Arthritis and Musculoskeletal and Skin Diseases (R61 Clinical Trial Required)</a>	National Institute of Arthritis and Musculoskeletal and Skin Diseases/NIH/DHHS	PAR-24-035	02-Jul-2024	600,000 USD

## NIH Funding Opportunities

SPIN ID	Program Title	Sponsor Name	Sponsor Number	Deadline Date	Funding Amount
	<p>Program URL <a href="#">Link to program URL</a></p> <p>Deadline Dates (ALL) 02-Jul-2024 , 01-Nov-2024 , 04-Mar-2025 , 02-Jul-2025 , 04-Nov-2025 , 04-Mar-2026 , 02-Jul-2026 , 02-Nov-2026</p> <p>Synopsis The purpose of this Notice of Funding Opportunity (NOFO) is to encourage Research Project Grant (R01) applications to pursue clinical observational (CO) studies to obtain data necessary for designing clinical studies for musculoskeletal, rheumatic, or skin diseases or conditions. Research data from observational studies supported by this NOFO can enhance clinical study design by providing essential information about disease symptoms, stages, and timing of disease progression; comorbid conditions; availability of potential research participants; and outcomes that are important to patients. They also can facilitate efforts to develop and/or validate objective biomarkers or subjective outcome measures for use in a future clinical study. A future clinical study may include a clinical trial or an observational study. Applicants to this NOFO are encouraged to propose studies that address significant obstacles or questions in the design of a clinical project, such as determining the appropriate primary or secondary outcome measures or identifying the stages of disease during which patients are most likely to respond to an intervention. Only observational studies will be supported through this NOFO.</p>				
125122	<a href="#">RFA-HD-25-001 -- Medical Rehabilitation Research Resource (P50 Clinical Trial Optional)</a>	National Institute of Child Health and Human Development/NIH/DHHS	RFA- HD-25-001	30-Jun-2024 [Optional][LOI/Pre-App]	3,750,000 USD

The centers will have a specific rehabilitation research theme and be comprised of a research project supported by 3 cores. The 3 cores will have functions within the center as well as functions nationwide. Together, the cores will support: administrative functions (including an optional pilot program), resource sharing, and community engagement and outreach. The Medical Rehabilitation Research Centers will contribute to medical rehabilitation research infrastructure by developing and disseminating techniques, data, theories, research programs, and expertise with the goal of enhancing the capability of medical rehabilitation investigators to understand mechanisms of functional recovery, develop therapeutic strategies, identify clinical care gaps, and improve the lives of people with disabilities. Applications must include a plan for inclusion of People with Lived Experience (as a required other attachment) that is relevant to the research</p>

Synopsis	This Notice of Funding Opportunity (NOFO) invites applications to participate in a research program cooperative agreement to support the Optimizing Health of Children and Adolescents with Perinatal HIV Exposure Initiative. The objective of this NOFO is to generate information needed to develop and to test interventions for the early detection and reduction of long-term effects of in utero/perinatal exposure to antiretroviral therapy (ART) and/or HIV among individuals who are HIV exposed but uninfected (IHEU). Investigators with innovative thinking and new approaches to address the public health issues facing IHEUs are encouraged to apply. A multi-program project grant is proposed to answer questions not easily addressed in an R01 or U01. The applications should answer important fundamental questions related to long-term health outcomes for IHEUs. Proposed projects should 1) have a scope that is well matched to the resources and the research objectives, 2) be scientifically meritorious, and 3) complement one another, be synergistic, and support the program's overall theme.

## NIH Funding Opportunities

SPIN ID	Program Title	Sponsor Name	Sponsor Number	Deadline Date	Funding Amount
	Deadline Dates (ALL)	07-May-2024 , 16-Jun-2024 , 16-Jul-2024 , 07-Sep-2024 , 16-Oct-2024 , 16-Nov-2024 , 07-Jan-2025 , 25-Feb-2025 , 16-Mar-2025 , 07-May-2025 , 16-Jun-2025 , 16-Jul-2025 , 07-Sep-2025			
	Synopsis	The National Institute of Diabetes and Digestive and Kidney Diseases (NIDDK) announces a program that provides NIDDK-supported K01, K08, K23, and K25 recipients the opportunity to apply for Small Grant (R03) support during the latter years of the award period of their K award. Through the use of this mechanism, the NIDDK is seeking to enhance the capability of its K01, K08, K23, and K25 award recipients to conduct research as they complete their transition to fully independent investigator status. The R03 grant mechanism supports different types of projects, including pilot and feasibility studies; secondary analysis of existing data; small, self-contained research projects; development of research methodology; and development of new research technology. The R03 is, therefore, intended to support research projects that can be carried out in a short period of time with limited resources and that may provide preliminary data to support a subsequent R01, or equivalent, application.

	Deadline Dates (ALL)	17-Jun-2024 [Optional][LOI/Pre-App], 17-Jul-2024			
	Synopsis	The main objective of this NOFO is to foster development and testing of technologies adaptable to aging-related changes in older adults (aged 65 years or older) with T1D to improve diabetes management and quality of life. Older adults may have increased vulnerability to hypoglycemia, cognitive impairment and/or multiple co-morbidities which may affect the risks and benefits of these technologies in this population. Projects will be funded to a) develop and test new technologies and b) to adapt and test existing technologies. It is expected that aging-adaptive diabetes technologies that address barriers for use among older adults with T1D will improve usability, adoption and adherence decreasing the risk of hypoglycemia (and hypoglycemia unawareness) while enhancing glycemic control, facilitating better diabetes management, and improving quality of life for these individuals and their caregivers.

	<p>Contact Name   Olivier Blondel, Ph.D.</p> <p>Contact Telephone   301-263-4342</p> <p>Contact Email   <a href="mailto:blondelol@niddk.nih.gov">blondelol@niddk.nih.gov</a></p> <p>Sponsor Website  </p> <p>Program URL   <a href="#">Link to program URL</a></p> <p>Deadline Dates (ALL)   10-Jun-2024 [Optional][LOI/Pre-App], 09-Jul-2024</p> <p>Synopsis   This Notice of Funding Opportunity (NOFO) requests applications to explore human pancreatic tissues and the immune compartment for the discovery of specific signaling or processing pathways that may contribute to the asymptomatic phase of T1D, the discovery of early biomarkers of T1D pathogenesis, the development of diagnostic tools for the detection and staging of early T1D in at-risk or recently-diagnosed individuals, and/or the identification and biological validation of therapeutic targets for the development of preventative or early treatment strategies. Successful applicants will join the Consortium on Beta Cell Death and Survival (CBDS), whose mission is to better define and detect the mechanisms of beta cell stress and destruction central to the development of T1D in humans, with- the long-term goal of protecting the residual beta cell mass in T1D patients as early as possible in the disease process, and of preventing the progression to autoimmunity. The CBDS is part of a collaborative research framework, the Human Islet Research Network (HIRN, <a href="https://hirnetwork.org/">https://hirnetwork.org/</a>), whose overall mission is to support innovative and collaborative translational research to understand how human beta cells are lost in T1D, and to find innovative strategies to protect and replace functional beta cell mass in humans. This NOFO will only support studies with a primary focus on increasing our understanding of human disease biology (as opposed to rodent or other animal models). This NOFO will not accept applications proposing a clinical trial.</p>

## NIH Funding Opportunities

SPIN ID	Program Title	Sponsor Name	Sponsor Number	Deadline Date	Funding Amount
	<p>Synopsis</p>	<p>This Notice of Funding Opportunity (NOFO) invites applications for Cystic Fibrosis (CF) Research and Translation Core Centers. CF Research and Translation Core Centers are designed to support both basic and clinical research on Cystic Fibrosis. CF Research and Translation Core Centers support three primary research-related activities: Research Core services; a Pilot and Feasibility program; and an Administrative Core with an enrichment program. Core Centers provide shared resources to support research to develop and test new therapies for CF and to foster collaborations among institutions with a strong existing research base in CF. The NIDDK currently supports seven CF Research and Translation Centers located at institutions with documented programs of research excellence in basic and clinical CF Research. Information about the currently funded CF Research and Translation Centers may be found at: <a href="https://www.niddk.nih.gov/research-funding/research-programs/cystic-fibrosis-research-translation-centers">https://www.niddk.nih.gov/research-funding/research-programs/cystic-fibrosis-research-translation-centers</a> or <a href="https://www.cysticfibrosiscenters.org/">https://www.cysticfibrosiscenters.org/</a>.</p>			
125706	<a href="#">RFA-ES-24-001 -- Hazardous Materials Worker Health and Safety Training (U45 Clinical Trials Not Allowed)</a>	National Institute of Environmental Health Sciences/NIH/DHHS	RFA-ES-24-001	08-Jun-2024 [Optional][LOI/Pre-App]	700,000 USD
	<p>Contact Name</p> <p>Contact Telephone</p> <p>Contact Email</p> <p>Sponsor Website</p> <p>Program URL</p> <p>Deadline Dates (ALL)</p> <p>Synopsis</p>	<p>Sharon Beard</p> <p>984-287-3237</p> <p><a href="mailto:beard1@niehs.nih.gov">beard1@niehs.nih.gov</a></p> <p></p> <p><a href="#">Link to program URL</a></p> <p>08-Jun-2024 [Optional][LOI/Pre-App], 08-Jul-2024</p> <p>NIEHS invites applications for cooperative agreements to support the development and delivery of model programs for the training and education of workers engaged in activities related to hazardous materials and waste generation, removal, containment, transportation, and emergency response. This funding opportunity announcement aims to use safety and health training to prevent and reduce work-related harm. The training programs will provide skills and knowledge to workers on how best to identify and protect themselves and their communities from exposure to hazardous materials encountered during hazardous waste operations, hazardous materials transportation, environmental restoration of contaminated facilities, and emergency response. A variety of industry sites, such as those involved with hazardous waste cleanup, remedial action, and transportation-related emergency response may pose severe health and safety concerns to workers and the surrounding communities. These sites contain many hazardous substances, sometimes unknown, and a site maybe uncontrolled. A major goal of the Worker Training Program (WTP) is to support institutional competency-building for the development and delivery of model training and education programs.</p>			
124716	<a href="#">RFA-MH-25-120 -- Lethal Means Safety Suicide Prevention Research in</a>	National Institute of Mental	RFA-	15-Jun-2024	450,000

## NIH Funding Opportunities

SPIN ID	Program Title	Sponsor Name	Sponsor Number	Deadline Date	Funding Amount
	<a href="#">Healthcare and Community Settings (R34 Clinical Trial Required)</a>		Health/NIH/DHHS	MH- [Optional][LOI/Pre-App] 25-120	USD
	<p>Contact Name: Stephen O'Connor, Ph.D.</p> <p>Contact Telephone: 301-480-8366</p> <p>Contact Email: <a href="mailto:stephen.o'connor2@nih.gov">stephen.o'connor2@nih.gov</a></p> <p>Sponsor Website:</p> <p>Program URL: <a href="#">Link to program URL</a></p> <p>Deadline Dates (ALL): 15-Jun-2024 [Optional][LOI/Pre-App], 15-Jul-2024 , 23-Jan-2025</p> <p>Synopsis: NIMH seeks applications to evaluate the preliminary effectiveness of therapeutic and service delivery interventions that utilize lethal means safety strategies to reduce suicide risk in healthcare and community settings. Behavioral health clinics that incorporate lethal means counseling into their programming have been associated with significant reductions in suicide attempts and death. Yet, the field is lacking strong evidence on the effectiveness of these strategies tested in healthcare and community settings. Pilot effectiveness research will advance knowledge regarding optimization strategies, therapeutic change mechanisms, and inform decisions about whether further effectiveness testing is warranted. The research will provide preliminary evidence on the extent to which lethal means safety interventions more optimally lead to improved safety (e.g., number/percent of firearms safely stored, overdose injury codes for an individual) and lower suicide risk. In this pilot phase of effectiveness research, the trial should be designed to evaluate the feasibility, tolerability, acceptability, safety, and potential effectiveness of the approach; to address whether the intervention engages the target(s)/mechanisms(s) that is/are presumed to underlie the intervention effects; and to obtain preliminary data needed as a pre-requisite to a larger-scale effectiveness trial (e.g., comparative effectiveness study, practical trial) designed to definitively test the effectiveness of the intervention.</p>

	Deadline Dates (ALL)	15-Jun-2024 [Optional][LOI/Pre-App], 15-Jul-2024			
	Synopsis	<p>The purpose of the NINDS Research Program Award (RPA) is to provide longer-term support, and increased freedom and flexibility to Program Directors (PDs)/Principal Investigators (PIs), to allow them to redirect their time away from the administrative burden of writing and managing multiple grant applications and towards engaging in the lab. This RPA affords investigators at most career stages the opportunity to advance their long-term research goals, rigorously explore exciting research opportunities, and mentor students and postdoctorates, which support and align with the mission of NINDS. RPAs will support the overall research programs of NINDS-funded investigators for up to 8 years, at a level commensurate with a PD/PI's recent NINDS support (Part 2, Section II). This greater funding stability will provide eligible investigators increased security, allowing them to undertake research projects that require a longer timeframe or to embark upon research that breaks new ground. Research activities outside of the NINDS mission, or traditionally supported by another NIH Institute or Center, will not be considered through this program. Benefits of the RPA include: A more stable funding environment, facilitating the pursuit of longer-term research goals; Flexible funding, enabling investigators to pursue research opportunities as they arise, not tied to specific aims; Reduced time spent writing grant applications and managing multiple grant awards, allowing investigators to spend more time conducting and overseeing research; More time for PDs/PIs to mentor and foster a diverse workforce in their laboratories. The RPA is a unique program for NINDS, as such NINDS strives to ensure it reflects our commitment to enhancing the diversity and inclusiveness of the neuroscience workforce. A diverse NIH-supported scientific workforce, including individuals from underrepresented groups, fosters scientific innovation, enhances global competitiveness, contributes to robust learning environments, and improves the quality of the research (see NIH's Interest in Diversity). NINDS will work to ensure that it maintains a broad and diverse research portfolio in terms of scientific areas, approaches, regions, institutions, and individuals. Such diversity will optimize returns on the Institute's investments by maximizing the ideas explored and the chances for important breakthroughs. Note that, while this funding opportunity also accepts clinical trials, only applications proposing "mechanistic clinical trials or studies" or basic experimental studies with humans (BESH) will be accepted. For information on the types of clinical trial that are within scope of this funding opportunity announcement, refer to Funding Opportunity Description, below.</p>

Deadline Dates (ALL)	31-May-2024 [Optional][LOI/Pre-App], 02-Jul-2024
<p>Synopsis</p>	<p>This Notice of Funding Opportunity (NOFO) invites applications proposing the development of a specialized center. Henceforth, the center will be referred to as the “Consortium.” The aim of the Consortium will be to provide resources, expertise, and coordination to advance innovative, high-quality research on palliative care for those living with serious illnesses across the lifespan. The research infrastructure will encompass Alzheimer’s disease (AD) and AD-related dementias (ADRD), cancer, and other serious illnesses and populations relevant to NIH’s partnering Institutes, Centers, and Offices (ICOs). NIH currently funds many palliative care research projects across its ICOs, and there is a need for a research infrastructure to leverage synergies, coordinate efforts, develop the scientific workforce, and address remaining gaps in the field. An important focus will be research to understand and address disparities in access, quality, and use of palliative care services for health disparities populations (as defined by the NIA Health Disparities Framework priority populations). The overall goals of the Consortium are the following: Create new scientific knowledge on delivery and outcomes of palliative care approaches across the lifespan and across a range of populations and serious illnesses. Foster development of early- and mid-career investigators pursuing research careers in palliative care as well as established investigators shifting to palliative care research, with a goal of diversifying and expanding the palliative care research workforce. Serve as a national platform that provides resources and expertise to facilitate high-quality research on palliative care across the lifespan and across a range of populations and serious illnesses, including clinical trials, observational, quasi-experimental, and qualitative</p>

	<p>Synopsis   This Notice of Special Interest (NOSI) is intended to promote behavioral and social research on the dementia care workforce and the impact of workforce factors on outcomes for persons living with Alzheimer's disease or Alzheimer's disease-related dementia (AD/ADRD) and their families. Applications focused on care of persons living with dementia and the systems that provide care may cite NOT-AG-21-046, and applications focused solely on unpaid dementia care partners/caregivers may cite NOT-AG-21-047 in the Agency Routing Identifier field (box 4B). PLEASE NOTE: Applications proposing clinical trials will not be considered a high priority for this NOSI. Studies proposing dementia care intervention research are encouraged to explore whether PAR-21-307 Dementia Care and Caregiver Support intervention Research (R01 – Clinical Trial Required) or PAR-21-308 Pragmatic Trials for Dementia Care and Caregiver Support (R61/R33 – Clinical Trial Required) would be more appropriate.</p>

## NIH Funding Opportunities

SPIN ID	Program Title	Sponsor Name	Sponsor Number	Deadline Date	Funding Amount
---------	---------------	--------------	----------------	---------------	----------------

Deadline Dates (ALL) | 09-Jul-2024 , 12-Nov-2024

Synopsis | The goals of this Notice of Special Interest (NOSI) are to encourage basic and translational research focused on the molecular, cellular, and physiological processes associated with the endosomal compartment in AD and Alzheimer's disease-related dementias (ADRD). Studies funded under this topic will support research into AD/ADRD pathogenesis related to enhancing our understanding of how the genetic underpinnings of endosomal trafficking in AD/ADRD may act as a hub in the pathophysiological changes associated with the disease.

108278	<a href="#">Notice of Special Interest (NOSI): Selective Cell and Network Vulnerability in Aging and Alzheimer's Disease</a>	National Institute on Aging/NIH/DHHS	NOT-AG-21-040	09-Jul-2024	Not Specified

 Program URL | [Link to program URL](#)  
 Deadline Dates (ALL) | 09-Jul-2024 , 12-Nov-2024

Synopsis | The goal of this Notice of Special Interest (NOSI) is to stimulate research to define and characterize neural cell populations (e.g., neurons and glia), neural activity and circuits, structural and functional networks, and brain regions that are vulnerable (or resistant) in brain aging and AD and the mechanisms underlying such selective vulnerability. Genetic and molecular signatures of different types of neurons and glial cells across the adult lifespan, in AD compared to other dementias of aging, and in different stages of AD will implicate cell processes and pathways mediating selective vulnerability in AD. Defining cell types by physiological measures such as electrophysiology and connectivity and manipulating neural activity in circuits and networks will provide a functional index of selective vulnerability. Applicants are encouraged to use new approaches to generate sophisticated data on molecular signatures of brain cells and on structure and function of brain circuits and networks. Understanding the mechanisms underlying selective vulnerability from cells to networks in AD is critical to fully define the disease process and to develop effective therapies.

This program is a multidisciplinary platform to support basic, epidemiologic, and clinical research on HIV and HIV-associated co-morbidities and co-infections among populations with substance use and substance use disorders (SUDs) and to address research questions at the individual and population level. The purpose of this notice of funding opportunity (NOFO) is to support the continuation of NIDA's HIV Cohorts Program, encouraging existing and new sites to address new emerging and/or high priority research on multidisciplinary aspects of HIV/AIDS and substance use in alignment with NIH-HIV research priorities in order to inform policy or practice. Cohort sites supported under this program are required to report to and collaborate with a NIDA funded Coordinating Center, including participating in research agendas addressing NIDA's high priority areas. This NOFO requires a Plan for Enhancing Diverse Perspectives (PEDP), which will be assessed as part of the scientific and technical peer review evaluation. Applications that fail to include a PEDP will be considered incomplete and will be withdrawn. Applicants are strongly encouraged to read the NOFO instructions carefully and view the available PEDP guidance material.</p>

Studies that address social and structural health determinants and their consequences such as homelessness, criminal justice involvement or forms of intersectional stigma are welcome and consideration should be given to HIV as a syndemic including comorbidities such as sexually transmitted infections, hepatitis C virus, and psychiatric disorder. Intervention studies can include individuals, couples, peers, providers and/or health care systems as their primary foci. Research is invited that adds substance use content to existing, widely used evidence-based HIV interventions, as well as novel intervention approaches that provide new ways of addressing substance use among SGM persons. Research that makes use of existing clinical data, including modeling research is encouraged if it can inform the design of more effective future intervention approaches for SGM persons who use substances, as well as research that can inform ascertainment and intervention among SGM persons who use substances in HIV outbreaks. This notice of funding opportunity (NOFO) requires a Plan for Enhancing Diverse Perspectives (PEDP), which will be assessed as part of the scientific and technical peer review evaluation. Applications that fail to include a PEDP will be considered incomplete and will be withdrawn. Applicants are strongly encouraged to read the NOFO instructions carefully and view the available PEDP guidance material.</p>

The COA development plan is expected to progress into the FDA drug development tool qualification program. This notice of funding opportunity (NOFO) utilizes the UG3/UH3 Phased Innovation Awards Cooperative Agreement grant mechanism that includes two phases. The applications responding to this NOFO should contain a COA development plan that will cover both UG3 and UH3 phases. In the first 2-year UG3 phase the project must have a set of operational milestones to be completed by the end of this period. Once NIDA program has evaluated the progress of the UG3 phase and determined that the UG3 phase has been successfully completed, it transitions to the UH3 phase to be funded for three additional years. The goal of this NOFO is to expand the armamentarium of COA that are FDA qualified as drug development tool (DDT) in the context of use (COI) of a SUD. Achieving this goal will greatly facilitate the development of treatments for</p>

Synopsis | The purpose of this notice of funding opportunity (NOFO) is to solicit applications proposing mechanistic transdisciplinary research in animal models that integrates approaches across social/cognitive neuroscience with perspectives from fields with complementary approaches to the study of social behavior, with the goal of developing a testable conceptual or computational model that provides mechanistic insights into social behavior and its relationships with the onset, trajectory and impact of Substance Use Disorders (SUDs) and comorbidities. This NOFO is intended to support basic or translational research in non-human animal models, including secondary analysis of data from research in animal models. Applications including studies involving human subjects should submit under one of the companion NOFOs. Applications with observational research in humans, secondary analysis of human subjects data, or research specifically aimed at studying disease processes or evaluating clinical interventions should submit under the companion Clinical Trials Optional NOFO, RFA-DA-25-032. Applications proposing Basic Experimental Studies involving Humans should be submitted under the companion “Basic Experimental Studies with Humans (BESH) Required” NOFO, RFA-DA-25-033. This NOFO requires a Plan for Enhancing Diverse Perspectives (PEDP), which will be assessed as part of the scientific and technical peer review evaluation. Applications

Deadline Dates (ALL)	27-Jun-2024 , 26-Jul-2024
Synopsis	The purpose of the NIDA Animal Genetics Program is to identify genetic, genomic, and molecular (epi)genetic variants that underlie: 1. Phenotypes associated with addictive behaviors and/or vulnerability to distinct stages along the substance use disorder (SUD) trajectory (e.g. initial/acute use, escalation of use, acquisition of tolerance, dependence, uncontrolled use, abstinence and relapse or recovery); 2. Behaviors associated with SUD (e.g. impulsivity, novelty seeking, delayed discounting, and other genetically-associated phenotypes); and 3. Comorbidities that demonstrate genetic correlations with phenotypes and behaviors linked with SUD (e.g. anxiety, stress, poor maternal care, social defeat, and other paradigms). Applications may examine any type of variant, including single nucleotide variants (SNVs), indels, large and small structural variants, and all types of mobile DNA. NIDA encourages applications that take genomics, multi-omics, and/or data-based approaches that

## NIH Funding Opportunities

SPIN ID	Program Title	Sponsor Name	Sponsor Number	Deadline Date	Funding Amount
	integrate multi-level 'omics data, delineate gene networks, and/or uncover the function of known or newly discovered genetic or epigenetic variants. NIDA expects these studies to uncover novel mechanisms that contribute to SUD and facilitate the discovery of targets for intervention and guide the development of individualized therapeutics to treat these different aspects of SUD.				
124329	<a href="#">Developing Digital Therapeutics for Substance Use Disorders (UG3/UH3 Clinical Trial optional)</a>	National Institute on Drug Abuse/NIH/DHHS	PAR-24-064	17-Jul-2024	Not Specified

Advances in technology offer unprecedented opportunities to develop clinical-grade mobile, web, or other software-based platforms designed to deliver treatments that are safe and effective for SUD. FDA authorization of DTx can play an important role in increasing the availability of treatments to patients with SUD. The primary objective of this FOA is to move DTx to their next step in the development process, with the ultimate goal of generating new, FDA authorized, disseminated treatments for SUDs. Applications may focus on the pre-clinical and/or clinical development and testing of new DTx or existing DTx developed for other indications. The UG3/UH3 Cooperative Agreement involves 2 phases. The UG3 phase, for up to 2 years, is designed to support a project with specific milestones to be accomplished by the end of the period. The UH3 phase is to provide funding for up to 3 additional years following successful completion of the UG3. UG3 projects that meet their milestones will be administratively considered by NIDA and prioritized for transition to the UH3 phase. Investigators submitting to this FOA must address both UG3 and UH3 phases.</p>

	Synopsis	<p>This funding opportunity announcement (FOA) encourages applications for the Chronic, Non-Communicable Diseases and Disorders Across the Lifespan: Fogarty International Research Training Award (NCD-LIFESPAN) D43 program for institutional research training programs in low-and middle-income countries (LMICs, as defined by the World Bank classification system). Applications may be for collaborations between institutions in the U.S and an eligible LMIC or may involve just LMIC institutions if there is a previous track record of externally funded research and/or research training programs by the lead LMIC institution. The proposed institutional research training program is expected to sustainably strengthen the NCD research capacity of the LMIC institutions, and to train in-country experts to develop and conduct research on NCDs across the lifespan, with the long-range goal of developing and implementing evidence-based interventions relevant to their countries. Interdisciplinary research training that cuts across NCDs is encouraged. However, for more topical applications, the main focus of research training covered in the application must be relevant to the mission and/or interests of at least one of</p>

the participating NIH ICs, other than FIC, as stated by each in this FOA. Other NCD topics and types of training may be included as secondary and complementary focus areas. This Funding Opportunity Announcement (FOA) allows appointment of Trainees (D43) proposing to serve as the lead investigator of an independent clinical trial; or proposing a separate ancillary clinical trial; or proposing to gain research experience in a clinical trial led by another investigator, as part of their research and career development.

Synopsis | The NIH INvestigation of Co-occurring conditions across the Lifespan to Understand Down syndromE (INCLUDE) Project seeks to improve health and quality-of-life for individuals with Down syndrome. This Funding Opportunity Announcement (FOA) invites researchers to submit applications for support of clinical projects that address critical needs for clinical trial readiness in Down syndrome. This initiative seeks applications that are intended to facilitate Down syndrome research by enabling efficient and effective movement of candidate therapeutics or diagnostics towards clinical trials for Down syndrome and its co-occurring conditions, and to increase their likelihood of success through development and testing of biomarkers and clinical outcome assessment measures, development and testing of novel trial methods and recruitment strategies, or by defining the presentation and course of the co-occurring conditions in individuals with Down syndrome to enable the design of future clinical trials.

	<p>Sponsor Website</p> <p>Program URL <a href="#">Link to program URL</a></p> <p>Deadline Dates (ALL) 01-Jul-2024</p> <p>Synopsis The NIH INvestigation of Co-occurring conditions across the Lifespan to Understand Down syndromE (INCLUDE) Project seeks to improve health and quality-of-life for individuals with Down syndrome. This Funding Opportunity Announcement (FOA) is soliciting Transformative Research Award applications to support individual scientists or groups of scientists proposing groundbreaking, exceptionally innovative, original, and/or unconventional research that has the potential to create new scientific paradigms, establish entirely new and improved clinical approaches, or develop transformative technologies related to Down syndrome. For the program to support the best possible researchers and research, applications are sought which reflect the full diversity of the nation’s research workforce. Individuals from diverse backgrounds, including those from underrepresented groups and from the full spectrum of eligible institutions in all geographic locations are strongly encouraged to apply to this Funding Opportunity Announcement. Applications are welcome in all topics relevant to Down syndrome-related research or its co-occurring conditions. No preliminary data are required. Projects must clearly demonstrate, based on the strength of the logic, a compelling potential to produce a major impact in research related to Down syndrome.</p>

Synopsis	This Funding Opportunity Announcement (FOA) supports Specialized Projects to develop current or emerging technologies to generate comprehensive atlases of brain connectivity, with an emphasis on human, non-human primate (NHP), and mouse. Projects using other species are also permitted, if their use is well justified and the goal is test and validate approaches that can be generalized across species. Applications may address any aspect(s) of data collection, reconstruction, analysis, integration, dissemination, and interpretation of brain connectivity and associated data pipelines, to enable faster, more precise, and more cost-effective generation and interpretation of brain-wide wiring diagrams. Proposals are encouraged to develop distinct capabilities and competencies that may be expected to complement Comprehensive Centers solicited by the companion FOAs, with aims of further developing and optimizing current technologies, or proposing entirely new, disruptive, and potentially risky approaches. Funded projects will be integrated into the BRAIN CONNECTS Network, consisting of other Specialized Projects from this FOA, and Comprehensive Centers from its companion announcements, as a coordinated effort aimed at developing the capabilities to generate wiring diagrams that can span entire brains across multiple scales.

122379	<a href="#">RFA-HG-23-033 -- Advancing Genomic Medicine Research (R21 Clinical Trial Optional)</a>	National Institutes of Health/DHHS	RFA-HG-23-033	08-Jul-2024	750,000 USD

Synopsis

This NOFO solicits proposals that stimulate innovation and advance understanding of when, where, and how best to implement the use and sharing of genomic information and technologies in clinical care provided to all persons irrespective of racial/ethnic background or socioeconomic status. Plan for Enhancing Diverse Perspectives The NIH recognizes that diverse teams working together and capitalizing on innovative ideas and distinct perspectives outperform homogeneous teams. There are many benefits that flow from a diverse scientific workforce, including: fostering scientific innovation, enhancing global competitiveness, contributing to robust learning environments, improving the quality of the research, advancing the likelihood that underserved populations participate in, and benefit from research, and enhancing public trust. To support the best science, the NIH encourages inclusivity in research. Examples of structures that promote diverse perspectives include but are not limited to: Transdisciplinary research projects and collaborations among neuroscientists and researchers from fields such as computational biology, physics, engineering, mathematics, computer and data sciences, as well as bioethics. Engagement from different types of institutions and organizations (e.g., research-intensive, undergraduate-focused, minority-serving, community-based). Individual applications and partnerships that enhance geographic and regional heterogeneity. Investigators and teams composed of researchers at different career stages. Participation of individuals from diverse backgrounds, including groups traditionally underrepresented in the biomedical, behavioral, and clinical research workforce (see NOT-OD-20-031), such as underrepresented racial and ethnic groups, those with disabilities, those from disadvantaged backgrounds, and women. Opportunities to enhance the research environment to benefit early- and mid-career investigators. This NOFO requires a Plan for Enhancing Diverse Perspectives (PEDP), which will be assessed as part of the scientific and technical peer review evaluation. Applications that fail to include a PEDP will be considered incomplete and will be withdrawn. Applicants are strongly encouraged to read the NOFO instructions carefully and view the available PEDP guidance material.

## NIH Funding Opportunities

SPIN ID	Program Title	Sponsor Name	Sponsor Number	Deadline Date	Funding Amount
	<p>Synopsis</p> <p>The purpose of this initiative is to support investigator-initiated research in genomics and health equity, with the ultimate goal of developing approaches, generating and disseminating data, and implementing metrics or interventions that will advance the equitable use of genomics to improve health in U.S. populations. Awardees will conduct innovative and generalizable research in genomics and health equity spanning across genomic research areas and will incorporate a plan for enhancing diverse perspectives. This R21 Notice of Funding Opportunity (NOFO) will support small research projects that can be carried out in a short period of time with limited resources. The R21 grant mechanism supports different types of projects including pilot and feasibility studies; secondary analysis of existing data; small, self-contained research projects; development of research methodology; and development of new research technology. Applications supporting New or Early Stage Investigators from diverse backgrounds, including those from groups traditionally underrepresented in the biomedical, behavioral, and clinical research workforce, as described in the NIH Notice of Interest in Diversity (NOT-OD-20-031), are encouraged. This Notice of Funding Opportunity (NOFO) requires a Plan for Enhancing Diverse Perspectives (PEDP) as part of the application. Applications without a PEDP will not be reviewed.</p>				
122903	<p><a href="#">Assessment of Climate at Institutions (ACT) Award (RC2 - Clinical Trial Not Allowed)</a></p>	National Institutes of Health/DHHS	PAR-24-038	01-Jul-2024	1,250,000 USD
	<p>Contact Name</p> <p>Contact Telephone</p> <p>Contact Email</p> <p>Sponsor Website</p> <p>Program URL</p> <p>Deadline Dates (ALL)</p> <p>Synopsis</p>	<p>H. The plans for self-studies should lead to institutional culture change by identifying perceptions, attitudes, and concerns, about, for example, inequities, micro-aggressions, institutional racism, and bias. The self-studies should provide a foundation for the development of an action plan to enhance diversity, equity, inclusion, and accessibility (DEIA) outcomes in the recruitment, hiring, retention, and advancement of faculty.</p>

Synopsis	The purpose of the INvestigation of Co-occurring conditions across the Lifespan to Understand Down syndromE (INCLUDE) Predoctoral to Postdoctoral Fellow Transition award (F99/K00) is to recruit exceptional graduate students from a broad variety of research fields to pursue postdoctoral training focused on Down syndrome related research. Graduate students from disciplines including, but not limited to, genetics, biochemistry, data science, imaging, engineering, and neurobiology are invited to apply to this opportunity. Prospective applicants are strongly encouraged to contact the INCLUDE Program Staff prior to initiating plans for application submission. This Funding Opportunity Announcement (FOA) does not allow applicants to propose to lead an independent clinical trial, but does allow applicants to propose research experience in a clinical trial led by a sponsor or co-sponsor.

determinants of health in populations that experience health disparities. These research projects will be part of the Multi-Sectoral Preventive Interventions (MSPI) Research Network, which will also include a Coordinating Center (RFA-OD-24-006). Funded under a cooperative agreement, projects participating in the MSPI Research Network will collaborate to share approaches, methods, and data, working closely with NIH Institutes, Offices and Centers. Applicants applying to this NOFO are encouraged to review the Coordinating Center NOFO to fully understand the MSPI Research Network structure and activities. This NOFO solicits bi-phasic research projects proposed in UG3/UH3 Phased Innovation Awards Cooperative Agreement applications. Funding for the UG3 phase (phase I) will be used to demonstrate sufficient preparation, feasibility and capacity to meet foundational milestone targets specific to the work proposed. A UG3 project that meets its milestones will be administratively considered by NIH and prioritized for transition to the UH3 award (phase II). Applicants responding to this NOFO must address specific aims and milestones for both the UG3 and UH3 phases.

 Deadline Dates (ALL) | 09-Jul-2024 , 12-Nov-2024

Synopsis | This NOSI promotes multidisciplinary research to clarify sex and gender differences in the risk, development, progression, diagnosis, and clinical presentation of Alzheimer's disease (AD) and Alzheimer's disease-related dementias (ADRD). Studies that examine sex and gender differences in outcomes (e.g., clinical, functional, well-being) among people living with AD/ADRD as well as AD/ADRD caregiving-related outcomes are also relevant. Broad areas of interest include biological (e.g., hormonal, genetic, metabolic, comorbidity-related), neuroscientific (e.g., neural systems and functions), behavioral (e.g., physical activity, substance use, social engagement), social (e.g., history of maltreatment or adversity, parenthood, marital status, educational attainment, socioeconomic and employment status), psychological (e.g., depression, cognitive functioning, socio-emotional functioning and self-regulation, stress reactivity, personality), healthcare profession (e.g., provider knowledge and attitudes about dementia) and healthcare system-level (e.g., access to care) factors and processes that separately, or together, may drive observed differences by sex and gender and/or may operate differently by sex and gender. Studies that account for methodological and measurement issues that may drive sex and gender differences are also of interest.

	Synopsis	The purpose of this Notice is to highlight interest in addressing the role of violence in health outcomes and integrating violence-related screening and interventions into health care settings. This Notice is to encourage intervention research focused on addressing exposure to violence - including but not limited to child maltreatment, intimate partner violence/teen dating violence, elder mistreatment, peer violence/bullying, and community violence – to improve individual-level health processes and outcomes.

Synopsis	This Trailblazer Award is an opportunity for NIH-defined New and Early Stage Investigators ( <a href="https://grants.nih.gov/policy/early-investigators/index.htm">https://grants.nih.gov/policy/early-investigators/index.htm</a> ) to pursue research programs of high interest to the NIBIB that integrate engineering and the physical sciences with the life and/or biomedical sciences. A Trailblazer project may be exploratory, developmental, proof of concept, or high risk-high impact, and may be technology design-directed, discovery-driven, or hypothesis-driven. Importantly, applicants must propose research approaches for which there are minimal or no preliminary data. A distinct feature for this FOA is that no preliminary data are required, expected, or encouraged. However, if available, minimal preliminary data are allowed. Preliminary data are defined as material which the applicant has independently produced and not yet published in a peer-reviewed journal. All preliminary data should be clearly marked and limited to one-half page, which may include one figure. Applications including data more than one-half page or more than one figure will be considered noncompliant with the FOA instructions and will not go forward to review.

	Synopsis	The Blueprint Neurotherapeutics Network for Biologics (BPN-Biologics) provides support for biologic-based therapeutic discovery and development, from lead optimization through phase I clinical testing. This Funding Opportunity Announcement (FOA) supports preclinical discovery and development of potential therapeutic Biotechnology Products and Biologics including, but not limited to, large biologic macromolecules, (e.g., proteins, antibodies, and peptides), gene-based therapies (i.e., oligonucleotide- and viral-based), cell therapies, and novel emerging therapies (e.g., microbial and microbiome therapies). Applicants will collaborate with NIH-funded consultants and can augment their project with NIH contract research organizations (CROs) that specialize in manufacturing, scaling, pharmacokinetics, toxicology, and Phase I clinical testing. BPN-Biologics awardee institutions retain their assignment of IP rights and gain assignment of IP rights from the BPN-Biologics contractors (and thereby control the patent prosecution and licensing negotiations) for biotherapeutic candidates developed in this program.

## NIH Funding Opportunities

SPIN ID	Program Title	Sponsor Name	Sponsor Number	Deadline Date	Funding Amount
	<p>[Optional][LOI/Pre-App], 06-Aug-2026</p> <p>This Funding Opportunity Announcement (FOA) encourages joint applications for the Global Infectious Disease (GID) Research Training programs from low- and middle-income country (LMIC) and U.S. institutions. The application should propose a collaborative training program that will strengthen the capacity of a LMIC institution to conduct infectious disease research (not including HIV/AIDS). FIC will support research training programs that focus on 1) major endemic or life-threatening emerging infectious diseases, 2) neglected tropical diseases, 3) infections that frequently occur as co-infections in HIV infected individuals or 4) infections or microbiomes associated with non-communicable disease conditions of public health importance in LMICs. Advanced scientific training related to prevention, treatment or public health approaches to any technical area of basic, epidemiological, clinical, behavioral or social science health research may be supported. Research training programs should incorporate didactic, mentored research and professional development skills components to prepare individuals for sustainable careers that will have significant impact on the priority health research needs of LMICs. This Notice of Funding Opportunity (NOFO) allows appointment of Trainees (D43) proposing to serve as the lead investigator of an independent clinical trial; or proposing a separate ancillary clinical trial; or proposing to gain research experience in a clinical trial led by another investigator, as part of their research and career development.</p>

Both small businesses and universities are drivers of technological innovation in the United States (U.S.), often working together to advance innovative ideas into products that can benefit the U.S. population. While most NIH funding supports basic research in university laboratories, the NIH also supports innovative technology development in U.S. small businesses through its SBIR and STTR programs. As technologies transition from academic discovery to small businesses, two common challenges arise, identifying the right team with the right expertise to take the product into a small business, and funding for early-stage technology development. This NOFO seeks to address both challenges simultaneously by having two equally important goals: entrepreneurial mentoring support, and product development support.</p>

## NIH Funding Opportunities

SPIN ID	Program Title	Sponsor Name	Sponsor Number	Deadline Date	Funding Amount
	Synopsis	<p>This NOFO encourages applications for the Lasker Clinical Research Scholars Program for the purpose of supporting the research activities during the early stage careers of independent clinical researchers. The program offers the opportunity for a unique bridge between the NIH intramural and extramural research communities and contains two phases. In the first phase, Lasker Scholars will receive appointments for up to 5-7 years as tenure-track investigators within the NIH Intramural Research Program with independent research budgets. In the second phase, successful scholars will receive up to 3 years of NIH support for their research at an extramural research facility; or, the Scholar can be considered to remain as an investigator within the intramural program.</p>

Sorkin, Ph.D.</p> <p><a href="mailto:sorkinb@mail.nih.gov">sorkinb@mail.nih.gov</a></p> <p><a href="#">Link to program URL</a></p> <p>09-Jun-2024 [Optional][LOI/Pre-App], 08-Jul-2024</p> <p>The purpose of this Notice of Funding Opportunity (NOFO) is to support trans-disciplinary, translational research on chemically complex botanical products or natural products traditionally used as dietary components, to inform future clinical trials of the efficacy of exceptionally promising dietary supplements for improving resilience. Clinical efficacy trials of such products are often challenged by gaps in understanding that critically affect the design and/or interpretation of a clinical trial. For example, the molecular mechanism(s) of action of a botanical dietary supplement might not be well established and thus the optimal product chemistry, for a given health outcome may not be known; in the absence of such information to guide product specifications, stability testing and assessments of bioavailability and absorption kinetics a clinical trial might not provide a good test of the effect of that botanical on the health outcome(s) assessed. Similarly, the best outcome measure for a trial of a product reputed to have many different health effects, or to have effects where many different quantitative outcomes might be relevant might benefit from deeper understanding of the biological structure(s) and/or system(s) affected by the product, and the health outcomes expected from modulating those targets. Interpretation of a clinical trial of an ingested product will benefit from the availability of methods to assess bioavailability of active constituents of the product or target engagement by those constituents. Clinical trial design will benefit from an understanding of the ways in which trial</p>

This solicitation describes a pilot for a potential new track for the existing NRT Program that will support research and education projects that will result in a new master's degree, certificate, or a track within an existing master's or Ph.D. program with high industry relevance in at least one focus area identified in this pilot. This will be accomplished through an effective partnership among: (a) a non-R1 Institution of Higher Education (IHE) (lead institution), (b) an non-lead IHE (an R1 or non-R1) that has either an ongoing or completed NRT program in at least one of the focus areas defined for this pilot (see below), and (c) two to three industry partners in the same focus area(s). The overall purpose is to train the STEM workforce in focus areas specified in this solicitation by stimulating collaborations among non-R1 institutions, institutions with existing or completed NRT projects, and industry partners.</p>

Innovation and Partnerships (TIP), and STEM Education (EDU), as well as the Office of International Science and Engineering (OISE) and the Office of Integrative Activities (OIA). By supporting research to understand the social and behavioral aspects of the rapidly changing world and how these challenges are affected by social, political, economic, and natural environments this DCL aims to advance understandings of fundamental and use-inspired research of people, organizations, and society, while revealing emerging opportunities to address challenges affecting individuals and communities to live healthy and productive lives. This announcement encourages multi-disciplinary teams led by social or behavioral scientists to develop research programs to advance scientific understanding of critical challenges facing social and environmental systems at local, regional, and global scales.

	Synopsis	<p>The Pathway to Stop Diabetes Program intends to attract brilliant scientists at the peak of their creativity to diabetes research, and to accelerate their research progress by providing the necessary resources and support for conducting transformative science. The Initiator Award is a two-phased award designed to support the transition of scientists from mentored training to independent research faculty. The Pathway to Stop Diabetes® Initiator award is designed to support early career researchers who have distinguished themselves during their research training as exceptionally talented and promising research investigators with a high likelihood of establishing successful, independent research programs and making seminal contributions in diabetes research. These awards are highly competitive and intended to support particularly innovative and transformational ideas that have the potential to have an exceptional impact in diabetes with an emphasis on the investigator’s potential to significantly transform diabetes through research (‘moving the needle’) to improve the lives of people with diabetes. These awards provide salary and research support for applicants during late stages of mentored training through establishment as independent research faculty.</p>

Synopsis	<p>The Conservation, Food and Health Foundation seeks to protect the environment, improve food production, and promote public health in Africa, Asia, the Caribbean, Latin America, and the Middle East. The Foundation supports projects and applied research that generate local or regional solutions to problems affecting the quality of the environment and human life; advance local leadership and promote professional development in the conservation, agricultural, and health sciences; develop the capacity of local organizations and coalitions; and address challenges in the field. The Foundation prefers to support projects that address under-funded issues and geographic areas. The Foundation funds applied research, pilot projects, new initiatives, training, and technical assistance, rather than ongoing support for programs that are already well underway. An important goal for the Foundation is to provide seed money to help promising projects, organizations, and individuals develop the track record they need to attract major foundation funding in the future.</p>

Deadline Dates (ALL)	01-Jul-2024 , 01-Nov-2024
Synopsis	The Fibrolamellar Cancer Foundation (FCF) is accepting proposals to support innovative research leading to improved understanding and curative treatments for fibrolamellar carcinoma (FLC). FLC, also known as fibrolamellar hepatocellular carcinoma (FL-HCC), is an aggressive liver cancer that tends to strike teens and young adults. The research must focus specifically on FLC. Studies should be intended to advance knowledge relevant to the understanding, diagnosis, epidemiology, or treatment of FLC. Of particular interest are applications showing a clear path towards a novel therapy or clinical trials with the ultimate goal of achieving a cure for FLC. The Foundation will accept grant applications to support innovative and promising research projects towards the listed goals. The FCF believes that collaboration engaging the best talent across institutions, together with early sharing of data and resources, often accelerates the path to a cure for rare cancers.
